

# Mastercharge Invisible® LR

## Complete Charging Convenience.

Mastercharge is a forward thinking innovative electronics company, driven to change the way we recharge for a greener planet. We are synonymous with Invisible® hygienic charging solutions for the smart home and commercial sector.

Our invisible wireless charger is the most powerful induction charger on the market offering an outstanding charge distance of up to 30mm, which makes it incredibly easy to retrofit and install yourself. The package includes all fixtures and fittings required and you can even choose your own custom countertop vinyl to suit your environment or brand.

# Mastercharge Invisible<sup>®</sup> LR

**Capable of delivering a superb 10W fast charge through stone, wood, glass and many other materials excluding metal.**

Mastercharge Invisible<sup>®</sup> has been designed to be installed to the underside of furniture, worktops or any other desired location. Delivering a reliable, safe 10W fast charge, the Invisible<sup>®</sup> LR opens the gate to truly hidden charging that lets design come first.

Additionally, the non-intrusive design is the most hygienic wireless charging solution for businesses on the market as there are no lips or holes that will allow bacteria to build up - it's very easy to wipe down.

## MasterMap Approved Installer Network ✓

With fixtures shipped in the box, the LR is easy to install with current trends for thinner worktops, however fabrication can often be required for thicker substrates that exceed the LR's charge distance. Having worked with fabricators, installers, joinery companies, shop fitters and many other trades, we have developed our approved installer network - our **MasterMap**.

# Mastercharge Invisible® LR

## Thoroughly tested to be compatible with leading worktop brands.

The surface material choice in today's market is huge with ever-changing trends. We have partnered with the world's leading surface brands to ensure performance of all Qi enabled devices, from the latest model mobile devices, bluetooth speakers, headphones and more.

Use our quick search compatibility tool below.

### Quick Search

Mastercharge are relentlessly testing all wireless charging devices on the market: mobile phones, bluetooth speakers, headphones, shavers, remotes, toothbrushes and even trainers. Use the search bar below to check to see if your device supports wireless charging.

## Future-proofing businesses with a new standard of convenience.

Mastercharge has been entrusted in the specification and design of commercial furnishings, with our hidden wireless charger, by world leading brands in interior space design and cutting-edge joinery companies. Working with our specification team to integrate our award-winning solutions can bring a charging solution to the table like no other.

The future of possibilities that comes with Mastercharge Invisible is setting a new standard of convenience in the commercial sector that serves both businesses and customers.

## Smart charging for the smart home.

As more home-owners look to upgrade their home, Mastercharge Invisible® is the last piece in the puzzle to a fully charged, convenient smart-home that's ready for the future. Living in an ever-increasing landscape of devices that support Qi wireless charging, a seamless charging solution allows home-owners, designers and craftsmen to achieve unparalleled modern spaces.

Retain the beauty of your work surfaces, remove the need for pop sockets or fully ported penetrations, hide the technology below and bring your surface alive and ready to charge.

## Get immediate answers.

We love talking to clients about new projects and offering our expert knowledge, however we understand sometimes you need information immediately. That's why we have a brand new **Enquiry Page** where, in just a few clicks, you can see our recommendations based on your project info. Try it now and let it be your first step towards a greener, cable-free future.
