MEGA GLASS

MIRRORS - ANNEALED

MIRROR, MIRROR ON THE WALL...

...Or anywhere else for that matter. A product recognised by all, the mirror has been widely used as a product on glass for over 150 years. With technological evolution, mirrors have developed into something more than just reflection – serving function with aesthetic, Mega Glass holds a large and diverse range that covers a host of designs and applications in both the commercial and domestic sectors.

Details:

With options incorporating over 11 finishes, our market leading mirror range will satisfy an array of designs, functions and aesthetics. From a single mirror affixed on the bathroom wall to a laminated mirror integrating a complex design within a lift car, Mega Glass is committed to ensuring that we are prepared to manufacture to your exact requirements.

Key Applications:

Gyms & Leisure Centres, Splashbacks, Interior and Exterior Wall Cladding, Lift Lobbies, Bathrooms, Wall Tiles, IPS Panels

Specification:

- Versatile in processing capabilities
- Can be certified to 1B1 impact rating under BSEN 12600 when bonded to MDF (15mm or thicker) or plasterboard (12mm or thicker)
- Can be certified to 2B2 impact rating under BSEN 12600 in any application
- Oversized availability in some variants
- No adhesive show through
- Design implementation possibilities via sandblasting & brilliant cutting
- Suitable for backlighting
- Infinity options
- Demister pads supplied to suit 230v and low voltage applications
- Supplied on annealed glass

MEGA GLASS

ANTIQUE MIRRORS - ANNEALED

HERITAGE FINISHES FOR BESPOKE INTERIORS

A finish defined by character, antique mirrors bring depth, texture and individuality to glass. Inspired by the natural ageing of traditional mirrors, this range moves beyond standard reflection – offering a decorative surface that enhances both function and aesthetic. Mega Glass presents a curated collection of antique mirror finishes, suitable for a wide range of applications across both commercial and residential environments.

Details:

With 14 finishes available, our annealed antique mirror range caters to a variety of design requirements, from subtle tonal variation to bold feature applications. Whether used as a single decorative panel or integrated into larger bespoke installations, Mega Glass is committed to delivering solutions that meet the specific aesthetic and technical demands of each project.

Key Applications:

Splashbacks, Wall Cladding, Hospitality Interiors, Retail Displays, Feature Walls

MEGA GLASS

COLOUR REFLECT – TOUGHENABLE

YOUR COLOUR – OUR REFLECTION

Combining the reflective qualities of conventional mirrored glass with the infinite range afforded by the backpainted process, Mega Glass' innovation brings toughenable mirrors to a new dimension. Fabricated in one of our three state-of-the-art dedicated spray booths, MG Colour Reflect presents toughenable mirrored options with endless possibilities through multiple colour libraries to suit a range of aesthetics in any interior or exterior setting.

Details:

A truly unique application, our pioneering approach enables us to listen to what the market needs and transform mirrored visions of all kinds to reality. The interior and architectural market has been calling out for a solution to extend the conventional range of tinted mirrors 'beyond the norm' and we have reacted. Produced in 6mm thickness, MG Colour Reflect is lightweight and delivers toughenable mirrors to the market that are cost competitive, high quality in finish and manufactured within standard backpainted lead times. You choose the colour, we reflect it on glass!.

Key Applications:

Splashbacks, Interior & Exterior Wall Cladding, Lift Lobbies, Write on Boards

Specification:

- 6mm thickness
- Available in gloss and matt finishes
- Compatible with most production processes
- No adhesive show through (must be low modulus, neutral curing and solvent free)
- Corrosion free (must be fully sealed)
- Coating(s) with hydrophobic and oleophobic properties can be applied to allow water run-off and simplify the cleaning process
- Colour Reflects' bespoke manufacturing process allows for faster lead times, higher quality and more cost effective toughened mirrors than the industry standard
- This is a totally unique product to Mega Glass
- Mega Glass is in possession of spectrometer colour matching technology, enabling us to push the boundaries in matching other colour libraries, physical glass samples and material swatches.

Why Choose MG Colour Reflect Toughened Mirrors?

MEGA GLASS

Rev 001 | September 2026

MG Colour Reflect Toughened Mirrors undergo a unique manufacturing process that enhances both durability and visual clarity. Our Colour Reflect range offers fast lead times, ensuring that you receive high-quality mirrors on time, every time. Available in various colours, including bespoke colour matches and a wide library of colour references, MG Colour Reflect Toughened Mirrors offer consistent quality of finish, all while being cost-competitive against other options in the market.

VS

Colour Reflect Toughened Mirror		Standard Mirror
Shatter-resistant and withstands impact	Durability	Susceptible to cracking and breaking under impact
If broken, shatters into small, semi round pieces reducing chance of injury	Safety	Breaks into large, sharp, dangerous shards
Toughened and can withstand higher temperatures	Heat Resistance	Sensitive to thermal shock
Suitable for high-traffic areas, public buildings, gyms, and safety conscious environments	Application	More suited to washrooms, residential and low-risk environments
Long-term cost-effective due to durability	Cost Efficiency	Cheaper upfront but can require frequent replacements
Available in a wide range of colours, including bespoke colour matches and colour library references	Finish	Limited to traditional tones with no bespoke colour options

MEGA GLASS

ANTIQUE MIRRORS - TOUGHENABLE

TIMELESS CHARACTER – MODERN PERFORMANCE

Our Toughenable Antique Mirrors are individually distressed, ensuring every panel is truly one of a kind. The timeless character of aged glass is combined with modern durability, delivering a unique surface that retains its artisan charm without compromise. This handcrafted approach makes the range ideal for statement interiors across hospitality, retail, and residential environments.

Details:

Our Toughenable Antique Mirror range offers a selection of carefully developed finishes, each designed to bring depth and character to interior spaces. Combining traditional distressed aesthetics with modern manufacturing capabilities, the range can be adapted to suit a variety of applications, from feature panels to fully integrated design schemes. Mega Glass is committed to working closely with clients to deliver bespoke solutions that meet both aesthetic and technical requirements.

Key Applications:

Splashbacks, Wall Cladding, Hospitality Interiors, Retail Displays, Feature Walls

Specification:

- Any thickness (usually 6mm)
- Can be toughened to BSEN 12150
- Compatible with most production processes
- No adhesive show through (must be low modulus, neutral curing and solvent free)
- Corrosion free (must be fully sealed)
- Coating(s) with hydrophobic and oleophobic properties can be applied to allow water run-off and simplify the cleaning process
- Individually distressed finish – no two panels are identical

MEGA GLASS

SPECIALIST MIRRORS

INNOVATIVE AND REFINED

For projects requiring something truly innovative, Mega Glass supplies specialist mirror glass solutions for TV and two-way applications. Combining advanced functionality with refined aesthetics, the range enables technology and visibility to be discreetly integrated without compromising the appearance of the finished installation.

Details:

Whether incorporating a hidden screen behind an elegant mirror finish for a seamless smart interior, or specifying two-way mirror glass for security, observation, or specialist design applications, our solutions are tailored to meet the specific visual and technical requirements of each project. Designed to deliver precision engineered clarity, the range is suitable for both commercial and residential environments.

Key Applications:

TV Mirrors, Luxury Bathrooms, Security Areas, Bespoke Joinery, Display & Specialist Applications

Specification:

- TV and two-way applications
- Variety of safety options to both BSEN 12150 & BSEN 12600
- Versatile in processing capabilities
- Design implementation possibilities via sandblasting & brilliant cutting
- Suitable for commercial and residential environments

MEGA GLASS

BACKPAINTED

AN INFINITE SPECTRUM OF COLOUR

Visually enticing, back-painted glass has become a staple in the vast range of products created within the innovative home of Mega Glass. Fabricated in one of our three state-of-the-art dedicated spray booths, our backpainted glass combines cutting edge design with functionality to create solutions to suit a range of aesthetics in any setting both interior and exterior.

Details:

Our forward-thinking can-do production mentality enables for suitability in both monolithic (4 – 19mm) and laminated formats suitable for any installation. As well as our in-house standard colour range, we have our trending colour range dedicated to current fashions inspired by the environment. Beyond these ranges, Mega Glass is in possession of spectrometer colour matching technology, enabling us to push the boundaries in matching other colour libraries, physical glass samples and material swatches.

Key Applications:

Splashbacks, Interior & Exterior Wall Cladding, Lift Lobbies, Worktops, Wall and Floor Tiles, IPS Panels, Partitions, Windows

Specification:

- Available in Gloss, Satin & Textured variants
- Most production processes are compatible
- Three in-house colour ranges for simplicity
- Technology and ability to match most colours available throughout multiple colour libraries including RAL/ NCS/ Dulux and Pantone uncoated range
- Oversized availability
- Suitable for interior & exterior applications
- No adhesive show through (must be low modulus, neutral curing and solvent free)
- OMBRE graduated colour effect available, delivering a gradient like finish
- Gold, Silver and Rainbow sparkles available with any colour

MEGA GLASS

MEGA MAGNETIC

THE IDEAL WAY TO CAPTURE THOSE IDEAS

The unique properties of glass make our low profile Mega Magnetic wipe-boards perfect for offices and environments that need smart, sleek and functional surfaces to capture ideas and plans. Mega Magnetic is manufactured using optically clear low iron, thermally toughened glass or laminated glass. Manufactured with you in mind, our Mega Magnetic wipe-boards offer design solutions with optional upgrades to include non-glare functionality, edge trims and fixing kits – we work tirelessly to deliver your vision.

Details:

Our in-house engineered glass wipe-boards can be used in a variety of environments, providing practical solutions that can be tailored to suit a wide range of industries.

We offer a full range of colours, as well as printed designs to suit your needs. If a more subtle finish is desired, or the environment is flooded with light, we can manufacture with the application of a specialist acid-etch to enable full functionality with a non- glare finish, also suitable for projections – great for presentations.

Key Applications:

Mega Magnetic is suitable to clad or hang on any interior surface application – where there's a wall, fuse contemporary design with functionality and bring your ideas to life.

Specification:

- Perfect for office and domestic environments
- Single- and double-sided options
- Gloss and non-glare options
- Can be colour coated & digitally printed
- 7mm nominal thickness
- 25KG/m^2
- Edge framing options
- Fixing systems available
- Magnets, pens and holders available
- Anti-Glare finish suitable for projection

MEGA GLASS

LINEAR TEXTURES

MODERN TRENDS MEET INDUSTRIAL FLAIR

Linear textures have stood the test of time, yet the range available to the UK market has long remained limited. At Mega Glass, our one-stop-glass-shop philosophy drives us to go beyond the conventional, ensuring your vision is always met with a broad selection of core variants held in stock and ready to deliver.

Details:

At Mega Glass, we source our products globally to ensure that design objectives are met with choice in specification to suit the desired application.

In stocking multiple options to the conventional reeded format, we have brought industrial tradition in design to the 21st century.

All of our linear range can be polished, machined and toughened and combined with a host of other glass processes, offering true flexibility in production and effective compatibility with a variety of designs.

Key Applications:

Airports, Stations, Museums, Offices, Hotels, Restaurants, Partitions, Commercial Washrooms, Domestic Kitchens and Bathrooms, Shower Systems

Specification:

- Variety of thicknesses
- Variety of flute widths
- Options on clear, extra clear and low iron
- Compatible with most production processes
- Can be coated with many finishes on either face

MEGA GLASS

DECOLAM

DECORATIVE SAFETY GLASS

Elegance and rigidity don't always go hand in hand, but at Mega Glass we are always looking to find solutions that deliver on design intent. Introducing MG DecoLam: our range of decorative laminated glass that delivers on aesthetic whilst maintaining the principles of safety, versatility and functionality. Bespoke in manufacture, MG DecoLam fits the bill across a range of applications no matter the style that's called for.

Details:

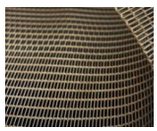

As a laminated product, MG DecoLam brings to the fore a 'pick and mix' scenario with possibilities to customise the product in many ways. Thick or thin, tinted or clear, flat or textured, painted or printed – the inclusion of mesh or fabric to the bespoke laminated composition really delivers the wow factor to enhance any space.

Key Applications:

Airports, Train Stations, Museums, Office Spaces, Hotels, Restaurants, Shopping Centres

Specification:

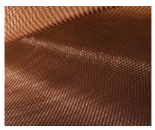

- Laminated safety glass
- Can be toughened to meet BSEN 12150, resulting in a higher level of impact resistance
- Large format sizing available (dependent on mesh and fabric dimensions)
- Glass can be fully processed and toughened
- Suitable for partitioning, urinal dividers, privacy screens, decorative screens, cabinetry inserts, rooflights
- Can be backlit
- Bespoke finishes available on request

MEGA GLASS

SCRATCH RESISTANT

THE PERFECT WORKTOP SURFACE

Manufactured using optically clear low iron glass, our scratch resistant product is nonporous and provides a fantastic alternative to standard polished worktops, Corian and Stone. Not only do they look stunning, but they are extremely strong (toughened to BSEN 12150), hard-wearing and hygienic. The versatility of the scratch resistant coating combined with a wide range of colour options make them suitable for high use, functional areas both commercially and domestically.

Details:

Our scratch resistant worktops are available in 10mm thickness and can be colour coated to any colour with special effect combinations available to provide unlimited design opportunities. Bespoke manufacture is fabricated from both drawings and to templates to ensure a perfect fit. All standard worktop options are possible including various edge finishes, drainer grooves, cut outs for sinks, hobs and taps. The product delivers a unique solution to the worktop market as it is resistant to the buildup of scratches and marks from appearing on the glass surface in normal use whilst being able to withstand heat of up to 250°C as it is thermally toughened.

Key Applications:

Domestic Kitchens, Commercial Tea-Points, Tabletops, Furniture Tops, Windowsills, Floor Panels

Specification:

- UK toughened to BSEN 12150 (1C1, BSEN 12600)
- Scratch resistant to MOHS 'hardness' value of 6 – harder than marble & comparable to granite
- Nonporous
- Sheet Size: 3210 x 2250mm
- Resistant to marks, stains and scratches in normal use
- Compatible with most production processes
- Can be backlit
- Anti-Slip rated R10

MEGA GLASS

ANTI-SLIP

CERTIFIED SURFACES TO WALK ON

Manufactured using chemical etching, anti-slip floor glass provides solutions to incorporate the design flexibilities of glass with the functionality of traditional flooring materials. Implemented via special combinations of raised and recessed areas, the surface also maintains a high level of anti-abrasion resistance ensuring suitability to high-traffic applications whilst safeguarding the longevity of the product.

Details:

Our anti-slip glass is available in 8mm (on request) and 10mm (as standard) thickness with a choice of Lunaris-T and Scratch Resistant finishes. With potential for incorporation of colour, lighting and special effects finishes, design possibilities are completely flexible.

Suitable for both residential and commercial applications, our anti-slip glass offers solutions to suit any vision with a choice of safety requirements possible to guarantee compliance across a range of installations.

Additional anti-slip patterns and finishes may be available for larger projects. Please enquire for further details.

Lunaris-T on Low Iron
Stocked Thickness: 10mm
(Others available on enquiry)
Sheet Size: 3210 x 2250mm
Rating: R10

Scratch Resistant on Low Iron
Stocked Thickness: 10mm
Sheet Size: 3210 x 2250mm
Rating: R10

Key Applications:

Airports, Stations, Museums, Offices, Hotels, Restaurants, Shopping Centres, Showrooms, Nightclubs and Residential Dwellings (Flooring & Rooflights)

Specification:

- UK processed toughened glass to BS EN 12150
- Pendulum impact test rating of 1C1 under BS EN 12600
- Glass can be fully processed, toughened & laminated
- Suitable for flooring & rooflight applications
- Can be backlit
- Coating(s) with hydrophobic and oleophobic properties can be applied to allow water run-off and simplify the cleaning process

MEGA GLASS

ANTI-REFLECTIVE

CLARITY WITHOUT DISTRACTION

Designed to minimise unwanted reflection and maximise visual clarity, our Anti-Reflective glass delivers exceptional transparency for applications where visibility is critical. By significantly reducing surface reflectance, the glass enhances the viewing experience while maintaining the performance and aesthetic expected of modern architectural solutions.

Details:

Suitable for both commercial and specialist interior applications, Anti-Reflective glass is ideal for environments where standard glass may cause visual distraction or reduced visibility. Whether incorporated within display cases, partitions, retail environments, or high-end architectural installations, Mega Glass is committed to delivering solutions tailored to the specific visual and technical requirements of each project.

Key Applications:

Display Cases, Museums & Galleries, Showrooms, Partitions, Shop Fronts, Hospitality & Luxury Interiors, Zoos & Aquariums

Specification:

- Available in 5mm, 10mm and 11.5mm
- Can be toughened to BSEN 12150
- Compatible with most production processes
- Low reflection (<1% depending on thickness)
- High transmission (>97% depending on thickness)
- Colour-neutral
- Long lifetime

Anti-Reflective Range

ANTI-REFLECTIVE
Thickness: 5mm
Stock Size:
3210 x 2550mm

ANTI-REFLECTIVE
Thickness: 10mm
Stock Size:
3210 x 2550mm

ANTI-REFLECTIVE
Thickness: 11.5mm
Stock Size:
3210 x 2550mm

MEGA GLASS

LAMINATION

SAFETY, PERFORMANCE & BESPOKE COMBINATIONS

Laminated glass combines multiple layers of glass with specialist interlayers to enhance safety, performance, and design flexibility. Suitable for a wide variety of architectural and interior applications, lamination allows different glass types, finishes, and textures to be combined into a single bespoke solution.

Details:

From clear and low iron glass to mirrors, tinted, textured, backpainted, and decorative finishes, Mega Glass can laminate a broad range of glass combinations to meet both aesthetic and technical project requirements. Whether the priority is safety, acoustic performance, UV protection, or visual impact, our laminated solutions are tailored to the needs of each application.

Key Applications:

Balustrades, Feature Walls, Decorative Glazing, Retail & Hospitality Interiors, Acoustic & Decorative Partitions, Safety & Security Glazing

Specification:

- Compatible with a wide range of glass types and finishes
- Decorative interlayers and bespoke combinations possible
- Can incorporate toughened and decorative glass products

Interlayers

- CLEAR Thickness: 1.5mm
- DIFFUSED Thickness: 1.5mm
- SECURITY Thickness: 1.5mm
- ULTRACLEAR Thickness: 1.5mm
- SOLAR CONTROL Thickness: 1.5mm
- COLOURED Thickness: 1.5mm

MEGA GLASS

DECORATIVE FINISHES

DESIGN-LED GLASS ENHANCEMENTS

Combining craftsmanship with precision processing, Mega Glass offers a range of decorative and specialist glass solutions designed to enhance both visual impact and functionality. From privacy manifestations and decorative detailing to seamless glass assembly, our specialist processes allow glass to become an integral architectural and interior design feature.

Sandblasting:

Sandblasting creates a refined etched finish that can provide privacy, light diffusion, branding, or decorative detailing across a wide range of glass applications. Mega Glass can assist with the development of bespoke designs, with extensive in-house capabilities. Once approved, stencils are produced and the design is permanently sandblasted onto the glass surface. Anti-microbial coating advised to enhance performance.

Suitable for:

- Manifestation & Privacy
- Logos, Text & Numbering
- Decorative Borders & Patterns

Brilliant Cutting:

Brilliant cutting introduces precision polished detailing to glass and mirror surfaces, creating elegant decorative features that enhance both traditional and contemporary interiors. Designs can range from simple linear detailing to brick, diamond, and fully bespoke patterns, all tailored to suit the individual project requirements.

Suitable for:

- Decorative Mirrors
- Feature Panels
- Bespoke Pattern Work

UV Bonding:

UV bonding enables discreet glass-to-glass assembly without visible mechanical fixings, creating clean and minimal glass structures with exceptional clarity. Commonly used within display boxes, retail displays, and bespoke assemblies, the process is ideal for applications where transparency and refined detailing are essential.

Suitable for:

- Display Boxes
- Retail Displays
- Glass Assemblies

MEGA GLASS

MEGA GLASS

OUR STORY

Mega Glass is a brand that knows the potential of glass to add aesthetic and functional value in so many ways, which is why we have spent more than 10 years finding glass suppliers across the globe that offer more than standard glass and mirror enabling us to hold one of the most diverse glass stock portfolios in the UK. With supply only and installation possibilities offered, we understand the process from design to manufacturing and installation which further enables us to offer quality bespoke products beyond the norms of glass processing.

Manufacturing:

You can trust our team to take care of your glass processing requirements, providing high volume or bespoke solutions in our 34,000sq/ft state-of-the-art manufacturing facility. Our extensive manufacturing processes pair perfectly with our diverse product range, creating limitless possibilities for a huge range of applications. With continued investment into our host of machinery, complemented by our unique inhouse assembly line and diverse product range, we are more than well equipped to take on any glass enquiry.

Delivering:

Loaded into our inhouse fleet, Mega Glass deliver glass products across the Midlands and Southeast efficiently with the added benefit of dedicated logistics software. Should requirements be further afield in the UK or beyond, our network extends to trusted partners globally to ensure our products arrive in the high quality checked condition that they were dispatched.

Sampling:

We would be delighted to show you our stock and manufacturing facility, so let's arrange to meet or to get our product range samples in front of you. Please email Reception (reception@megaglass.co.uk) or call on 01582 809498, to advise of your requirements along with relevant project details so that we can send you a selection of ideas.

Our Team:

Clients always come first: our friendly, competent and responsive team are here to make sure your glass project is fulfilled on time, within budget and right first time. With a vast technical knowledge base and a proactive approach, we are solution finders with the aim of customer satisfaction each and every time.
