

YOUR DREAM HOME STARTS HERE...

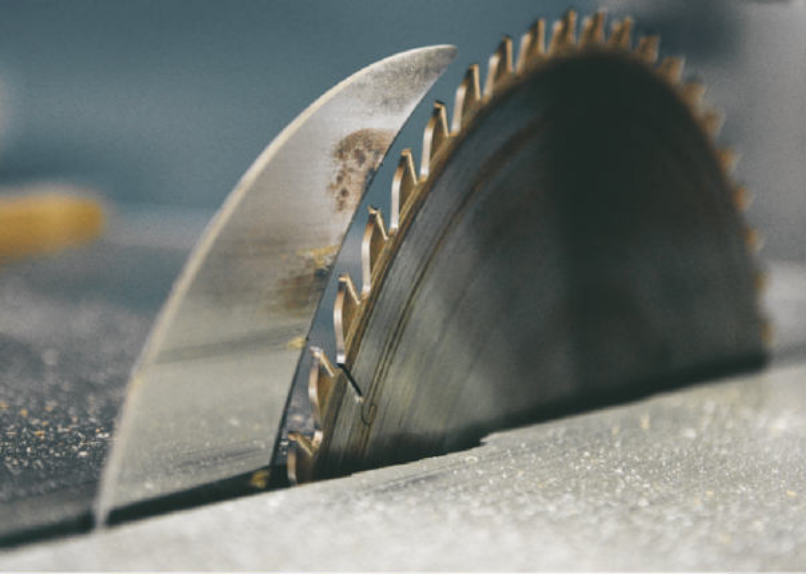

A WOODEN FLOOR IS A VISIBLE QUALITY IN YOUR HOME.

At Wood Connexions, we understand that each project has its own story to tell. Good interior design is more than just appearance, which is why in our company, floors are a combination of the beauty of natural wood with top-class craftsmanship. Various colours, textures and warmth of precisely arranged and perfectly matched boards create interiors that give a sense of harmony and comfort, where we feel cozy and safe.

## OUR STORY

Wood Connexions is an internationally renowned, high-end flooring distributor – mostly known for specialising in sourcing and trading European Oak.

The superior quality of the product also enables installation to be carried out more efficiently, saving our customers time and money.

The popularity of our excellent product range allows buyers the opportunity to buy flooring that will suit each individual taste.

We strongly believe that our customers only deserve the best timber when it comes to choosing a natural wood floor and we take extreme pride in securing and maintaining excellent working relationship with all our customers.

At Wood Connexions, we are confident that wherever you choose to lay our flooring, it will certainly add an element of luxury to your home.

After many years working in the industry we are extremely proud to continuously develop and provide the highest standards across our entire product range.

## OUR VALUES:

we honor tradition and passion, we build loyal, long-term relationships with all our clients,

we employ qualified employees and provide them with continuous development,

we invest in state-of-the-art equipment that ensures efficiency and precision and guarantees the best product for our customers,

we appreciate each customer's opinion and make appropriate changes,

we are guided by the principle of sustainable development,

we work in accordance with the ZERO WASTE philosophy.

## CHARACTER

- Character class with natural discoloration.
- Boards of very diverse colour, wood structure and varied grain.
- Permissible whiteness up to 15%.
- Sound knots to size acceptable 70 – 80 mm.
- Black knots and knot holes up to 30 mm are allowed.
- All knots covered with the filler.
- Permissible edge cracks up to 10 cm.

## PRIME

- Boards with various wood grains and structures.
- The purest class with the least possible discoloration.
- Occasional single healthy pin knots up to max 10 mm are permitted.
- Sapwood and natural cracks are unacceptable.

COLLECTION OF OILED FLOORS

AN EXCLUSIVE COLLECTION OF LACQUER WOOD FLOORS

HAREWOOD

A vertical wood grain sample with a medium brown tone and a straight, slightly wavy grain pattern. There are several small, dark knots scattered throughout the wood.

WINDSOR

A vertical wood grain sample with a dark brown, almost black, color. The grain is very tight and wavy, with a prominent, dark, vertical crack or inclusion running through the center.

MONTACUTE

A vertical wood grain sample with a dark, charcoal-colored finish. The grain is wavy and textured, with a large, dark knot or inclusion near the bottom center.

EATON

A vertical wood grain sample with a medium brown tone. The grain is straight and wavy, with a large, dark, irregular knot or inclusion near the top center.

CHATSWORTH

A vertical wood grain sample with a medium brown tone. The grain is wavy and textured, with a large, dark, irregular knot or inclusion near the top right.

DOWNTON

A solid black vertical bar with no visible wood grain or texture.

# CONSTRUCTION

Floors made of oak wood provide exceptional resistance to deformation and cracking.

The layered structure increases durability and resistance to changing conditions and is an ideal solution for underfloor heating.

THICKNESS 15MM  
3.5 MM OAK LAYER

THICKNESS 20MM  
5.5 MM OAK LAYER

THERMAL RESISTANCE COEFFICIENT

FOR A 15 MM BOARD = 0.085 M<sup>2</sup>\*K/W FOR A 20 MM BOARD = 0.114 M<sup>2</sup>\*K/W

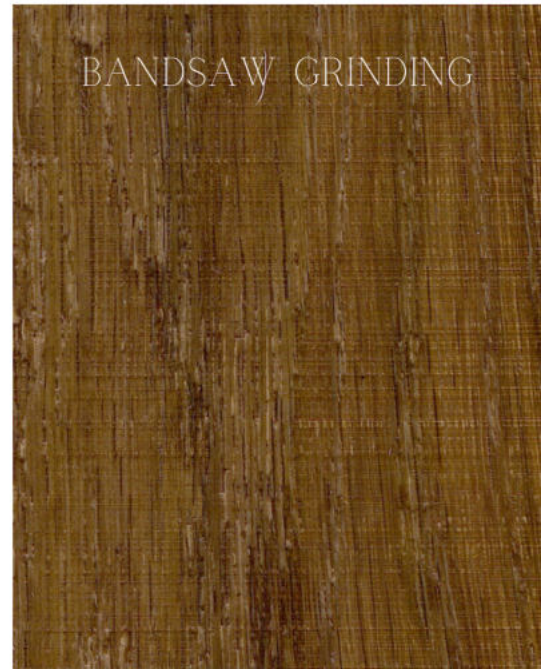

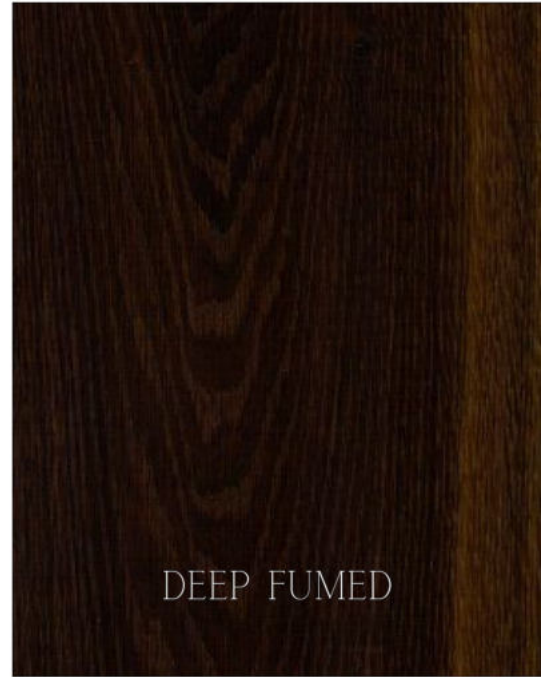

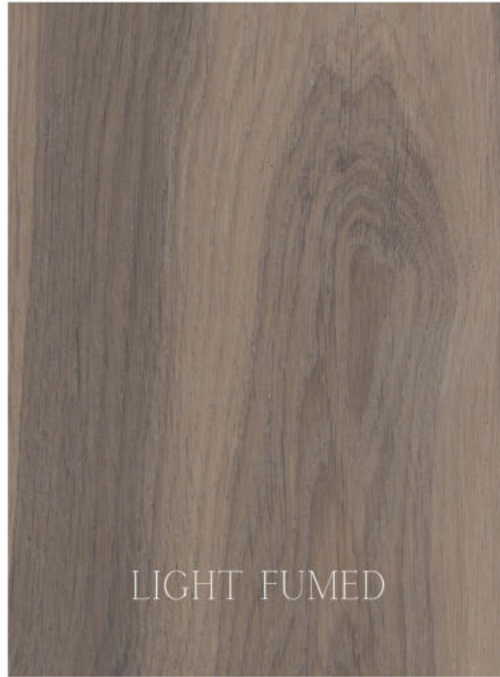

# SURFACE FINISHING

A well-chosen floor can completely change the mood of an interior.

Here is our guide to choosing Your exquisite flooring.

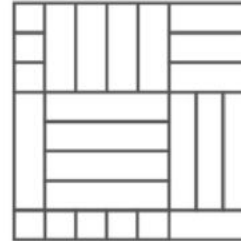

# PATTERNS

WE GIVE YOU MANY OPTIONS...

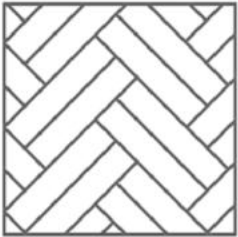

Classic herringbone

thickness 15, 20 mm width 100 mm, 130 mm length 500, 650 mm

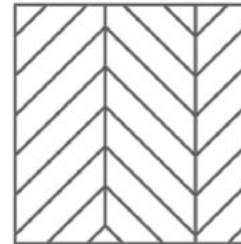

Basket pattern

thickness 15, 20 mm width 100 mm length 500 mm

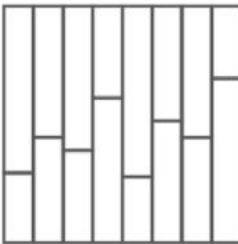

Double herringbone

thickness 15, 20 mm width 100, 130 mm length 500, 650 mm

Chevron

thickness 15 mm width 100 mm length 500 mm

Boards

thickness 15, 20 mm width 180 mm, 220 mm, 260 mm, 300 mm length 600-3000 mm

A wooden floor is a visible quality in your home. ZENON flooring, not only will last for generations, but will also create the atmosphere of timeless interiors. Regardless of how many times you change the sofa, accessories or interior style, it will always look good with an oak floor.

# FINISHING

## LACQUERED WOOD FLOORS

### Finish:

Lacquer is meticulously layered onto the timber's surface to create a protective film, serving as a highly effective shield against general wear, water, spills, and stains.

### Appearance:

Lacquered floors offer a range of sheen levels, from glossy to matte, providing a natural aesthetic. Sanded timber can achieve an exceptionally smooth, natural finish, while textured and stained surfaces can also be coated and enhanced.

### Cleaning:

Regular sweeping and vacuuming with a parquet setting help eliminate abrasive dust and surface dirt. Promptly wipe up food and drink spills. Weekly or less frequent wet cleaning, using a pH-neutral wood floor soap and a spray mop or well-wrung mop and bucket, is recommended.

### Scratches & Repairs:

The robust lacquer coats typically prevent most scratches from reaching the bare wood, preserving durability. Minor scratches can be filled in and smoothed with a refresher or polish. For spot repairs, it's advisable to consult floor finishing professionals experienced in sanding and lacquer application.

### Maintenance:

Lacquered floors can undergo sanding and resealing or complete resurfacing. Lightly sanding the existing lacquer (keying) allows for the application of new coats. If floors are fully bonded to the subfloor, a more even sanding ensures minimal surface removal, facilitating multiple resurfacing opportunities.

## OILED WOOD FLOORS

### Finish:

The timber surface is enriched as oil is gently massaged into the wood grain, saturating it thoroughly. Once cured, the oil undergoes a hardening process, creating a natural barrier that effectively guards against general wear, water, spills, and staining.

### Appearance:

Wood floors treated with oil boast a naturally matte appearance, featuring a tactile surface that can be buffed to achieve a subtle sheen. Pure oil introduces a warm, rich luster to the wood grain, and the addition of pigments offers the possibility of creating a diverse range of colours and effects.

### Cleaning:

Regular sweeping and vacuuming with a parquet setting help eliminate abrasive dust and surface dirt. Swiftly address food and drink spills. Weekly or less frequent wet cleaning is recommended, using a pH-neutral oiled wood floor soap with a spray mop or a well-wrung mop and bucket.

### Scratches & Repairs:

Minor scratches seamlessly blend into the grain texture, having minimal impact on the floor's durability, as the oil continues to permeate the timber surface. Damaged or repaired areas can be revitalized by buffing oil into them, seamlessly sealing and blending into the surrounding floor. Water marks, dark tannin stains, and grease spots can often be addressed with stain-removing products.

### Maintenance:

To rejuvenate oiled floors, an intensive clean followed by the application of maintenance oil is recommended. While this process doesn't eliminate surface damage, it effectively renews the floor's durability and performance. Periodic oil maintenance should be carried out at regular intervals, depending on usage; for detailed advice, please visit our website.

## WHY CHOOSE US

We believe in continuously developing and maintaining the highest standards throughout our product range. We are committed to delivering customer satisfaction through your experience with us. We value every client's feedback.

- We only use European Oak Flooring.
- We will never compromise on quality.
- Our engineered flooring is suitable for underfloor heating.
- Our exciting colour range can transform your home.
- Tongue and groove is used in high quality wood flooring and ensures that the floor is fitted correctly, creating a more stable and level floor which is easier to install.

RESPONSIBLE PRODUCTION HAS MADE US ONE OF  
THE BEST IN THE WOOD INDUSTRY.
