sensio®

BEAUTIFULLY SIMPLE LIGHTING SOLUTIONS

Since 2007 we've been creating lighting in harmony with modern life. Specialising in kitchens, bedrooms and bathrooms, quality and innovation has always been at the heart of what we do, from lighting that stands the test of time to technology that's exclusive to us.

At Sensio we pride ourselves on providing premium products matched with a flawless execution and service. All of our lighting solutions are designed and developed right here in the UK, where we can constantly strive to create new concepts to brighten people's lives. Always pushing to pioneer new technology that seamlessly illuminates customers' homes, our passion is making lighting both intelligently simple and beautiful.

We hope to inspire your space with the power of lighting and thank you for partnering with us at Sensio.

Michael Linsky
Managing Director

OUR PROMISES TO YOU

Making Lighting Simple

Making Lighting Simple - one of the defining principles by which we live and breathe. Everything we do, whether it is in the design of our products, our customer service or how we communicate, we strive to always have Making Lighting Simple at the core. If it's not simple for you, our customer, we find another way until it is.

Market Leading Innovation

We place our focus on doing things a little differently. We are dedicated to designing and developing new and innovative lighting solutions that meet various design requirements. Our high quality range of products offer the very latest LED technology and features to work in harmony with customer's bathrooms. With our own in-house Product Development Team, we have the ability to not only work closely with customers to design products we know they need, but also innovate and lead the way in creating first to market, patented products.

Extraordinary Service

We're here to offer our exemplary service levels to every single customer. Whether that's a quick resolution to your email query, ensuring your orders get to you on time and in full or proactive communication and exceptional account management, we're committed to offering extraordinary service at every point.

Members of:

PIONEERING DESIGN

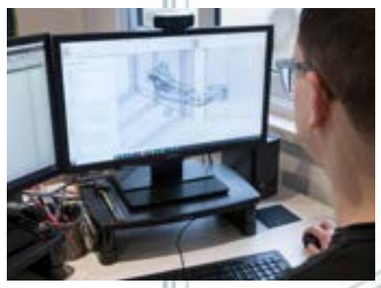
Designing in-house, we develop our products and packaging with the future in mind. Thinking about efficiency and waste reduction whilst creating high quality innovation.

WE DON'T JUST FOLLOW THE TRENDS - WE HELP SET THEM

Our expertise and industry knowledge is an integral part of our business with our in-house product development and design team based here in the UK. To us, every detail makes the difference and we're not satisfied until each product is finished to the highest standard.

A number of our LED mirrors, cabinets and lights carry Registered Design Rights. This means as we strive to continually bring innovative and exciting products to the market, our valued partners can be assured of having access to products they won't find elsewhere.

Our extensive product range is also constantly reviewed, enhanced and improved to ensure we stay at the forefront of our industry.



SUPERIOR QUALITY, GUARANTEED DURABILITY

We pride ourselves on using only the best components and materials to guarantee long-life performance, high light output and enhanced durability. All of our products go through rigorous third-party testing and we're proud to be ISO 9001 accredited.

Our products have won awards for their design excellence time and time again and we're so confident that each product will exceed your expectations that we offer a 5-year guarantee on all of our bathroom fittings.

INSPIRING SERVICE & SOLUTIONS

We're always researching the latest trends, technology and fashion to deliver solutions that stand the test of time. We delve deep into the market to shine a light on how our products can improve home environments and the way people live. So whenever you choose a Sensio product, you can be assured it's been thoughtfully created for the future.

WE'RE WORKING TOWARDS A MORE SUSTAINABLE FUTURE AND ARE COMMITTING RESOURCES TO ACTIVELY REDUCE OUR FOOTPRINT.

We care about our impact on the world and have set ourselves goals over the next 3, 5 and 10 years to meet high standards throughout our processes, operations and products to limit or mitigate our impact on the environment. These include:

We aim to reduce plastics from our product packaging as much as possible, including recyclable plastics, in favour of paper and cardboard

All products will be created with Long Design Life in mind, ensuring robust, long serving products including use of high quality LEDs for maximum life span

Careful selection of our production partners evaluated in accordance with our guidelines and carry ISO 14001

Improve the robustness of our supply chain to mitigate air carriage, maximise sea freight effeciences and increase local production to help achieve our target of Net Zero

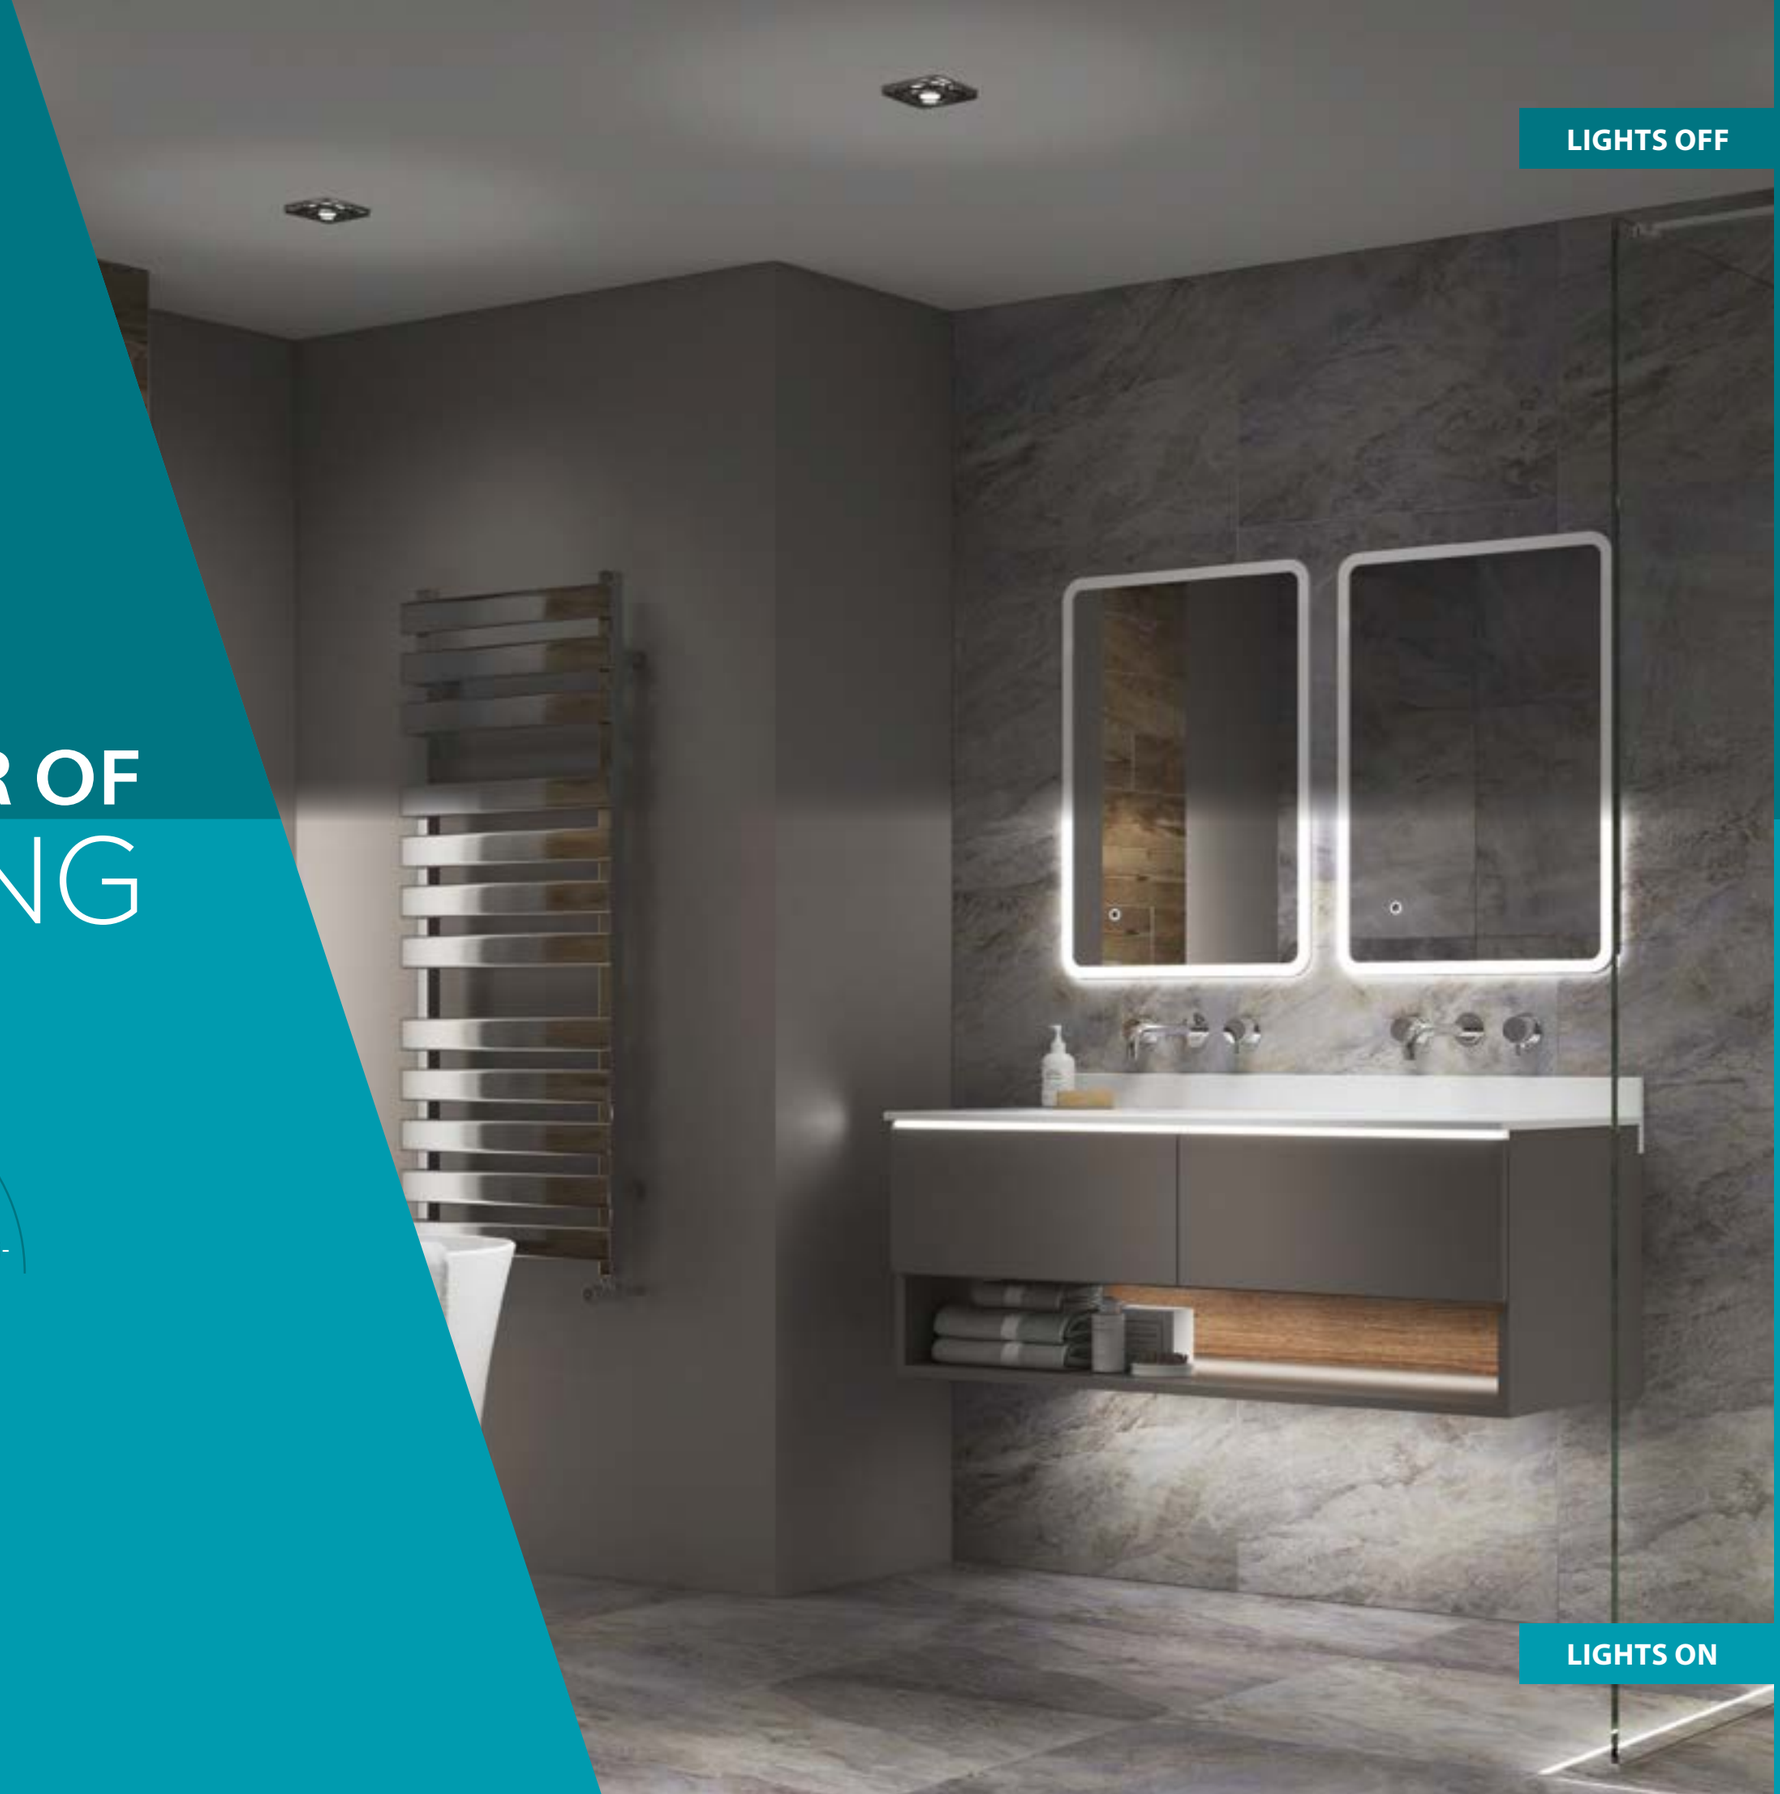
08 FAQ

09 GET IN TOUCH

THE POWER OF LIGHTING

Lighting can completely transform your bathroom beyond the practical benefits. It creates ambience, a brighter, more spacious and multi-dimensional feel and highlights design features.

Considering a lighting scheme at the initial design stages will influence the overall atmosphere of the bathroom space.



THE POWER OF LIGHTING

CREATING A LIGHTING PLAN

PROUD TO
PARTNER WITH

TASK LIGHTING
When lighting the bathroom the first thing to consider is task lighting. This is lighting for functional use and delivers the right amount of illumination to carry out everyday bathroom tasks.

MOOD LIGHTING
Mood lighting is about transforming a space for both ambience and practicality. Consider LED strips for a soft glow under vanity units or creatively recess in tile work for decoration. Use profiles to mount flexible strips in cabinets and shelving to discreetly eliminate dark areas.

CONVENIENCE LIGHTING
Lighting storage areas, cupboards and drawers in the bathroom helps to illuminate the contents for ease of use, while also adding an extra element of luxury to the design.

IP RATINGS AND ZONES
Perhaps, the most important factor when choosing bathroom lighting is to ensure that the light fitting is suitable for use in the area it will be installed. Follow the product IP rating and bathroom zone guide to select the right level of protection. The higher the rating, the greater the protection against particles and water ingress.

LIGHT IN LAYERS
Bathroom lighting is so much more than simple ceiling lighting. Be creative with application of light particularly around the vanity area where an illuminated mirror or cabinet is perfectly suited.

COMPLEMENT THE INTERIOR DESIGN
It is important to select the right LED colour temperature to not only match the bathroom interior colours and textures, but also to suit the mood and purpose of the bathroom.

Warm white LEDS have a yellow tone and complement bathrooms featuring wooden surfaces and flooring. They also create a warm, relaxing ambience perfect for relaxing. Cool white LEDS combine well with modern, bold and minimal themes and are great for task lighting and creating a bright and revitalising environment.

Sensio's CCT range of bathroom products are ideal as they offer the ability to change the the colour temperature to best suit the mood and time of day.

THE SENSIO SERIES

DESIGN AND INNOVATION ARE AT THE CORE OF SENSIO, STRIVING FOR SIMPLICITY WITHOUT COMPROMISE

50,000 Hours Light Life

Fantastic longevity providing the equivalent life to having the lights switched on continuously for 5 hours a day, for 27 years!

High Efficiency

Not only does each light benefit from a superb lumen output, ensuring bright illumination, each light runs off 24V, making them exceptionally efficient to run and providing maximum light performance.

High Colour Accuracy

Brightness and consistency of the lights is of exceptional standard and provides a true reflection of the colour temperature.

Quality Guaranteed

Each light has been designed and manufactured to guarantee superb performance, longevity and quality and benefits from Sensio's 5 year guarantee.

Our Series 1 3 & 5 collections are designed to group products by features to make the lighting design process easy. Ranging from a simple all natural white set, controlled at the wall through to voice activated, custom colour solutions.

All Sensio lights feature the same quality components and designs at their core to deliver stylish and efficient products, you can trust will last a lifetime:

SERIES 1

SIMPLICITY

Series 1 offers a concise range of simple, high quality LED lights with no compromise on quality or efficiency whilst benefitting from excellent pricing (based on minimum order quantities).

SERIES 3

CHOICE

Series 3 provides choice and customisation offered across a wide selection of products adding colour temperature options and different product finishes.

SERIES 5

TECHNOLOGY

Series 5 brings advanced lighting colour technology and control options to truly bring smart connectivity to the home.

KEY FEATURES - CUSTOM COLOUR

Sensio's range of illuminated LED mirrors and cabinets are packed full of features. These are detailed on each product page. As standard, the full range is IP44 rated for safe installation in the bathroom. Many also feature an integrated demister pad, simple control and colour temperature changing illumination - the benefits of which are all outlined in the following section.

TRIOTONE®

3 LIGHT TEMPERATURES - MATCH THE INTERIOR OR PREFERENCE

A Sensio trademarked concept first introduced in 2017, TrioTone® provides a 3-in-1 lighting choice in one light fitting or illuminated mirror. These products not only allow the option to select or change the colour temperature without having to replace the whole fitting, but also within mirrors featuring this technology, allow the owner to adjust the light temperature to suit the time of day, ambience and their personal preference.

Sensio TrioTone® lights and mirrors can be set to either warm white, natural white or cool white and can be found via the TrioTone® icon throughout this brochure.

Warm White (3000K)

Warm white LEDS have a yellow tone and complement bathrooms featuring wooden surfaces and flooring. They also create a warm, relaxing ambiance perfect for relaxing.

Natural White (4000K)

Natural white sits between warm and cool white and recreates the effect of natural daylight. Natural white's versatility compliments a range of bathroom styles.

Cool White (5000K)

Cool white LEDS combine well with modern, bold and minimal themes and are great for task lighting and creating a bright and revitalising environment.

CCT

"CORRELATED COLOUR TEMPERATURE" - SET ANY TONE, ANY TIME

Correlated Colour Temperature (CCT) is a concept that provides seamless transition through the full spectrum of temperatures ranging from warm, through to natural and then to cool white light. This allows you to mimic outside lighting conditions with precision - a feature that has been scientifically proven to have a positive impact on our health.

Different colour temperatures in a room have a broad range of effects and functions. For example, cool light settings offset dark tones used throughout the rest of the bathroom to create a balanced ambience. Warmer lights provide relaxing hues for a calming presence, while natural light is perfect for performing tasks, thanks to its neutral palette.

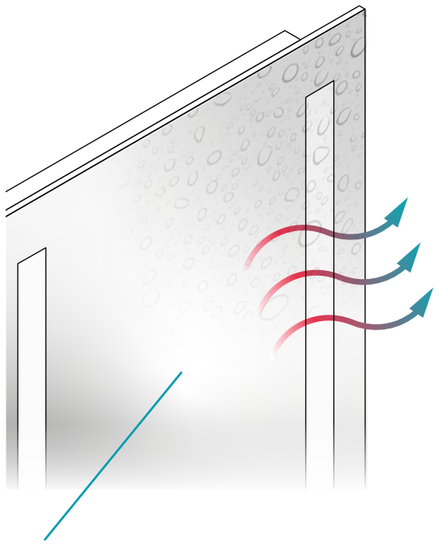
3000K Warm ← - - -

DEMISTER PAD

STEAM FREE TECHNOLOGY

Integrated demister pads are an ultra-thin layer, mounted on the back of the mirror glass. When activated, they gently warm the adjacent portion of the mirror to eliminate condensation formation and clear the glass.

- Removes the need for wiping down
- Less condensation and damp
- Efficient lifestyle routine for people on the go - clear for shaving and getting ready
- Mirror stays looking good with less watermarks
- Mirror is steam free and ready to use when you jump straight out of the shower



Condensation eliminated from the glass surface keeping it clear

SIMPLE CONTROL

Sensor technology is all about simple control and elegant design. A large selection of our mirrors and cabinets feature hands-free infra-red sensor or touch sensor control.

INFRA-RED SENSORS

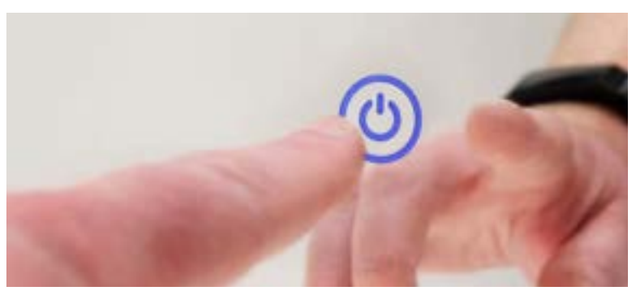
Infra-red sensors are simply activated by a swipe of the hand. Advanced features, such as dimming and colour control, where available are operated by hovering the hand near the sensor.

Infra-red sensors require a 150mm gap to the nearest surface to prevent interference

- Naturally increased hygiene in your daily routine through minimal contact and contamination
- Safety near wet zones with no electrical contact risk
- Discreet control allowing seamless appearance in design
- Less cleaning and maintenance - no fingerprints or smears

TOUCH SENSORS

Touch sensors are incorporated seamlessly into the glass surface and illuminate when active. Advanced lighting features may be controlled either by additional sensors or simply via one multi-touch sensor.



- Seamless design
- Simple control
- Multi-functional (on mirrors and cabinets with additional lighting features)
- Minimal contact

BATHROOM ZONES

Using electrical equipment in bathrooms or wet rooms requires attention to safety. The IEE Wiring Regulations (18th Edition) have identified particular zones within the bathroom to indicate what type of electrical equipment can be installed.

ZONE 0

Inside the bath, shower or wet room zone.

This area requires a minimum rating of IP67 and must be low voltage (12V max).

ZONE 1

Up to 2250mm above bath, shower or wet room basin.

A minimum rating of IP44. For 240V fittings, a 30ma RCD must also be used to protect the circuit.

ZONE 2

600mm outside a bath, shower, sink or water outlet.

A rating of at least IP44 is required.

OUTSIDE ZONES

Anywhere outside zones 0, 1 and 2, where water jets are not used for cleaning purposes, the general rules of BS7671 apply.

IP RATINGS

The IP (Ingress Protection) rating is a two digit code given to a piece of electrical apparatus that indicates the degree of protection its enclosure provides from dust, water and impact.

PROTECTION AGAINST SOLID OBJECTS

0	No protection
1	Protected against a solid object greater than 50mm (eg. a hand)
2	Protected against solid objects over 12mm (eg. fingers)
3	Protected against solid objects over 2.5mm (eg. tools)
4	Protected against solid objects over 1mm (eg. wire)
5	Limited ingress of dust permitted with no harmful deposit
6	Completely protected against ingress of dust

PROTECTION AGAINST WATER

0	No protection
1	Protected against vertical falling drops of water (eg. condensation)
2	Protected against water drops at a 15 degree angle from the vertical
3	Protected against sprays up to 60 degrees from the vertical
4	Protected against sprays from any angle (eg. splashes of water)
5	Protected against light water jets from any direction
6	Pretected against powerful water jets
7	Protected against water immersion (up to 30mins between 15cm and 1m)
8	Protected against long periods of water immersion under pressure

1ST NUMBER — IP65 — 2ND NUMBER

INSTALLATION GUIDANCE

The Sensio range of LED illuminated mirrors and cabinets all feature one of three methods for installation.

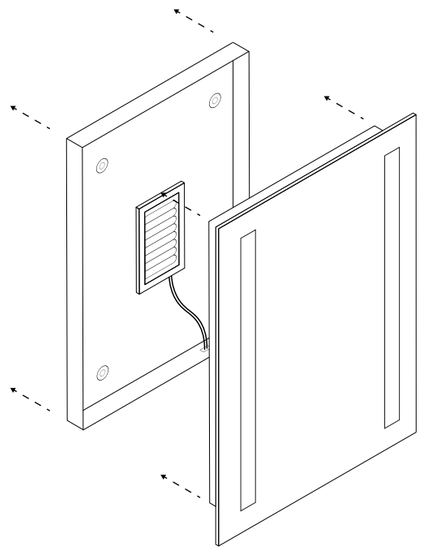
Please refer to the individual installation guide supplied for each product for more detailed and specific guidance

1. BACK BOX MOUNTED MIRRORS

Use the pre-drilled holes in the back box to measure and align where the mirror is to be installed.

The back box is wall mounted, housing the components and battery compartments.

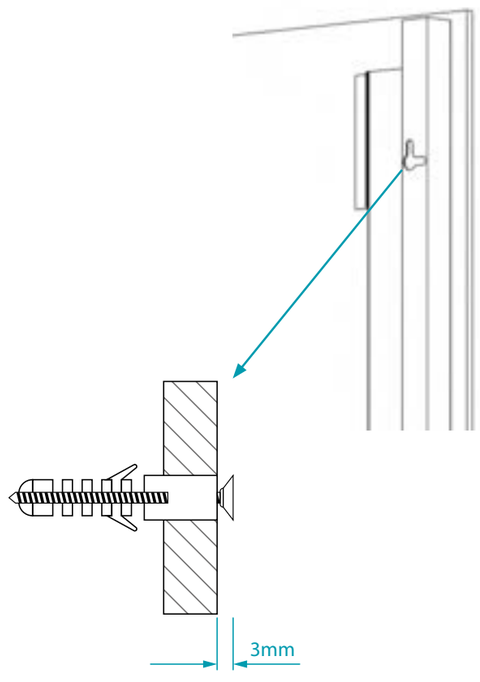
The mirror simply slots onto the back box and is secured in place with screws, provided.



2. KEY-HOLE MOUNTED MIRRORS

Key-hole mounted mirrors simply hang on screws.

Secure screws into the wall using rawl plugs. Leave approximately 3mm protruding on which to seat the keyholes.



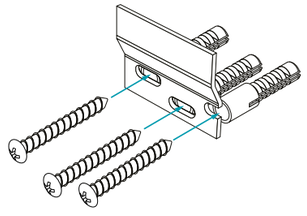
3. BRACKET MOUNTED CABINETS

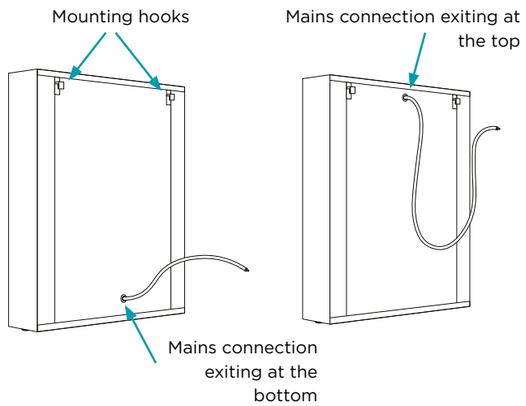
Cabinets are mains powered and supplied with the connecting cable exiting either at the top or bottom on the rear.

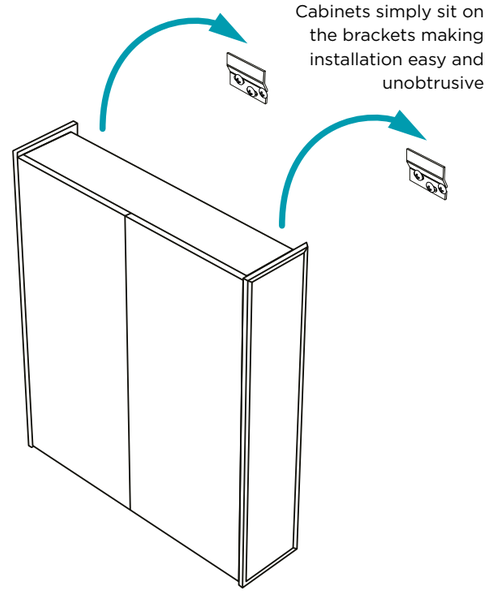
The cabinets are supplied with all the fixings required to hang.

Secure the included mounting brackets to the wall using the screws and rawl plugs.

The cabinet is simply seated in place on the brackets via pre-installed hooks on the reverse of the unit.







Some mirrors and cabinets within the Sensio range are provided with a connection cable pre-installed. This is indicated on each product page with this icon denoting the length of the pre-connected cable supplied.

ENERGY RATINGS EXPLAINED

With the introduction of new EU energy labels on electrical products, here's what the new labels mean for your Sensio lighting products.

WHY HAVE A NEW EU ENERGY LABEL?

Due to the popularity of light emitting diodes, lighting has become very efficient over the past 20 years with most products on the market falling comfortably into the A to A^{+++} rating.

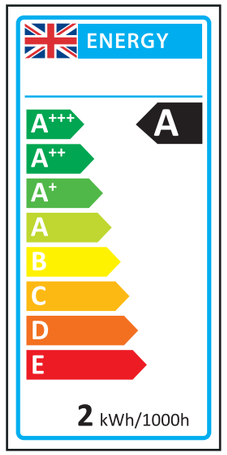
To make way for future improvements in energy saving technology, a new grading system has been implemented which simplifies the grading system as well as making it much harder for products to achieve higher ratings.

The grades now range from A to G and all products are re-classified on this new scale.

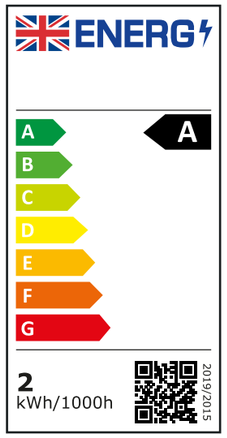
Customers can be assured they are still receiving the high quality lighting products from Sensio they did previously. However, the simplified scale now makes it easier to make an informed decision when choosing their lighting as well as allowing room on the scale for products with future advancements in energy saving technology.

Regulation: (EU) 2019/2015

Previous energy labels



New energy labels



- Seven step rating now runs from A to G

INSTALLATION

Mounts to a back box secured to the wall

Simple keyhole mounting on screws

Mounts by seating on wall brackets

Can be installed in portrait or landscape orientation

Resists ingress of objects over 1mm and water splashes

Resists partial dust ingress and water splashes

Dust and air tight. Resists low pressure water jets

Dust and air tight. Water immersion up to 30 mins with no harmful ingress

Fire rated for additional safety

Standard UK 240V powered

Rechargeable battery power

Supplied cable length

Product can be retrofitted - no wiring required

Values other than 240V indicated power supply from the product

Bathroom zone suitability, determined by IP rating

Battery operated

LED ILLUMINATED MIRRORS

GUARANTEE 5 YEAR

- Personalised lighting choices to match the bathroom style or preference
- Simple touch and sensor options to activate and control features
- Variety of styles, shapes, sizes and finishes to perfectly match any bathroom

ISLA PLUS
SIMPLE INSTALLATION

- Fully diffused, cool white LED panels illuminate each side of the mirror
- Perfect for retro-fitting - no wiring required
- Battery operated - requires 8 x AA batteries (not included)
- Suitable for rechargeable batteries
- Rocker switch activation

FEATURE LIGHTING & ACCESSORIES

GUARANTEE 5 YEAR

- Innovative features such as integrated shaver sockets streamline your daily routine
- Personalised lighting choices to match your interior, style and mood
- Contemporary styling that suit both traditional and modern interior aesthetics

POLAR IP65
COB LED FLEXIBLE STRIP

- Provides a completely uniform light line with no visible LED dots eliminating the need for a profile or cover
- Chip on Board (COB) technology for superior light output
- Excellent thermal conduction resulting in a cool running strip
- Superb light output with high lumen per watts
- 24V allows long runs of light without any light fade
- Supplied with pre-soldered, 1.5m driver connection cables at either end allowing the strip to be cut and both ends used
- Can be cut to length (every 31mm)
- Supplied in a 5m reel
- VHB (Very High Bond) adhesive tape backing for secure installation
- Compatible with the Universal Profile range

Polar IP65 **- LED Flexible Strip - 512 LED/m**

CODE	COLOUR	WATTS	VOLTAGE	LENGTH	DRIVER	LUMENS	RRP

RADIANT IP65
DIFFUSED LED FLEXIBLE STRIP

- An entirely diffused, bendable, silicone flexible strip light
- No visible LED dots
- Discreet, slimline 4mm width
- Driver connection cables pre-soldered at either end of the strip so two lengths can be used from the same reel if required
- Cut marks are indicated every 50mm on the back of the strip
- Ideal for a flush, recessed finish with a simple push-fit application
- Can be surface mounted with the use of the mounting brackets (10 supplied with 5000mm reels)
- Supplied end caps provide a clean and IP rated finish to cut ends
- Able to navigate around cabinetry

FAQ

Do you have a question about our products or services? Answers to some common questions can be found below. If you have a question that is not answered here, please visit our website or call us for further information.

DO YOU OFFER A PRODUCT GUARANTEE?

We offer a 5-year guarantee across all bathroom products. For full terms and conditions, please visit:

sensiolighting.com/pages/sensio-guarantee

HOW DO I SET UP A TRADE ACCOUNT?

If you operate a business and would like further details on how to apply for a trade account, please

email: info@sensiolighting.com
or call: 01977 522 020.

On successful completion of an account application, you will be able to purchase directly via the website or via (orders@sensiolighting.com). Qualification criteria must be met to be accepted for a direct account, details of which are specified under our terms and conditions which can be found on our website or by contacting our Customer Experience Team.

I'M A CONSUMER BUYING FOR MY OWN USE - WHERE CAN I BUY SENSIO PRODUCTS?

You'll find Sensio products stocked nationally through a large number of both online and high street retailers, and bathroom showrooms.

DO YOU OFFER FREE OF CHARGE DELIVERY?

We offer free delivery, usually within 2 days (Monday to Friday), to UK Mainland destinations for all orders placed before 2pm. A minimum order value of £150.00 (excluding VAT) applies for all bathroom products with the exception of mirrors and cabinets. A charge of £9.95 for carriage and handling will be added to all orders between £150 and £250 (excluding VAT) for deliveries within the UK Mainland only. Channel Islands, Isle of Man, Scottish Highlands and Eire will incur a separate delivery charge, determined by the destination and weight of the total order. Please contact our team for further information.

WHERE CAN I FIND FURTHER TECHNICAL DETAILS AND INSTALLATION INFORMATION?

Head to the product pages of sensio.co.uk. At the bottom of each product page you will find technical specifications and installation guides.

GET IN TOUCH

We hope you enjoy this Sensio brochure and are inspired to discover how lighting can transform the home. When you have finished with it, please pass it on or recycle it.

Please note that the colours in this brochure are as accurate as the printing process will allow, and we recommend that you view a product prior to purchase.

All prices are inclusive of 20% VAT and are Sensio's recommended retail prices. Prices and technical information are correct at the time of print (October 2023) and are subject to change throughout the course of the year without prior notification. Errors and omissions excepted.

For more information on our terms and conditions, please visit sensiolighting.com/pages/terms-and-conditions.
