

We design solutions for easily transforming any space in record time.

We're inspirers of your creativity thanks to our **lightweight panels, safe and easy to install with no building work needed.**

We make new challenges and dreams tangible because of your ambition to make the most demanding projects a reality.

PIONEERS AND LEADERS
IN DESIGN, DECORATIVE
PANEL MANUFACTURE
AND CREATING EXCLUSIVE
COMMERCIAL SPACES

Panespól supplies international customers in the contract, retail, architecture and interior design sectors.

- Cutting edge technology (we have our own polyurethane patents).
- Constant research and development.
- Highly personalised attention.
- Creative solutions for demanding projects.
- Full, efficient, logistical support.

20 years of experience

The company Panespól was set up in 2002. The offices and main factory are in Alcoy (Alicante), Spain.

It has become a regular supplier to designers, architects and interior designers of top international chains such as Burger King, Inditex, Salomon, L'Oréal, Desigual, Harrods and Ikea, among others.

Custom Made

Currently, high-street brands and restaurants need to transform their commercial spaces, more and more frequently. They are places where people go to have a certain type of experience. So each change is an opportunity to reflect the personality of the brand.

Therefore making a choice of something that is “not on the menu” has stopped being exceptional. Panespol does not only work on walls. We also work with light volumetric structures and three-dimensional figures that are strong and easy to transport, multiplying the range of creativity possible.

What we can do

Imaginative and intelligent decorative solutions for indoor and outdoor spaces. A custom-made and reliable service for all your ideas: any material or combination of materials, shapes, three-dimensionality, etc. Also, any finishes that you can imagine that would add value to your project.

Surface Collections

It is the collection of solutions already in the catalogue that we design and manufacture to easily transform a space in record time. We call it the Surface Collections.

For professionals

We have over 300 references in decorative panels. Surfaces to decorate the walls with maximum realism thanks to a wide variety of textures and finishes.

BUILDING A

17 Sustainable Development Goals

At Panespol we have adhered to the set of global goals adopted by the UN. We have developed and implemented good practices related to our activity and in line with this agenda. Through specific initiatives, we have integrated part of the SDGs into our corporate strategy, **to help build a better world.**

- Good health and well-being
- Quality education
- Clean water and sanitation
- Gender equality
- Affordable and clean energy
- Life below water
- Climate action
- Responsible consumption and production

2030 circular economy: recycling Panespol products

The Spanish Circular Economy Strategy, España Circular 2030, lays the foundations towards the promotion of a new production and consumption model in which the value of products, materials, and resources remain in the economy for as long as possible, thus minimising the generation of waste and taking the greatest possible advantage of those that cannot be avoided. **Thus far, we have been able to grind our products and we have incorporated 20% of the amount obtained into the manufacturing of new products,** contributing to Spain's efforts to achieve a sustainable and efficient economy in the use of resources.

Ecofriendly raw material: polyurethane

In terms of polyurethane, as a raw material it has a series of characteristics that give our products properties that work with the environment: is an effective **thermal insulator** that helps reduce energy consumption, **prevents the proliferation of fungi** and mould, and **has zero gas emissions.** In addition, at Panespol we use water-based polyurethane, and our panels have a **fireproof certificate.**

- Water-based raw materials
- Energy efficiency: reduction of energy consumption
- Air quality: zero gas emissions
- Fire protection: fireproof coating

Reduced Carbon Footprint

We are totally committed to the environment and to reducing our carbon footprint. **We have developed an advanced Climate Action Plan that began with measuring our carbon footprint over the last 2 years** and designing a roadmap that will allow us to reduce, and even neutralise, the impact generated by our commercial activity. This effort has been recognised by the Spanish Ministry for Ecological Transition and the Demographic Challenge which has awarded Panespol a certificate and has recognised the effort in the **32% reduction of our Carbon Footprint.**

New natural fibre raw material

At Panespol we lead the way in the **use of new fully biodegradable raw materials.** We have the development and ability to manufacture the same decorative panels but using a completely natural, sustainable and ecological raw material. **We use bio mesh made from woven biodegradable natural fibres.**

BRICKS

Timeless and dynamic. Versatility is one of the requirements for every interior decorator or designer. That is why brick is one of the most popular choices. Decoration of walls with brick offers a wide range of possibilities for creating modern, avant-garde and even rustic settings.

The **PANESPOL BRICKS** line suggests a feeling of warmth and strength that gives personality to any space thanks to our wide range of decorative panels with a multitude of colour treatments, styles and sizes.

STONES

Character and warmth. Stone is a material that does not go out of style, a decorative covering that attracts all the attention and plays the leading role in the setting. The use of stone gives a genuine sign of style in each project, creating comfortable, elegant and welcoming spaces.

PANESPOL STONES offers a wide range of imitation stone panels with varied finishes, textures and shapes, in which warm and natural tones predominate and that can preside over the most inspiring settings.

SLATES

An assortment of textures. Slates are an essential part of construction and decoration.

They can offer a robust and varied texture that in turn brings elegance and distinction. The **PANESPOL SLATES** line recreates this material with a wide variety of shapes, colours and textures.

BETON

Avant-garde and minimalism. Thanks to our imitation cement panels it is very easy to achieve high impact surfaces and cuttingedge settings.

PANESPOL BETON faithfully reproduces different types of cement with varying degrees of air pockets - characteristic blemishes of concrete walls or formwork produced using a wooden board. What really attracts the attention to this material is its ability to create continuous surfaces that unify settings, to find that loft style so sought after by many decorators. This type of panel is also available with aged effects.

WOOD

Warmth and comfort. Sculpting the characteristics of wood is not a simple task.

The **PANESPOL WOOD** decorative line offers the touch of warmth that connects us with our most ancestral natural essence. It also has the advantages of being insulating, lightweight, strong and easy to install.

TEXTURES

Creativity in its purest form. PANESPOL TEXTURES is the range tailored for those designers who want to explore new paths: textures inspired by wild nature, classic designs or rhythmic geometries.

Without a doubt, an inspiration for design lovers and for anyone who dares tackle any challenge with the help of PANESPOL. This range is ideal for those who want to carry out those stimulating projects that have so often been described as "impossible".

NATURAL

A luxury for the senses. PANESPOL
NATURAL enables you to literally introduce
nature into the design of any contemporary
setting, surprisingly in a fast and easy
way.

NATURAL MOSS is real moss from
the forests of Northern Europe;

TILES

Beauty in simplicity. Tiles have broken all the rules as far as interior design is concerned. Demand for them has increased for several seasons thanks to their versatility in adapting to any space and decorative style. They can provide luminosity, cleanliness, reflection and tradition to any setting.

In short, the **PANESPOL TILES** decorative panels gives the most restless decorator the ability to create unique spaces from light, strong panels, easy to install and without any brick-laying complications.

WAVIES

Continuity and volume. The 'concrete waves' look, an unstoppable trend that generates a captivating sense of visual constancy for its ability to unify environments and decorate without overdoing things.

PANESPOL WAVIES range manages to create striking spaces using concrete volumes and textures that seek symmetry and the impression of continuity. These stylish curved panels give shape to exclusive spaces.
