

The background is a close-up of a marbled porcelain surface. It features a complex pattern of organic, flowing lines in shades of light grey, white, and beige. A prominent horizontal band of vibrant, textured orange and reddish-brown runs across the middle. Below this band, there are patches of yellow and muted green, interspersed with the lighter grey and white tones. The overall effect is one of natural, earthy beauty and depth.

SLAB TO SURFACE

By combining beauty with technology and sustainability, Italian porcelain slabs have expanded design limits and streamlined production processes to enable the creation of ever more dynamic spaces... but this innovative material is not only for walls and floors.

Through our full service technical and design solution we are striving to **change attitudes** towards large format slabs. By coaching and informing about the versatility and aesthetic personality, we hope to inspire designers to think of each slab as a **creative surface**, one that has the power to define the form of the built space.

As awareness increases through the expansion of innovative design applications, and our commitment to lead by example, we continue to shift attitudes towards porcelain slabs. We offer support for architects, designers, and product manufacturers to incorporate these surfaces into their designs in new and innovative ways. This alliance can lead the way, demonstrating the material's potential and **inspiring others** to do the same.

Slowly we re-frame the perception of the slab as a surface and move towards our long-term strategy to **change cultural perception**. Together we can celebrate the *materiality* of these expansive surfaces and harness their ability to define form in a space.

materiality

[ma-te-ri-al-i-ty] *noun*

1. Materiality is the strategic use of materials to create products that are not only visually appealing, but also functional, durable, and sustainable. 2. Materiality serves as a medium that articulates ideas into a built form. 3. Materiality is an attempt to give noise to a space.

See also: *space, form, personality.*

ITALIAN PORCELAIN SURFACES

Detailed within this catalogue are products, specifications, and services designed to instil confidence in designers towards the progression from slab to surface. Services that redefine how architects approach material selection, providing design solutions for the functional and aesthetic requirements of each project. Services that facilitate the creation of luxury stand-alone products such as bathroom vanities, kitchen countertops and furniture. Services that assist designers to transform their ideas into completed products.

UNLOCK THE POTENTIAL OF THE SLAB

Large format porcelain slabs are one of the most sustainable and aesthetically appealing surface materials available in the world today. The wider availability of this cutting-edge surface in the UK has transformed the way these materials are used, presenting new beginnings, opportunities, and challenges. To unlock the full potential of large format porcelain slabs, a comprehensive UK-based cut-to-size solution is essential.

We are that solution.

Our new cut-to-size and cut-to-shape services empower designers to expand their creative boundaries and reach their design objectives. Cut-to-size benefits architects, designers, and contractors by providing practical solutions to design challenges. It is a comprehensive service that revolutionises how porcelain slabs are specified, offering considerable execution advantages. These advantages include shorter lead times, reduced onsite assembly and installation, less material wastage and lower risk of onsite damages.

INTRODUCING CUT-TO-SIZE

Porcelain slabs offer an extremely durable surface, but cutting and handling three metre high large formats onsite brings its own challenges, which can often result in chipping or cracking. By utilising our cut-to-size solution, the entire cutting process takes place offsite and is risk-free to you.

Cut-to-size eliminates the need for third-party operations including the transport of slabs between suppliers. Use cut-to-size for surface cladding, custom flooring, inlays and staircases. Also for projects where space is limited and manoeuvring full size slabs is impractical.

This level of support allows designers to have a relaxed approach to specifying large formats, and gives installers the confidence to handle slabs onsite and complete projects successfully. It's a collaboration that adds considerable value to a project, combining our expertise with your creativity, allowing this high-performing material to be specified with confidence and ease.

CUT-TO-SIZE LIGHTING INSTALLATION USING 6MM SLABS (FIG.6.1)

VERTICAL CLADDING

Achieving visual and tactile consistency in a given interior space through the harmonious use of materials, colours, and textures is a fundamental principle of interior design. Cladding is a highly effective way to achieve this, but this does not have to stop at the walls.

Being able to specify large formats on additional vertical surfaces provides exciting new design opportunities. With three metre long slabs you can promote this grand sense of scale, taking full advantage of less grout lines for a more seamless result. Experiment with pattern matching across cladded surfaces and achieve homogeneity and coherence in the design that is not possible with standard formats.

Leverage the longer lengths available with large format porcelain slabs to add interest to architectural details, including mouldings, columns, door skins, steps, archways, fireplace surrounds and feature walls.

VERTICAL CLADDING WITH PERFECTLY ALIGNED VEIN MATCHING (FIG.7.1)

PERFECTLY ALIGNED VEIN MATCHING (FIG.8.1)

CLADDING WITH VEIN MATCHING

Vein matching involves placing panels so that the vein movement found in the material continues across adjacent surfaces. This veining flows from one piece onto the other creating a continuous vein pattern.

Through our cut-to-size services, vein matching can be maintained across cladded surfaces. By pre-cutting each panel offsite, any risk of breakage onsite, or mismatching pieces is significantly reduced. Installers can approach vein matching projects with confidence while designers can execute complex schemes.

BESPOKE FLOORING DESIGNS

Create unique and visually stunning flooring designs on a larger scale by leveraging the full size and aesthetic appeal of large format slabs. Longer runs provide a seamless design with fewer grout lines. With our cut-to-size services, you can experiment with geometric patterns and curves to create your own bespoke cosmati flooring designs. Suitable for large scale projects spanning several hundred square metres, to a single inlaid floor for an entrance lobby, designs can be created for any style, from contemporary to classical. Geometric designs can be used to create intricate patterns and shapes, while curved designs can help with spatial zoning.

THE PROCESS

Be bold, experiment and elevate your room with a custom designed inlaid porcelain floor. Incorporate larger single pieces up to 3000 x 1500 mm and choose from over one hundred colours, textures and styles of porcelain slabs.

Our team will work with you to create your flooring design, bringing your vision to life and elevating the beauty of your space. Your design will be prepared offsite at our UK manufacturing facility. It will be carefully packaged and supplied with technical drawings. All flooring is supplied with clear piece numbering, to ensure successful and reliable installation.

CREATE A UNIQUE FLOOR WITH GEOMETRIC SHAPES, VIBRANT COLOURS, AND DIVERSE TEXTURES (FIG.24.1)

FURNITURE INLAYS AND TOPS

Reimagine your cherished furniture pieces with the timeless allure and durability of a porcelain inlay or top. Upgrade your existing table tops and furniture inlays with precision cut-to-size porcelain surfaces, made possible by our advanced CNC cutting technology. We can accommodate any shape, including ovals, irregular shapes, or rectangles, and provide square or curved corners to your exact specification or technical drawings.

Request circular diameters up to 1500 mm or rectangular pieces up to 3000 mm in length, while you can choose from over a hundred colours and textures, with an edge profile suitable for your needs.

The use of a porcelain inlay within existing furniture is both an elegant, cost effective and practical choice, offering beautiful variations of colour, style and texture. Porcelain also provides a durable and waterproof surface that is easy to maintain and suitable for hospitality and commercial remodelling projects.

3D CLADDING APPLICATIONS

Through the cut-to-size service, we are able to supply pre-prepared 3D cladding for a whole host of practical, artistic and time-saving applications. We meticulously label each piece and provide precision cut mitred edges for effortless installation. Employing pre-cut cladding streamlines the fabrication process, resulting in significant cost and time savings onsite.

3D cladding solutions can be used for residential projects both indoors and out, and for a host of retail and hospitality applications including plinths, planters, display stands, seating and customer service counters.

Architects can also exploit the beauty and practicality of porcelain slabs to explore every facet of stair design including steps, treads, nosing, risers and handrails.

MODERN AESTHETIC THROUGH CANTILEVER STAIRCASE WITH PORCELAIN TREADS (FIG.34.1)

STAIRCASE, STEPS AND TREADS

Contemporary staircase design embraces clean lines and innovative materials. Through our cut-to-size services architects and designers can now exploit the beauty and practicality of porcelain slabs to explore every facet of stair design including steps, treads, nosing, risers and handrails. We provide solutions for commercial and residential projects, and offer surfaces that are suitable for both internal and external spaces.

Use cut-to-size for projects of any scale, from a single step within a split-level scheme, to a full stairwell design, while our expertise and support ensure that your project is completed on-time and on-budget. Both cladded treads and profile edge steps are possible and all can be supplied with matching skirting and wall tiles. For accurate specification we recommend our onsite laser templating service to ensure the precision and fit of every step.

LARGE FORMAT FLOOR SLABS WITH MATCHING 12 MM STEPS WITH BULLNOSE NOSING (FIG.37.1)

TREAD AND NOSING PROFILES

Our steps and treads service provides a comprehensive solution for clients seeking bespoke steps, treads, and risers. We offer full laser templating to ensure accurate fitment and a smooth installation. All staircase projects are manufactured in the UK, which translates into a hassle-free process and reliable lead times.

On the following page you will find a selection of available nosing profiles, suitable for internal and external applications. All steps are available in 12 mm and 20 mm thicknesses and can be supplied with matching risers. External steps use 20 mm formats with a Grip finish. Options are also available for configuring anti-slip grooves and pre-installed channels ready for LED strip lighting (not supplied).

SUSPENDED ELEGANCE: CANTILEVER STAIRCASE WITH PORCELAIN TREADS (FIG.39.1)

NO DISCOLOURATION OR FROST DAMAGE, PORCELAIN SURFACES ARE DURABLE FOR ALL YEAR ROUND OUTDOOR USE (FIG.40.1)

CNC EDGE PROFILING (FIG.41.1)

EDGE PROFILING AND MITRES

Latest generation contouring machines prepare all profiling requests to exact specifications. Intricate cut-outs including circular, square or irregular shapes can be specified as well as decorative elements such as skirting and step tiles. We offer dependable lead times and execute all requests from within the UK.

CLADDING PROFILES

Through the cut-to-size service, we provide cladding for a whole host of practical, aesthetic and time saving tasks. Supplied with carefully labelled, precision cut mitres, pre-cut cladding saves considerable time onsite, improving efficiency, reducing waste and the chance of damage. A laser templating service is also available for complex cladding projects.

FLUTED DECOR (FIG.42.1)

STRIPS DECOR (FIG.42.2)

FLUTED DECOR

Fluted Decor can be incorporated into cut-to-size requests and is priced per square metre. Delicate grooves are cut into the material, creating a subtle contrast and variation to the surface design.

Fluted grooves are 2 mm in thickness and can be specified at 5 mm, 10 mm or 20 mm intervals and a vertical or horizontal direction.

STRIPS DECOR

Individually cut strips can be supplied in widths between 26 - 34 mm. Strips can be cut to clad flat or curved surfaces and applied to curved walls and pillars. Accurately angled mitred edges ensure a flush finish.

Each strip is carefully labelled to simplify the installation process and ensure the veining and pattern matching continues across surfaces to be cladded.

EXPANDING IDEAS: CUCINA COLLECTION

ISLAND LIFE: ELEVATING
YOUR KITCHEN WITH FUNCTIONAL
AND STYLISH ISLANDS

(FIG.44.1)

(FIG. 45.1)

PROJECT_01: KITCHEN ISLAND

An island that enhances the overall functionality and aesthetic appeal. Designers choose colour, size, finish and vein matching options. Designed to be installed over a base or existing cabinetry (not included). Specify the top, sides, front and back for a homogeneous or contrasting look. Cabinet doors can be cladded and islands can be specified with an overhang of up to 400 mm for additional seating. Precision is key, as laser templating is used to accurately position cut-outs for the hob, sink, and electrical sockets. All panels come together seamlessly with 90° mitred joints. The cost of the kitchen island is calculated per square meter, plus front and rear panels. Laser templating and full delivery and installation services available.

ISLAND SPECIFICATION

Length (L)	3200 mm
Depth (D)	1200 mm
Height (H)	900 mm
Downstand thickness (T)	60 mm mitred apron return at 90°
Front/Rear panels	Matching rear panel
Cabinet doors	Cladded cabinet door
Configurable options	Hob and sink cut-out
Note	Base unit and cabinetry not supplied

ISLAND MAKEOVER: BREATHING
NEW LIFE INTO YOUR COOKING SPACE

(FIG.53.1)

(FIG.54.1)

PROJECT_03: ISLAND COUNTERTOP

With the widest range of colours and designs on the market, you are sure to find the perfect porcelain countertop to match your kitchen. 50 mm thickness island countertop, designed to be installed over cabinetry or above an existing island (not supplied). This top is supplied with all visible surfaces clad with the chosen colour and carefully considered pattern/vein matching. Uninterrupted lengths up to 3000 mm and widths of 1500 mm are manufactured without a join this countertop has one join. Laser templating ensures that cut-outs for sink, hob, taps and electrical sockets are accurately positioned. Finally an overhang of up to 400 mm can be specified for occasional seating. Laser templating and full delivery and installation services are available.

ISLAND COUNTERTOP SPECIFICATION

Length (L)	4000 mm
Depth (D)	1250 mm
Height (H)	900 mm
Surface	Onice Nero - Polished
Downstand thickness (T)	50 mm with mitred apron return
Configurable options	Hob and sink cut-out

(FIG.55.1)

PROJECT_03: STANDARD COUNTERTOP

A standard countertop to revitalise an existing kitchen. Specified here with a 50 mm downstand to match the island. Install above kitchen units (not supplied) with a depth of 650 mm and against a rear wall. Lengths up to 3000 mm will be supplied without a join, while longer lengths like the 4800 mm shown here, will display a join. Countertop features a mitred apron return front edge with a 60 mm upstand to protect the wall from spills. Sides can also be finished to match the front. Cut-out for undermounted sink and single tap hole. Laser templating and full delivery and installation services available.

STANDARD COUNTERTOP SPECIFICATION

Length (L)	4800 mm
Depth (D)	650 mm
Downstand thickness (T)	50 mm

THE TASTE OF LUXURY:
A KITCHEN ISLAND THAT
MAKES A STATEMENT

(FIG. 62.1)

(FIG.63.1)

PROJECT_05: ISLAND COUNTERTOP

Elevate your kitchen with a luxurious island, dressed with a precision cut 12 mm thickness porcelain countertop. Every island countertop is laser-templated and arrives pre-cut with accurate cut-outs for taps and flush-mounted hobs and sinks. Choose from the widest selection of colours and styles and specify a stylish edge profile to personalise your design. Available in 3200 mm lengths without a join, with a maximum depth of 1500 mm. For larger dimensions, a panel join may be necessary.

SPECIFICATION

12 mm COUNTERTOP PROFILES (FIG.73.1)

COUNTERTOP PROFILES

Kitchen worktops are constantly exposed to potential scratches from sharp or pointed tools, and it is under these intensive conditions that high-performance porcelain slabs excel, exhibiting one of the hardest surfaces available on the market.

MITRED APRON RETURN
(downstand thickness 40 - 100 mm)

12 mm and 20 mm thickness countertops can be supplied with one of the following edge profiles:

BEVELLED EDGE

DOUBLE BEVELLED EDGE

SHARK NOSE EDGE

DOUBLE PENCIL EDGE

SHARP SHARK NOSE EDGE

BULLNOSE EDGE

20 mm COUNTERTOP WITH SINK CUT-OUT (FIG.74.1)

20 mm COUNTERTOP INTEGRATED SINK AND DRAINER GROOVES (FIG.74.2)

20 mm COUNTERTOP WITH INTEGRATED SINK AND DRAINER (FIG.74.3)

SURFACE SHOWN: CALACATTA MACCHIA VECCHIA 4D - POLISHED

CUT-OUTS & INTEGRATED SINK

Countertops can be specified with cut-outs for an under-mounted sink, flush-fitting hob and electrical or charging sockets. An integrated sink with drainer, which has all surfaces clad to match your work surface can also be specified. Vein matching is employed where panels meet to ensure the beauty of the surface design is maximised. And with laser templating service producing an extremely accurate worktop, costs associated with reworks are eliminated and time spent on installation is significantly reduced.

COUNTERTOP OPTIONS

SPLASHBACK (FIG.75.1)

SPLASHBACKS & UPSTANDS

Our luxury porcelain kitchen splashbacks are the epitome of sophistication and style, adding a touch of elegance to any kitchen while providing a durable and low-maintenance solution for protecting your walls from spills and splatters. From simple 60 mm upstands to full height feature walls, a complementary splashback will enhance and complete every kitchen project. Splashbacks are precisely cut by CNC machine and are prepared with pre-cut holes for electrical and charging sockets or utilities. Choose a style to complement your countertop in uninterrupted lengths up to 3000 mm and heights from 60 mm to 1500 mm for standard runs, or taller up to 3 metres for feature walls.

SPECIFICATION

EXPERIMENTING WITH COLOUR

Terrazzo, renowned for its timeless charm, continues to be a beloved choice in many contemporary home designs. With its distinctive colour pigments and unique pattern, terrazzo provides a versatile surface that can serve as the canvas for your bathroom creativity. When paired with contrasting textures such as stone, brass, or leather, it creates a tactile environment that begs to be touched. Embrace the versatility and allure of terrazzo in your bathroom design and let your creativity run wild.

LEO 1400 x 500 x 180 mm WITH MATCHING GLOBO AND 3D MIRROR (FIG.97.1)

EXPERIMENTING WITH COLOUR

A bold choice of feature wall provides a tone-on-tone colour palette, with large format slabs providing minimal grout lines and floor-to-ceiling panels. The shape grouping of the wall-mounted Leo basin, Globo storage unit, and 3D Mirror, feature tones from the palette and offers conformity without overwhelming the space. Exciting the senses are vertical veins which ally with the organic onyx-effect formations. The dark floor provides room for the concept to breathe. Embrace these enchanting surface colours in our bathroom product collection and let your creativity shine.

EXPERIMENTING WITH COLOUR

Designing with electrifying colours can be a game-changer in creating a unique bathroom. However, for the perfect balance, it's important to pair these bold hues with warm tones to calm your space. The advancement in porcelain slab design is driving towards impact rather than coherence. Use earthy browns and soft neutrals to counterbalance the boldness of daring colours, to create a harmonious blend that adds depth and dimension to the design. Explore these exciting, blended graphics in our bathroom product collection.

TABLE TOP CONFIGURATION

Italian porcelain surfaces are available as luxurious and elegant table tops and table inlays. Known for their durability and timeless beauty, and with a wide selection of colours and styles to choose from, each top boasts its own delicate veining and unique patterns. There is a choice of three finishes including Polished, with its high shine, Honed which adds a soft sheen, or Natural with its delicate textures, each adding an air of sophistication and refinement. Please note that if you are supplying your own base, porcelain table tops are extremely heavy and require a very sturdy support.

Remodel kitchen islands and countertops with a brand new porcelain worktop. Install precision cut high-performance worktops from a choice of over one hundred stunning colours and styles. Upgrading existing kitchen worktops is easy... Select your chosen surface from our extensive collection of Italian Porcelain. Then schedule an appointment to carry out a detailed laser templating of the project site. When the new top is ready, we send our installation team to deliver and install it. The entire process is stress free, and because we take care of the entire process from templating, manufacturing to installation, it is also totally risk free.

COUNTERTOP DATA SHEET

Length (L)	∞ (Max 3200 mm without a join)	
Depth (D)	651 - 1500 mm	
Thickness (T)	12 mm	20 mm
Approximate weight	29 kg per m ²	45 kg per m ²
Edge profile	See Edge Profiles	
Configurable options	Options for cut-outs, integrated sink and tap holes	

20 MM ISLAND COUNTERTOP (FIG.167.1)

12 MM ISLAND COUNTERTOP (FIG. 168.1)

20 MM ISLAND COUNTERTOP AND WORKTOP (FIG.170.1)

20 MM COUNTERTOP WITH INTEGRATED SINK AND DRAINER GROOVES (FIG.171.1)

PORCELAIN SURFACES REDEFINED

The products presented in this catalogue are available in a wide range of colours and styles. All colours can be paired with matching large format Italian porcelain slabs for walls and floors. Porcelain slabs are the latest generation of surface materials that combine lightweight design with increased technical performance. These slabs redefine conventional

size rules, with 160 x 320 cm formats that offer unparalleled versatility for ambitious design schemes. Additional formats measuring 120 x 280 cm have been introduced to provide practical solutions for walls, minimising waste and eliminating the need for cutting during installation. With a thickness of just 6 millimetres, these porcelain slabs can be seamlessly

used for flooring, wall cladding, or fixed to any vertical or horizontal surface including upstands and skirting. The result is an easy-to-install, continuous flat surface with minimal grout lines and maximum decorative impact.

SUSTAINABILITY

All porcelain surfaces are manufactured using sustainable processes that minimise environmental impacts, conserving energy & natural resources. Produced without the use of any harmful or radioactive materials, no hazardous emissions are emitted and they will not affect air quality. All waste material that is associated with the supply of the tile surface

is fully recyclable and all packing material is produced with recycled material. This means that all surfaces have a reduced environmental impact throughout their lifespan. With no toxic or polluting substances used in their composition and production they meet the highest standards of quality and environmental regulations, conforming to the following certifications:
