Basaltina Srl is an Italian company, founded in 1925 by Giuseppe Tecchi.

Our quarry, located in Bagnoregio in the heart of Italy, is one of the country's most significant sources of **natural stone**. From this site, we extract and process a unique lava stone, used since Roman times, now recognized and distributed worldwide under the registered trademark Basaltina®.

At the core of our success are our people: a team of over 70 dedicated professionals who, in full compliance with environmental regulations, work every day to elevate this exceptional material and bring it to global markets. Basaltina® represents **Italian excellence**, where passion, know-how, and care come together in every detail. Our stone is renowned for its natural color, aesthetic, and versatile applications that make it both simple and sophisticated.

Its qualities have earned the trust of internationally acclaimed architects and designers who have chosen Basaltina® for landmark projects including *Aurora Place Apartments* by **Renzo Piano**, *Winspear Opera House* by **Norman Foster**, *Morgan Stanley headquarters* by **Gensler**, *Sagrada Familia*, Samsung's three skyscrapers in Seoul, *Celine* and *Dolce & Gabbana* flagship stores worldwide.

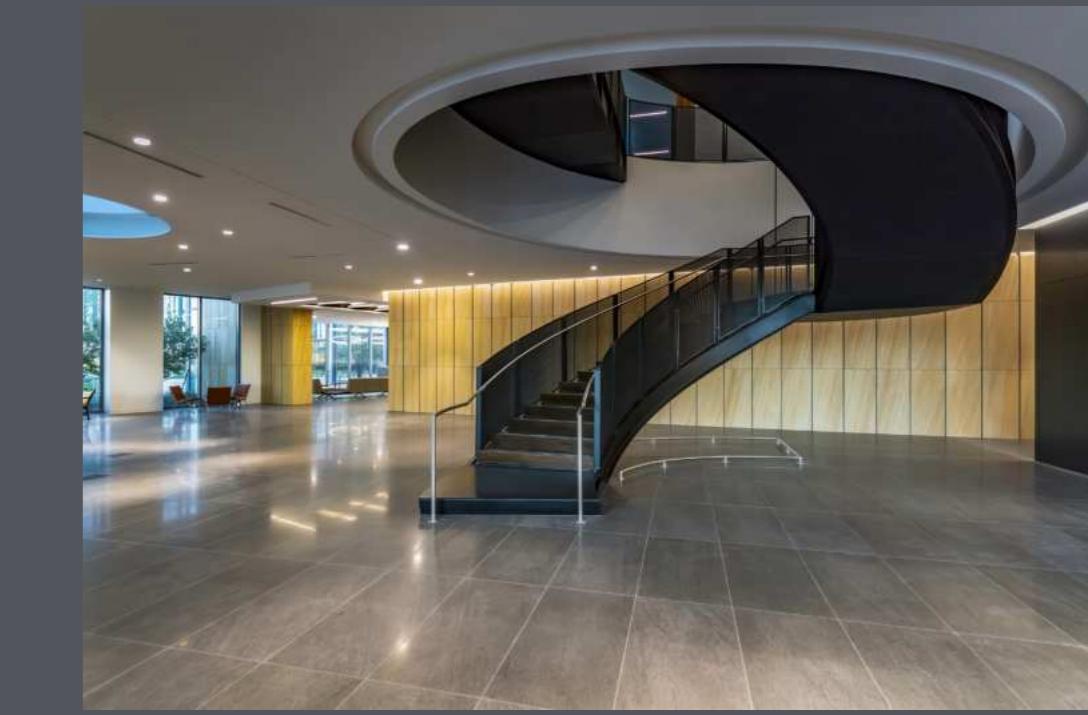

The stone comes in two texture variants: **Classico** and **Selcino**. Basaltina® Classico is characterized by its horizontal stratification, this variant is the embodiment of timeless elegance. Basaltina® Selcino is defined by its natural, random porosity and it expresses the minimalism of contemporary design.

DOLCE & GABBANA • WORLDWIDE

Both varieties are sold in **slab** and **cut-to-size tiles**, processed in various sizes and finishes. Basaltina®, perfect for both indoor and outdoor use, enhances and enriches any surface, making it truly unique. Basaltina Srl has earned national and international certifications attesting the stone's outstanding physical and mechanical properties, including resistance to extreme temperatures, compression, and abrasion.

Its exceptional versatility makes it suitable for a wide range of applications, such as flooring, wall cladding, countertops, and custom works. Thanks to its refined grey tone, Basaltina® pairs effortlessly with other materials, adding sophistication to any architectural or design project.
