THE PRISM STORY

We would like to introduce you to Prism. We make bespoke shower screens to your custom specification.

To fully understand Prism, it is key to know where we have come from. Whilst the brand is new, our expertise is not. For the past 10 years at Mega Glass we have been supplying glass to the construction sector, manufacturing and installing thousands of shower screens for some of the country's prestigious public spaces and private residences. When the industry called for the best in bespoke showers, they came to us. Prism is the next chapter in the Mega Glass story.

We don't just supply the trade: Prism gives architects, designers, specifiers, showrooms, house builders, developers and consumers direct access to us. We ensure the highest quality, service and expertise throughout the process.

The Mega Glass team and our factory floor.

Whether you need a one-off statement shower screen to compliment a dream bathroom, or multiple bespoke sizes for a large development, we ensure consistency, quality and flexibility.

WHY CHOOSE US

Bespoke used to mean complicated, time consuming and expensive. Unique to the industry, **all of our showers are made bespoke** to custom fit any space.

We offer a **user-friendly, step-by-step product builder that allows a 'pick and mix' offering:** Perfect for architects, designers and developers as well as a powerful tool on the showroom floor. For specifiers and contractors who need to deliver what the architect and/or designers imagine, our offer can help facilitate credible and cost-effective options with little or no compromise.

Showers with endless possibilities – **8 types of glass, 11 hardware finishes, an extensive range of hardware, framed and frameless styles and in excess of 25 layouts, all in bespoke sizes.**

Prism is bringing **real choice to industry time-scales** and pricing in a fresh, customer focused way. In short you get the design you want, built by a team who truly know what quality is. And because we hold glass stock and **manufacture at our own premises in the UK, lead times are short and remedials/urgent orders can be turned around quickly.**

This is the Prism DNA.

Made in the UK

OUR EXPERTISE COMES FROM 10 YEARS OF:

- Manufacturing using a combination of state-of-the-art-plant and skilled operatives
- Providing both a supply-only and supply & install service to the industry
- Fulfilling commercial contracts: Our knowledge ensures we understand the comprehensive paperwork, valuations, language, programming, FORS, logistics, H&S and other contractual requirements
- Working across new-build and refurbishment projects, multi-plots and single residences
- Training our staff: All installation teams are CSCS card holders, our drivers are FORS trained and we work with CITB to fund a number of staff every year to undertake various NVQ's ranging from Levels 1-6
- Understanding the logistics of delivering glass. From packaging with protective film, corner protectors and edge-banding, a vast amount of what we send out is delivered by our in-house drivers. Where an order is for multiple items we work to a call-off schedule to suit the needs of the project.

Prism may be new but our expertise runs deep.

RECENT PROJECTS

Trusted by the best in the business.

Our combination of knowledge, experience and extensive range of products has helped us win and fulfil many prestigious projects. Our shower screens have graced everything from multi-million pound properties to hotels, developments and student accommodations. Our clients know that the highest quality does not always come at the highest cost. Here are some of our project highlights:

1. **Project:** Embassy Gardens - SW8
Main Contractor: Ballymore
Architect: Reddy Architecture + Urbanism
Details: Survey, manufacture and install shower and bath screens to 586 apartments across 21 levels in two blocks
Completed: December 2021
Value: £244,000
2. **Project:** The Dumont - SE1
Main Contractor: St James, Berkeley Homes
Architect: John Robertson Architects
Details: Survey, manufacture and install shower screens, bath screens & shower doors to 180 apartments, across 30 floors
Completed: April 2021
Value: £231,000
3. **Project:** Centre Point - WC1A
Main Contractor: Multiplex
Architect: Conran and Partners
Details: Design, survey, manufacture and install shower screens, bath screens and bespoke LED mirrors throughout 260 apartments
Completed: July 2019
Value: £484,000
4. **Project:** Sovereign Court - W6
Developer: Berkeley Homes
Architect: Lifschutz Davidson Sandilands
Details: Survey, manufacture and install framed shower and bath screens to 325 apartments across five cores
Completed: April 2022
Value: £132,000
5. **Project:** Kensington Row - W14
Main Contractor: St Edward, Berkeley Homes
Architect: RGP Architects
Details: Survey, manufacture and install bi-fold doors, shower screens and bath screens across two phases of the development. All shower screens were installed with the Prism underframe
Completed: May 2022
Value: £230,000
6. **Project:** Auriens 2 Dovehouse Street - SW3
Main Contractor: Multiplex
Architect: PDP London
Details: Survey, manufacture and install DDA compliant shower screens and doors to 94 apartments
Completed: August 2021
Value: £120,000

1. Embassy Gardens - SW8

3. Centre Point - WC1A

4. Sovereign Court - W6 0BT

2. The Dumont - SE1

5. Kensington Row - W14

6. Auriens 2 Dovehouse Street - SW3

7. **Project:** Chelsea Barracks - SW1W
Main Contractor: Mace
Architect: Squire & Partners
Details: Survey, manufacture and install all shower screens and bath screens to phase 1 of the scheme totalling 350 apartments
Completed: July 2018
Value: £262,000
8. **Project:** The Corniche - SE1
Main Contractor: St James, Berkeley Homes
Architect: John Robertson Architects
Details: Survey, manufacture and install shower screens and bath screens within 338 apartments as well as all glass elements within the spa area. All hardware was made to a completely bespoke finish
Completed: August 2018
Value: £548,000
9. **Project:** 9 St. Mary Abbots Place – W8
Developer: London Projects
Architect: CAMM Architects
Details: Design, suvery, manufacture and install clear and reeded shower screens and mirrors through 24 apartments
Completed: November 2021
Value: £35,000
10. **Project:** Northfields, HA0
Developer: Berkeley Homes
Architect: Lifschutz Davidson Sandilands
Details: Manufacture and deliver 243 shower screens and 378 bath screens
Completed: October 2021
Value: £220,000
11. **Project:** Manhattan Loft Gardens - E20
Main Contractor: Bouygues
Architect: Skidmore, Owings & Merrill (SOM)
Details: Survey, manufacture and install shower screens, shower doors and bath screens to 318 apartments
Completed: January 2021
Value: £200,000
12. **Project:** Mandarin Oriental Hotel - SW1X
Main Contractor: Vinci Construction
Architect: Purcell Architects
Details: Design, survey, manufacture and install shower screens, bath screens and bespoke reeded mirrors to 168 guest rooms
Completed: March 2019
Value: £330,000

7. Chelsea Barracks - SW1W

8. The Corniche - SE1

9. 9 St. Mary Abbots Place – W8 6LS

10. Northfields, HA0

A TYPICAL DAY AT PRISM

6:00

Our factory manager arrives.

Lights are switched on in our 40,000 sq. ft state-of-the-art manufacturing facility where, daily, hundreds of glass products are manufactured for projects around the UK. Our glass processing centre is an unrivalled resource to create bespoke showers.

Our factory just outside London

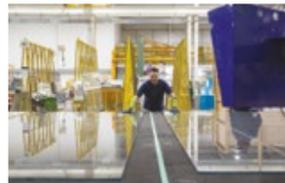

6:10

First vehicles leave early for site drop off in central London, where our contract installation teams are ready and waiting to take delivery. Back at base, our production manager allocates the days production flow.

7:30

Production team signs in and gets to work. New orders are cut whilst work in progress seamlessly resumes. A single sheet of glass, once selected, will typically flow through the factory over 3 – 5 working days.

- Cutting
- Polishing
- Waterjet cutting
- CNC shaping
- Drilling
- Beveling
- Mitred edging
- Toughening
- Backpainting
- Laminating
- Sandblasting
- UV bonding
- Product assembly

8:00

Office team processes first work tickets of the day with details of all customer and specification requirements, to ensure a timely transition to product creation.

8.15

Large delivery of stock arrives and is offloaded. Typically, we receive glass in jumbo sheets sized 6000 x 3210mm. These sheets are mechanically lifted and organized in giant racks, ready for selection and processing. Our stockholding numbers 1500 sheets of glass, representing over 75 different glass types.

9:00

Health & safety walk around: glass factories can be a dangerous environment. Our staff are the heartbeat of our operation and part of the Prism family. We take H&S seriously.

10:30

Supplier meeting to ensure good stock levels are maintained. We build long lasting relationships with high quality suppliers, to ensure we can deliver excellence now and always.

11:00

Glass waste is collected as part of our recycling commitment to sustainability. In a typical year, we will recycle over 150 tonnes of glass equating to 45,000Kg of CO2 prevented from going into the atmosphere.

12:30

Lunch break begins for half of the factory team – time for them to recharge. On return, the other half will begin their lunch break allowing production to continue efficiently.

14:00

Departmental office personnel meet to discuss details of complex orders received. Our aim is to get glass manufactured correctly first time, every time.

15:30

Final QC on all panels being dispatched the following day.

16:15

Vehicles are prepared for deliveries the next day with glass loaded and delivery notes ready for customer sign off.

16:45

Directors and managers meet to discuss Prism contracts, clients and future products.

17:00

Core factory team down tools and sign out, leaving behind a dedicated Prism shift to continue working on orders. We put in the hours to ensure we consistently deliver on time.

THE PRISM RANGE

Please open the pull-out back cover to get the full brochure experience

Overview	p.14
Shower screens	p.18
Bath screens	p.50
Sliding doors	p.64

Our brochure offers real choice across three main categories:

- **Shower screens** ^(p.18)
- **Bath screens** ^(p.50)
- **Sliding doors** ^(p.64)

In each category we offer multiple configurations:

- **8 glass types**
- **11 hardware finishes**
- **An extensive range of hardware styles**
- **All shower and bath screens also available framed, some in crittal style**

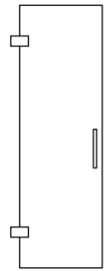

And if what you want or imagine is not in the catalogue, do get in touch, we will be able to provide it through our strong supplier relationships and in-house bespoke manufacturing.

SHOWER SCREENS

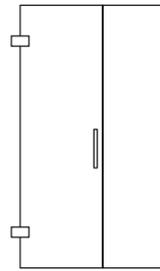

Whether it be a corner, alcove or wetroom, our shower configurations have it covered.

HOW TO USE THIS BROCHURE

Example calculation:

ATLANTIS

Begin by opening out the pull-out back cover to reveal images and codes of all glass types, hardware finishes and styles

- 1 Making use of configurations displayed on page 14/15 of the brochure, identify and select the appropriate layout for your shower and move to the corresponding page.
- 2 Refer to the technical information, bottom left of the page, to determine panel references within your chosen shower iteration.
- 3 Identify and take note of the cost of each panel using the closest dimension rounded up to the nearest 100mm. Costs noted are representative of clear glass and include profile 1 in a chrome finish where required, and all the seals necessary to properly fit a door.
- 4 If an alternative glass type is chosen, refer to the pull-out back cover to view the applicable price percentage uplift and make a note of adjusted glass panel costs.
- 5 Choose whether you require a left-hand or right-hand configuration and ensure this is noted on your order.
- 6 Using the pull-out back cover, choose your preferred hinge style and finish. Locate the correct cost using the 'Choose your hinges' pricing table and make a note. If there is no cost displayed, your selection is not available.

- 7 If you would like profiles to be in an alternative finish to chrome, or wall clamps are preferred, locate the correct cost using the 'Choose your profile' pricing table and make a note.
- 8 Refer to the pull out back cover to view the selection of knobs, handles and pulls available. Locate the corresponding costs in the 'Choose your knob, handle or pull' pricing table and make a note. Pull 1 is a polished hole with no additional hardware. If not applicable to your chosen configuration, skip this step.
- 9 Refer to the pull-out back cover to view support bars and ceiling clamps (ceiling clamps can only be selected if your screen finishes between 35-45 from the ceiling) and make your selection. Locate the correct cost using the 'Choose your support bars' table and make a note. If not applicable to your chosen configuration, skip this step.
- 10 Refer to the pull-out back cover to view corner clamps and make your selection. Locate the correct cost using the 'Choose your corner clamps' pricing table and make a note. If not applicable to your chosen configuration, skip this step.

The total sum of your noted costs from steps 3 – 10 will be the cost of your chosen shower configuration and hardware in your selected finishes inclusive of VAT (excludes delivery).

alcove or wetroom, our shower
configurations have it covered.

SERENE

Example configuration

Glass type: Clear
 Hardware finish: Chrome (CH)
 Profile: Profile 1
 Hinges: NA
 Knob/handle/pull: NA
 Wall clamps: NA
 Corner clamps: NA
 Support bar: Support 9

Glass height: 2200mm
 Screen A width: 1000mm

Specified RRP inc VAT: £860.00

Technical information

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All prices are RRP (inc VAT) and exclude delivery.

Drawings illustrate a Left-Hand opening.

1. Choose the size of each panel

Width per panel (up to)	100mm	200mm	300mm	400mm	500mm	600mm	700mm	800mm	900mm	1000mm
Screen A	£230	£285	£340	£395	£450	£500	£555	£610	£665	£720

All screens, doors and returns are priced using clear glass. Refer to step 2 for alternative glass options.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish. Refer to step 4 for alternative profiles and finishes.

2. Choose your glass type

Refer to the pull-out back cover to view the price percentage uplift of alternative glass types.

3. Choose left-hand or right-hand configuration

Technical drawing shows left-hand configuration.

NORD

Example configuration

Glass type: Low Iron Satin
 Hardware finish: Brushed Nickel (BN)
 Profile: Profile 1
 Hinges: Hinge 5 GTW
 Knob/handle/pull: Handle 6
 Wall clamps: NA
 Corner clamps: NA
 Support bar: Support 3

Glass height: 2200mm
 Door A width: 700mm
 Screen A width: 900mm

Specified RRP inc VAT: £2,928.50

Technical information

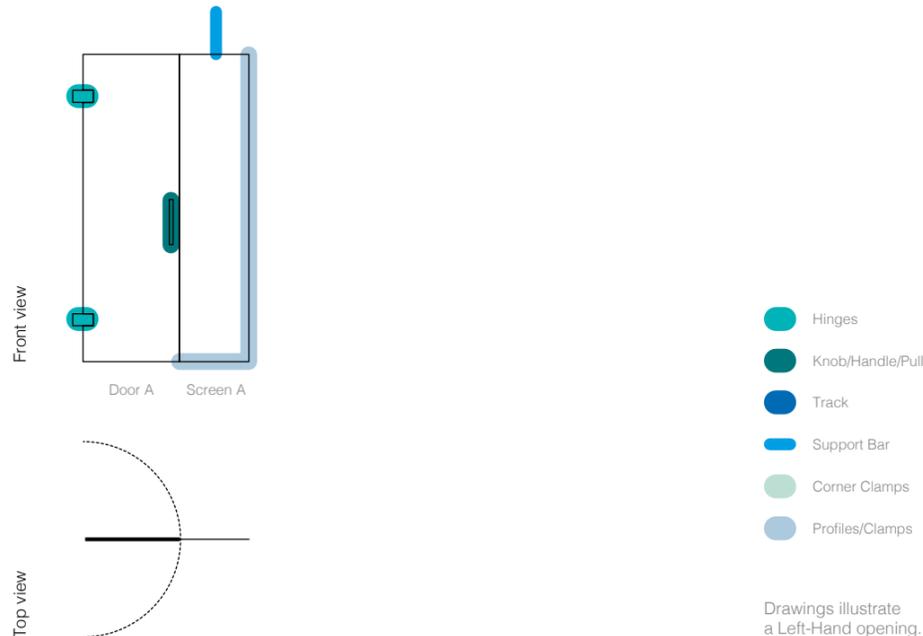

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All doors are supplied with the required seals.

All prices are RRP (inc VAT) and exclude delivery.

1. Choose the size of each panel

Width per panel (up to)	100mm	200mm	300mm	400mm	500mm	600mm	700mm	800mm	900mm	1000mm
Door A	£365	£430	£490	£555	£620	£680	£745	POA	POA	POA
Screen A	£230	£285	£340	£395	£450	£500	£555	£610	£665	£720

All screens, doors and returns are priced using clear glass. Refer to step 2 for alternative glass options.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish. Refer to step 4 for alternative profiles and finishes.

All doors are supplied with the required seals.

2. Choose your glass type

Refer to the pull-out back cover to view the price percentage uplift of alternative glass types.

3. Choose left-hand or right-hand configuration

Technical drawing shows left-hand configuration.

5. Choose your hinges

Example configuration

Glass type: Low Iron Satin
 Hardware finish: Chrome (CH)
 Profile: Profile 1
 Hinges: Hinge 2 GTG
 Knob/handle/pull: Handle 5
 Wall clamps: Clamp 5
 Corner clamps: NA
 Support bar: Support 1

Glass height: 2200mm
 Screen A width: 500mm
 Door A width: 700mm
 Screen B width: 500mm

Specified RRP inc VAT: £3,459.00

Technical information

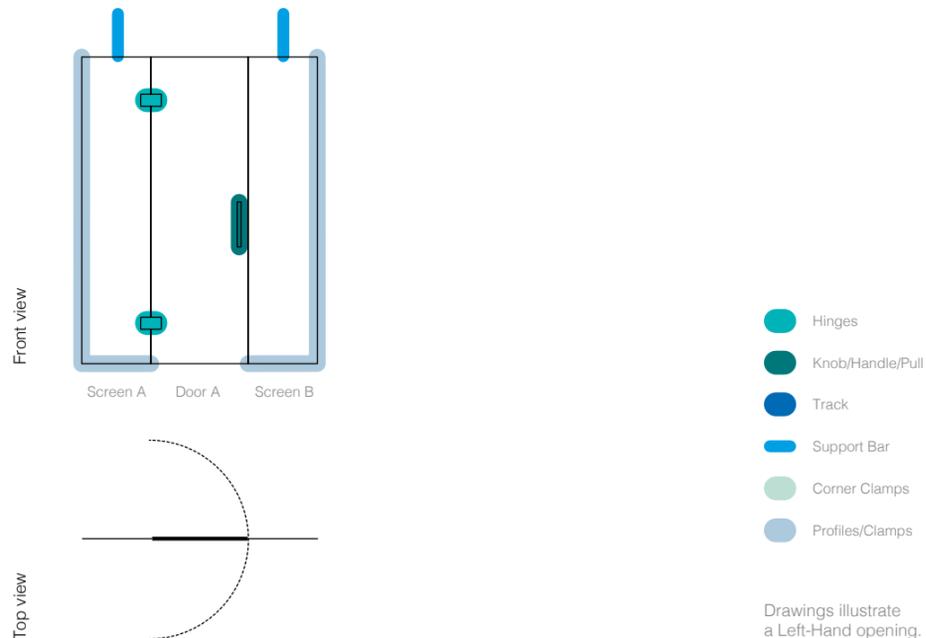

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All doors are supplied with the required seals.

All prices are RRP (inc VAT) and exclude delivery.

1. Choose the size of each panel

Width per panel (up to)	100mm	200mm	300mm	400mm	500mm	600mm	700mm	800mm	900mm	1000mm
Screen A	£325	£380	£435	£490	£545	£595	£650	£705	£760	£815
Door A	£365	£430	£490	£555	£620	£680	£745	POA	POA	POA
Screen B	£230	£285	£340	£395	£450	£500	£555	£610	£665	£720

All screens, doors and returns are priced using clear glass. Refer to step 2 for alternative glass options.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish. Refer to step 4 for alternative profiles and finishes.

All doors are supplied with the required seals.

2. Choose your glass type

Refer to the pull-out back cover to view the price percentage uplift of alternative glass types.

3. Choose left-hand or right-hand configuration

Technical drawing shows left-hand configuration.

5. Choose your hinges

NIRVANA

Example configuration

Glass type: Medium Fluted
 Hardware finish: Antique Brass (ABR)
 Profile: Profile 1
 Hinges: Hinge 1 GTR
 Knob/handle/pull: Handle 5
 Wall clamps: NA
 Corner clamps: NA
 Support bar: Support 8

Glass height: 2200mm
 Return A width: 900mm
 Door A width: 700mm
 Screen A width: 500mm

Specified RRP inc VAT: £5,271.25

Technical information

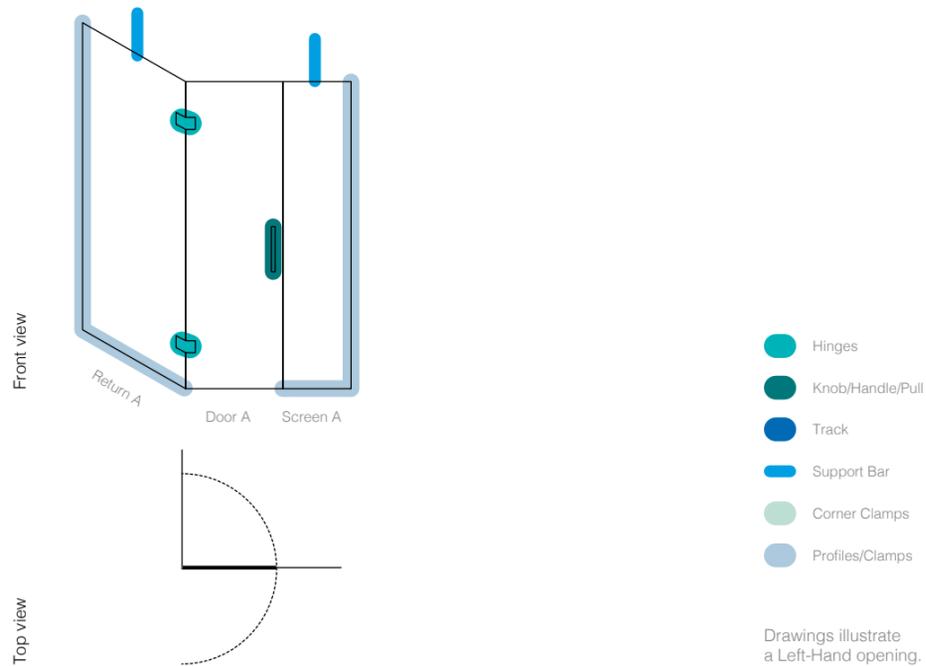

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All doors are supplied with the required seals.

All prices are RRP (inc VAT) and exclude delivery.

1. Choose the size of each panel

Width per panel (up to)	100mm	200mm	300mm	400mm	500mm	600mm	700mm	800mm	900mm	1000mm
Return A	£325	£380	£435	£490	£545	£595	£650	£705	£760	£815

PHEONIX

Example configuration

Glass type: Double Sided Low Iron Satin
 Hardware finish: Brushed Nickel (BN)
 Profile: Profile 1
 Hinges: Hinge 2 GTR
 Knob/handle/pull: Handle 7
 Wall clamps: NA
 Corner clamps: Clamp 7
 Support bar: Support 9

Glass height: 2200mm
 Return A width: 800mm
 Door A width: 700mm
 Screen A width: 400mm
 Return B width: 800mm

Specified RRP inc VAT: £6,660.50

Technical information

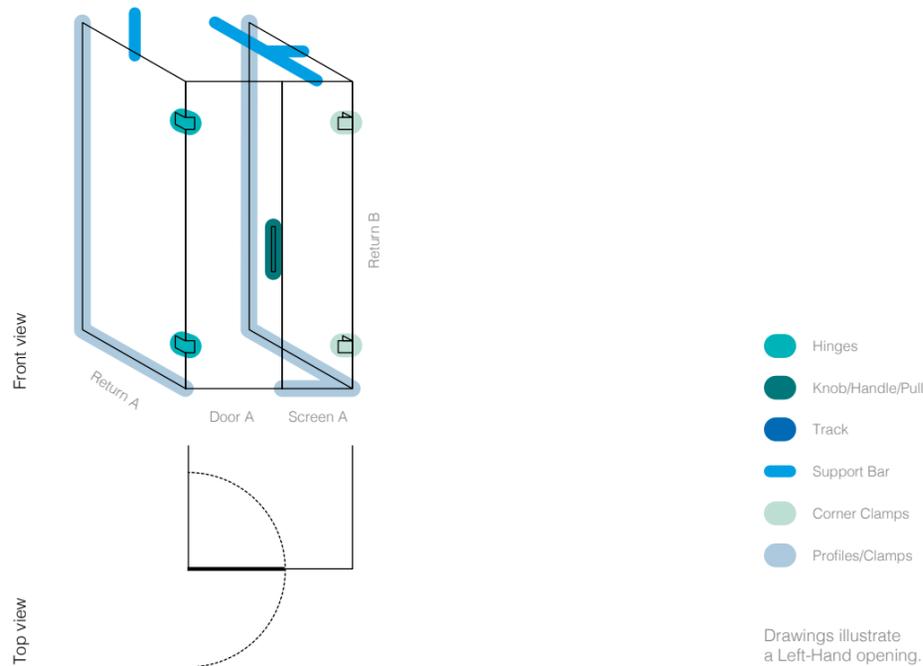

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All doors are supplied with the required seals.

All prices are RRP (inc VAT) and exclude delivery.

1. Choose the size of each panel

Width per panel (up to)	100mm	200mm	300mm	400mm	500mm	600mm	700mm	800mm	900mm	1000mm
Return A	£325	£380	£435	£490	£545	£595	£650	£705	£760	£815

Technical information

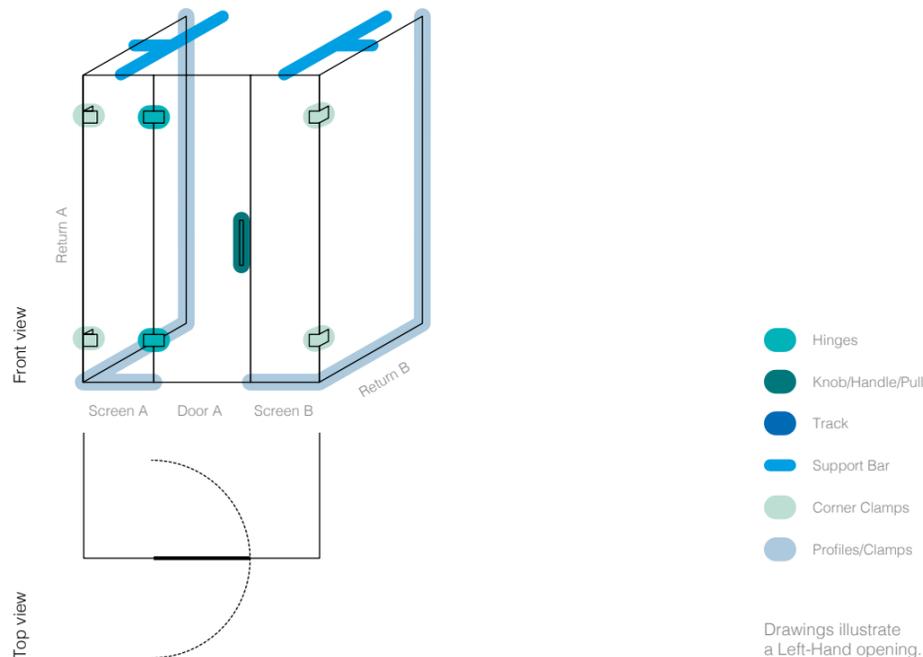

The following costs and information are based on a height of 2200mm. Anything in excess of this will require a price on application.

All screens and returns are supplied with profile 1 to the floor and wall(s) in a chrome finish.

A support bar is required to any screen or return that exceeds 700mm in width and/or hinges a door (a ceiling clamp can be used if the glass finishes 35-45mm from the ceiling).

All doors are supplied with the required seals.

This type requires door A to be equal or larger in width than door B.

All prices are RRP (inc VAT) and exclude delivery.

SLIDING DOORS

We offer 3 sliding door systems

- All styles are available in 3 finishes: Chrome, Brushed Nickel and Matt Black
- All sliding door systems come with 2000mm track as standard
All tracks can be cut down to size to fit smaller spaces
- Track 1 and Track 2 are also available in 3000mm track, POA

Track 1

The Track 1 system combines minimalist design with functionality, great for making the most of tight spaces.

Track 2

The Track 2 system offers a traditional design with a modern look and feel, perfect for a sophisticated, high-end finish in any bathroom.

Track 3

The Track 3 system is designed with safety in mind. Bold and attractive to the eye, it has a hidden soft-brake system providing enhanced sliding action, whilst ensuring maximum safety.

ASTORIA

Example configuration

Glass type: Clear
 Hardware Finish: Chrome (CH)
 Profile: Profile 1
 System: Track 3
 Knob/handle/pull: Handle 2

Glass height: 2200mm
 Screen A width: 900mm
 Door A width: 700mm

Specified RRP inc VAT: £3,360.00

We advise that the door is less than or equal to the width of the fixed screen that it slides behind.

Pull 1, 2 or 3 is recommended in lieu of a handle on all sliding systems.

2. Choose your glass type

Refer to the pull-out back cover to view the price percentage uplift of alternative glass types.

3. Choose your sliding system

Finishes	CH	BN	MBL
● Sliding system			
Track 1	£2,545	£2,755	£2,725
Track 2	£2,720	£2,615	£2,905

Track 1 (Maximum door width: 700mm)

Track 2 (Maximum door width: 700mm)

4. Choose your profile

Finishes	CH	BN	MBL
● Profile	Prism showers are priced with all necessary profiles in chrome. Alternative finishes and/or styles are detailed below alongside any price uplift.		
PROFILE 1	inc	inc	inc
PROFILE 2	£240	£240	
PROFILE 3	£500	£610	£620
● Wall clamps (cost per pair)	Wall profiles can be replaced with a pair of clamps. See options and price uplift below		
CLAMP 1	£200	£240	£235
CLAMP 2	£250	£250	£305
CLAMP 5	£355	£370	£400
CLAMP 6	£435	£435	£350

5. Choose your knob, handle or pull

Finishes	CH	BN	MBL
● Knobs (cost per pair)			
KNOB 1	£100	£100	£100
KNOB 2	£110	£120	£120
KNOB 3	£80	£80	£100
KNOB 4	£130	£190	£160
KNOB 5	£270	£320	£320
● Handles (cost per pair)			
HANDLE 1	£440	£440	£480
HANDLE 2	£250	£250	£280
HANDLE 3	£140	£140	£140
HANDLE 4	£210	£280	£310
HANDLE 5	£150	£150	£170
HANDLE 6	£510	£510	£550
HANDLE 7	£240	£300	£320
● CNC pull (polished hole only) (cost per pair)			
PULL 1 Round	£170		
PULL 1 Oval	£170		
● Finger-pull (cost per pair)			
PULL 2	£250	£230	£260
PULL 3	£250	£230	£190

GLASS OPTIONS

EASY CLEAN COATING

Every glass screen by Prism is coated with Easy Clean on the inside. Prism Easy Clean protection is an anti-microbial spray applied at the end of the manufacturing process, to create an invisible coating that makes the shower screen water repellent to reduce cleaning and maintenance.

The coating minimises the build-up of limescale and other water related build-up, by applying a hydrophobic surface to the glass encouraging water to run straight in to the tray. The result is shower screens that are easy to clean and maintain, looking at their best by simply wiping away excess water after every shower with a soft damp cloth.

- Cuts cleaning time – glass stays cleaner for longer
- Superior protection against limescale
- Repels both water and oil based stains
- Once only application (in accordance with our cleaning and maintenance guidelines)
- Helps reduce the need for chemical cleaners
- Seals etched/satin surfaces

ALTERNATIVE GLASS OPTIONS

If you have a particular shower image/finish in mind that can not be replicated using one of the Prism 8 types of glass, it is likely that Mega Glass will be able to help with its stock holding of over 75 types of glass, most of which is suitable for showers (please email info@megaglass.co.uk to discuss further)

Graduated privacy etching: gradient and finish point can be specified

Laminated glass using either mesh, fabric or digitally printed interlayer

FRAME OPTIONS

For a bold and striking statement

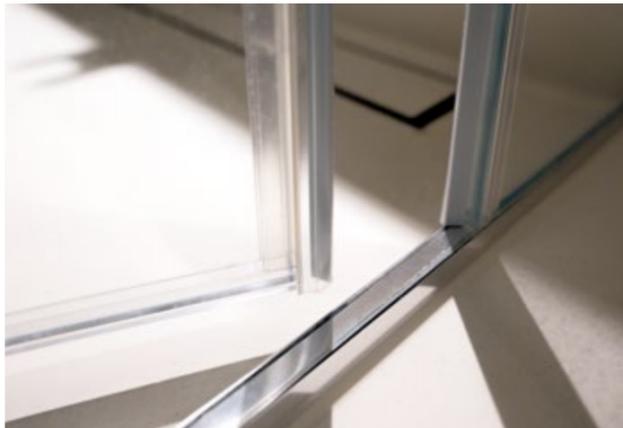

FRAME

Beyond the frameless offerings throughout the brochure, all screen and bath combinations are available with a stylish 20mm frame. Available in four popular finishes, frames offer continued flexibility to match other hardware and ensure design aesthetic is fulfilled from vision to reality. If our framed option is chosen, glass thickness will be reduced to 8mm to accommodate the required hardware.

UNDERFRAME OPTION

Designed with practicality in mind, Prism's underframe option provides a non-intrusive leak-proof barrier beneath the shower door. Our underframe option can be added to all shower screen combinations in four finishes: Chrome, Brushed Nickel, Matt Black and Polished Brass.

CRITTAL STYLE

Prism is delighted to offer a selection of bespoke, shower screens and bath screens in this on trend style, all hand crafted in our UK Factory.

Crittal styles are reminiscent of that of the historical Art Deco and Modernist movements of the early 20th Century. This decorative style is incredibly popular and exudes elegance, whether you are trying to achieve a traditional or contemporary feel to your bathroom.

With its clean lines and sleek, industrial aesthetics, Prism's slim profiles offer a strikingly bold, yet minimalist look, creating a real wow factor, one that will no doubt stand the test of time.

Our slim crittal style profiles are 20mm.

If our crittal style option is chosen, glass thickness will be reduced to 8mm to accommodate the required hardware.

ASSOCIATED COSTS

Underframe and crittal style costs

Part	Finishes			
	CH	BN	MBL	BR
Underframe	£55	£75	£80	£125
Frame Cost per panel	£255	£240	£250	£280
Crittal style bars Cost per panel	NA	NA	£140	NA

If our framed option is chosen, glass thickness will be reduced to 8mm to accommodate the required hardware

If crittal style bars are chosen, add the cost of the bars and frame together

OTHER PRODUCTS

Why not complete the look with the following bespoke products, available from our UK factory.

CLADDING

Our glass cladding is a great design option to replace more traditional tiles or stone, creating a fresh contemporary space that compliments glass screens. Sheets of glass are cut to bespoke shapes and sizes and fixed to walls to create large panel surrounds for shower spaces, eliminating discolouration of conventional grout lines. Glass wall cladding is quick to measure and easy to install. Limescale, cleaning and maintenance are all reduced when protected with Prism Easy Clean Coating. Cladding offers versatility in finish, from any backpainted colour to digitally printed image, on either satin or gloss.

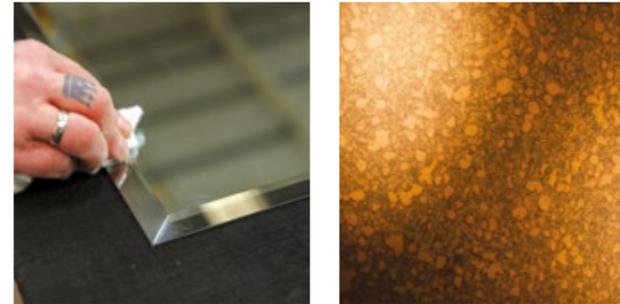

SCRATCH RESISTANT GLASS

Manufactured using optically clear low iron glass, our scratch resistant product is non-porous and provides a fantastic alternative for worktops and vanities. Not only do they look stunning, but they are also extremely strong (MOHs 6 comparable to granite), hard wearing and hygienic. The versatility of the scratch resistant coating combined with a wide range of colour and printed options make them suitable for high-use, functional areas both commercially and domestically.

MIRRORS/ANTIQUE MIRRORS

A fully comprehensive range of mirrors are held in stock at our factory: Silver, Low Iron, Bronze, Grey, Green, Classic Gold & Rose Gold. The Mega Glass Colour Reflect range offers colour options to suit any taste – you choose the colour, we reflect it on glass. In addition to our contemporary finishes, we offer a range of antique mirrors in colour tones of silver, gold, grey and bronze. All mirrors can be backed with demister pads, either 12v/24v or 230v.

BESPOKE LED MIRRORS

Our LED back-lit mirrors offer flexibility in design and are customisable to any shape and size. Electrics are wired in to either a light switch or smart home management system, whilst luminosity can be tailored to either a warm or cold light.

GLASS RADIATORS

For a cutting-edge aesthetic, our glass fronted radiators can be plumbed in or converted to electric power. Four standard sizes are available, we can also produce to a wider range on request. The glass fronts are fully customisable by back-painting in any colour or printed with an image. Alternatively, choose any of our mirror finishes to add practicality and style to any size space. Towel bars are available for additional functionality.

FRAMED MIRRORS

Custom made to meet design intent, we produce a range of fully customisable framed mirrors available with or without LEDs. With options available to suit square, circular and shaped mirrors, our frames can be colour coated to blend with the area seamlessly and apply the perfect finishing touch.

PRISM SHOWER SYSTEMS GUARANTEE

All shower screens manufactured by Prism are guaranteed for 10 years from the date of the purchase against manufacturing defects for all glass and components, with the exception of plastic/rubber seals and gaskets.

This guarantee is only valid within the UK and is available to the original purchaser only. This guarantee is non-transferable.

If after inspection the glass and/or components are deemed to be defective, Prism will, at our discretion, either repair or replace any part of the item originally purchased. This shall constitute our sole obligation covered by the guarantee.

The responsibility for disconnecting, removing, reconnecting and reinstalling any services, in the immediate area of installation and/or any costs incurred by so-doing, lies exclusively with the customer.

Under no circumstances will Prism be liable for:

Any item that has been modified

Any item that has been subjected to accidental damage, normal wear and tear, willful neglect or that has failed as a result of incorrect maintenance installation (by others)

Any compensation payments for the loss of use of the product or any consequential loss of any kind or any other associated cost

Water escaping from the shower. No shower is an aquarium so we cannot guarantee that the glass screens will create a watertight seal. However, a properly designed shower with the right seals will prevent most water from 'leaking out' so long as:

1. The water is directed down towards the gully and not directly at the glass or hinges
2. The gully is suitable for the shower pressure
3. The gully is kept clear of waste build-up

Appropriate care must be taken when cleaning glass (including glass that has been treated with Prism Easy Clean coating) as the use of abrasive cleaner may damage the specialist surface protection.

This guarantee is in addition to and does not affect your statutory rights.

Please refer to our T&C's which are available upon request.

SUSTAINABILITY

At Prism, 95% of our glass waste is recycled through SGGUK, resulting in a reduction of 3.75 tonnes of CO₂ going into the atmosphere and prevention of 12.5 tonnes of cullet going to landfill every month. Working with Saint Gobain, Mega Glass is contributing toward Saint Gobain's goals of using 50% cullet in their manufacture of glass by 2025 and having net zero carbon emissions by 2050.

25% of the Prism fleet of delivery vehicles are fully electric and the intention is for this to be a minimum of 50% by the end of 2023.

All our glass is purchased through reputable manufacturers and comes with ISO 14001 Environmental management certification and/or Environmental Product Declaration and/or cradle-to-grave certification.

We deliver over 60% of glass manufactured using our in-house fleet of vans. Our fleet is fully FORs accredited so ensuring efficiency of fuel consumption, lack of engine idling, driving at optimum speed for fuel efficiency etc are part of our modus operandi.

We proactively promote environmentally responsible purchasing where possible.

ACCREDITATIONS

Mega Glass/Prism is ISO 9001 accredited and working towards ISO 14001.

Mega Glass/Prism is accredited by CEN to produce toughened glass in compliance with BSEN 12150. CEN mark number 3394T.

All Prism products are manufactured in the UK at the production facility of Mega Glass Ltd. Prism shower spaces feature 10mm (except reeded which is 8mm) toughened safety glass tested to BS EN 12150 (CEN mark number 3394T) and have been treated with Prism Easy Clean coating.

All Prism Systems

- Are manufactured in the UK at the Mega Glass Ltd factory
- Are manufactured using 8mm and 10mm toughened safety glass (in conformity with BS EN 12150)
- Are manufactured with our Prism Easy Clean protective coating applied
- Should be installed to well ventilated areas to minimise the build up of steam to help reduce the build up of mineral deposits and limescale. Where there is a build up of steam, glass should be cleaned in accordance with our cleaning and maintenance information
- Are subject to variation to the visuals in this brochure. Depictions are indicative only and may physically appear differently. It is advisable to request a sample of the finish prior to placing an order
- Are subject to colour variation between batches of glass ordered at different times
- Are supplied with some hardware that requires the end user to cut down on site. Where hardware is cut to size on site the raw colour of the metal will be visible on the edge:
 - o Seals
 - o Profiles
 - o Stabilising bars
 - o Sliding door tracks
- Are subject to rules that can, in cases, determine hardware required:
 - o A support bar is required to any screen or return that exceeds 700mm width and/or hinges a door
 - o A ceiling clamp can be used if the glass finishes 35-45mm from the ceiling
 - o All ceiling clamps and support bars should be installed 100mm from the edge furthest from the wall or closest to the door
- Will, where a satin or textured glass type is selected, always be manufacture with the textured and satin faces as the outside face of the glass unless otherwise requested and confirmed in writing
- Will have all hinge cut-outs positioned 300mm from the top and 300mm from the bottom (to centre of cut outs) unless otherwise requested and confirmed in writing
- Will have all handles, knobs and pulls positioned 1000mm from the bottom of the glass and 100mm from the edge of the glass (to the centre of the handles, knobs and pulls) unless otherwise requested and confirmed in writing. Where a horizontal door handle is selected, the handle will be centred across the width of the glass, unless otherwise requested and confirmed in writing
- Will have all clamps positioned to run in line with hinges unless otherwise requested and confirmed in writing
- Are manufactured in accordance with Prism's standard terms & conditions and tolerances (available on request)

Water Retention

- When installed correctly, water egress will be minimal. Some level of water egress is to be expected with all frameless shower systems, particularly at points whereby seals meet as well as where hinges are positioned. To minimise water egress:
 - o Ensure seals are installed firmly and correctly at all times
 - o Ensure the shower head is not directed at the screen itself, or the hardware. Areas with only a fixed screen may allow water spray to pass beyond the glass. This depends largely on the position and power of the shower head
 - o Consider using our Underframe option (at the point of order i.e. cannot be added once the order has been placed)
 - o We advise suitable water proofing to be installed outside of the shower area to best mitigate moisture damage occurring should any water escape

Shower Screens

- We recommend that seals do not run in line with the shower head(s) i.e. water should not fall in line with the seal
- Are approved for use with power showers, where installed correctly

Bath Screens

- Are not designed to fit baths with steeped fronts, integral soap dishes, headrests, roll top designs or those with handles sitting above the top of the bath. If they are installed in this setting, this may affect the performance of the screen
- Designs with a door are to be opened outward from the bath. Inward opening bath screens need appropriate space to move. Care must be given to position the taps in the bath, to ensure that sufficient space is left to fold the screen flat
- Are most suitable for use with standard pressure showers. They are not recommended for use with power showers
- We recommend that seals are not positioned in line with the shower head(s) i.e. water should not fall in line with the seal

Hardware

- Finishes in this brochure are indicative only and may physically appear differently. All hardware is displayed by colour shown in the catalogue as accurately as possible within the limits of the printing process. It is advisable to request a sample of the finish prior to placing an order
- Colour variation can occur between hardware due to their difference in base metals
- Where a finish is described, it does not imply the use of precious or valuable materials. All materials are described by colour shown in the catalogue, as accurately as possible within the limits of the printing process. Please ask to see our component finishes and glass in person
- We follow a policy of continuous improvement and product design. Therefore, we reserve the right to change product information and prices without notice

When measuring for a Prism shower system

- Ensure the floors and walls are tiled and the shower tray is installed. Any dimensions received by Prism assume that the area is in a finished state. It is the sole responsibility of the purchaser for ensuring suitability of the substrate
- Overall opening dimensions should be supplied to Prism in writing:
 - o Prism will make the necessary deduction to manufacture from
 - o It is presumed all measurements are taken from outside the shower area looking in unless otherwise stated and confirmed in writing

When installing a Prism shower system

- Take care to ensure installation is carried out properly and safely. Installation instructions are available on request
- Ensure that the area is suitable and prepared for the installation. The base should be level across the whole length. All walls should be level and plumb and suitable for installation:
 - o Be aware that 10mm glass weighs 25kg/m² and 8mm glass weighs 20kg/m². Hinges, profiles and support bars must be safely installed to appropriate surfaces. This is particularly important where a door will be hinged from a wall
 - o It is the installers responsibility to ensure that there is a minimum of an 18mm ply substrate (or equivalent) when fixing hinges, profiles, clamps and support bars
 - o When installing to stud walls, timber supports (pattresses) should be located behind the fixing points. These should be fitted where the hinges, profiles, clamps or support bars are fixed directly to the wall. The exact placement will be governed by the overall height of the shower system. All stud walls must be structurally sound and movement free
- Consideration should be given to potential deferred damage to items beneath a tile when profiles are being fitted to walls and floors:
 - o When fixing through a tile, it is essential that there is a full bed of adhesive between the tile and the substrate. Without this the tile is likely to crack as the fixing point is drilled through the tile to grab the timber behind
- Consideration should be given to how other bathroom items are to be installed in the same area (towel rails, radiators, basins, extractor fans, WC etc..) which could impact on the future operation of your shower. Particular attention must be given to ensure that the door swing does not clash with any ironmongery
- It is recommended that the slope or fall is always planned to run directly away from the shower door. Any flat area by the door will reduce the efficiency of the seals and can cause the shower system to leak
- Care must be taken when choosing wall finishes. Where a shower door closes directly to the wall, it will close to a translucent seal. All shower systems are supplied with a seal to be applied to both vertical edges, as well as long the bottom edge, including a soft bubble seal that will compress against the wall (where necessary):
 - o Gaps between the tiles for grout may act as a path, through which water can escape, as can the breaks in the seal for hinges. Prism will not be held responsible for leakages as described

Cleaning & Maintenance

- Gloss face glass:
 - o Glass to be wiped with a clean, lint-free cloth to remove excess dust
 - o Glass cleaner (can be purchased via Prism) to be applied across the whole face of the glass
 - o Using a new lint-free cloth, wipe in circular motions being careful not to apply excessive pressure
 - o The more uniform the wet surface, the lower the chances of stains and/or dirt remaining
 - o Using a new lint-free cloth, wipe in circular motions until dry
 - o Should any stains and/or dirt remain, repeat the glass cleaning process
 - o If stains and/or dirt are still present, please contact Prism
 - o Never use cleaning agents that are highly acidic or alkaline. These abrade the glass surface
 - o Never use cleaning agents containing hydrofluoric acid, fluorine, chlorine or ammonia. These can damage the decorative coating and/or surface of the glass
- Satin and/or sandblasted face glass
 - o Glass to be wiped with a clean, lint-free cloth to remove excess dust
 - o Elbow Grease to be applied across the whole face of the glass (can be purchased at all major supermarkets):
 - Using a new lint-free cloth, wipe in circular motions being careful not to apply excessive pressure
 - Glass must be cleaned uniformly over the whole surface
 - Using a new lint-free cloth, wipe in circular motions until dry
 - o Never use abrasive cleaners or strong alkalis on the satin/sandblasted surface
 - o Never use razor blades, wire wool or similar
 - o Damage of satin/sandblasted surface from silicone or similar materials are usually irreversible
 - o Satin/sandblasted surfaces should always be wet cleaned on the entire surface; never perform spot cleaning
