

We design solutions for easily transforming any space in record time.

We're inspirers of your creativity thanks to our **lightweight panels, safe and easy to install with no building work needed.**

We make new challenges and dreams tangible because of your ambition to make the most demanding projects a reality.

PIONEERS AND LEADERS IN DESIGNING, DECORATIVE PANEL MANUFACTURING AND CREATING EXCLUSIVE COMMERCIAL SPACES

Panespól supplies international customers in the contract, retail, architecture and interior design sectors.

- Cutting edge technology (we have our own synthetic polymers patents).
- Constant research and development.
- Highly personalised attention.
- Creative solutions for demanding projects.
- Full, efficient logistical support.

20 years of experience

The company Panespol was set up in 2002. The offices and main factory are in Alcoy (Alicante), Spain.

It has become a regular supplier to designers, architects and interior designers of top international chains such as Burger King, Inditex, Salomon, L'Oréal, M&S, Lacoste, Tommy Hilfiger, Adidas, BMW-Mini, H10 Hotels, Swatch y Breitling Desigual, Harrods and Ikea, among others.

Custom Made

Currently, high-street brands and restaurants need to transform their commercial spaces, more and more frequently. They are places where people go to have a certain type of experience. So each change is an opportunity to reflect the personality of the brand.

Therefore making a choice of something that is “not on the menu” has stopped being exceptional. Panespol does not only work on walls. We also work with light volumetric structures and three-dimensional figures that are strong and easy to transport, multiplying the range of creativity possible.

What we can do

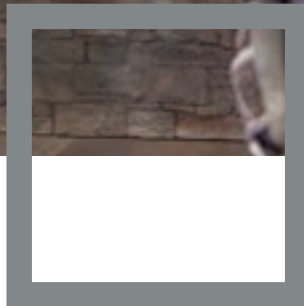

Imaginative and intelligent decorative solutions for indoor and outdoor spaces. A custom-made and reliable service for all your ideas: any material or combination of materials, shapes, three-dimensionality, etc. Also, any finishes that you can imagine that would add value to your project.

Surface Collections

This is our ready-made collection, designed and manufactured to easily transform a space in record time.

For professionals

We offer over 300 references in decorative panels. Surfaces to decorate the walls with maximum realism thanks to a wide variety of textures and finishes.

STONES

Character and warmth. Stone is a material that does not go out of style, a decorative covering that attracts all the attention and plays the leading role in the setting. The use of stone gives a genuine sign of style in each project, creating comfortable, elegant and welcoming spaces.

PANESPOL STONES offers a wide range of imitation stone panels with varied finishes, textures and shapes, in which warm and natural tones predominate and that can preside over the most inspiring settings.

BETON

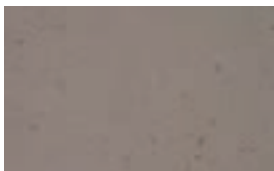

Avant-garde and minimalism. Thanks to our imitation cement panels it is very easy to achieve high impact surfaces and cutting edge settings.

PANESPOL BETON faithfully reproduces different types of cement with varying degrees of air pockets - characteristic blemishes of concrete walls or formwork produced using a wooden board. What really attracts the attention to this material is its ability to create continuous surfaces that unify settings, to find that loft style so sought after by many decorators. This type of panel is also available with aged effects.

TEXTURES

Creativity in its purest form. PANESPOL TEXTURES is the range tailored for those designers who want to explore new paths: textures inspired by wild nature, classic designs or rhythmic geometries.

Without a doubt, an inspiration for design lovers and for anyone who dares tackle any challenge with the help of PANESPOL. This range is ideal for those who want to carry out those stimulating projects that have so often been described as “impossible”.

TILES

Beauty in simplicity. Tiles have broken all the rules as far as interior design is concerned. Demand for them has increased for several seasons thanks to their versatility in adapting to any space and decorative style. They can provide luminosity, cleanliness, reflection and tradition to any setting.

In short, **PANESPOL TILES** decorative panels gives the most restless decorator the ability to create unique spaces from light, strong panels, easy to install and without any brick-laying complications.

WAVIES

Continuity and volume. The 'concrete waves' look, an unstoppable trend that generates a captivating sense of visual constancy for its ability to unify environments and decorate without overdoing things.

PANESPOL WAVIES range manages to create striking spaces using concrete volumes and textures that seek symmetry and the impression of continuity. These stylish curved panels give shape to exclusive spaces.

Panespol panel mounting

01

With a jigsaw we cut the ends of the panel to start the assembly at one end of the wall.

02

We apply the adhesive on the back side of the panel creating a bead.

03

We place the panel in its final location and start with its fastening.

04

We drill panel and wall simultaneously. We make these holes in the areas of the joints.

05

We previously prepare screws inside dowels and insert them into the holes made in the panel and wall with the help of a hammer.

06

Once the first panel is fixed, we place a bead of adhesive around the perimeter of the panel.

07

We place the next panel, which thanks to its shape will fit perfectly.

08

We putty the holes where the screws are located and the joint between the panels.

09

We expand the putty with a brush giving the appropriate shape to the joint putty.

10

Let the putty dry for approximately 24 hours and touch up the masked areas.

www.panespol.com

See the assembly videos on our website.

Panespol panel mounting - (corner)

We place the panel in the corner and draw a line on the back of the panel that will be used to make the miter cut.

Once each part of the panel has been cut at 45°, we apply a bead of adhesive on the back of the panel before proceeding to fix it.

We place the panel in its final location and drill the panel and the wall simultaneously. We make these holes in the areas of the joints, since the retouching will be easier to perform.

Once one part is in place, we apply a bead of adhesive on the miter and place the next panel which, due to its miter cut, fits perfectly.

Screw the two parts of the miter panel together with 2 or 3 screws (depending on height). We expand the adhesive with a brush giving it the appropriate shape and screw the second corner panel to the wall.

Once the panels are in place, the holes where the screws are located and the joint of the panels are covered with putty.

Let the putty dry for 24 hours and touch up the stones or bricks with touch-up paint. Once the paint is dry we retouch the putty areas with joint paint.

With the help of a fine brush or rag, we retouch the panels with the dry-applied pigment until the desired result is obtained.

www.panespol.com

See the assembly videos on our website.

BUILDING A

17 Sustainable Development Goals

At Panespol we have adhered to the set of global goals adopted by the UN. We have developed and implemented good practices related to our activity and in line with this agenda. Through specific initiatives, we have integrated part of the SDGs into our corporate strategy, **to help build a better world.**

- Good health and well-being
- Quality education
- Clean water and sanitation
- Gender equality
- Affordable and clean energy
- Life below water
- Climate action
- Responsible consumption and production

Ecofriendly raw material: synthetic polymers with recycled pet

Our raw material, recycled PET foam, is ecofriendly and contributes to the preservation of the environment. It is an effective thermal insulator that helps reduce the energy consumption, prevents the proliferation of fungi and mould, and does not emit gases. The recycled PET foam is water-based, consequently, it does not damage the environment and does not emit toxic gases when the panels are in contact with the fire. In addition, Panespol panels count with a fire-resistance certification.

- Water-based raw materials
- Energy efficiency: reduction of energy consumption
- Air quality: zero gas emissions
- Fire protection: fireproof coating

Reduced Carbon Footprint

We are totally committed to the environment and to reducing our carbon footprint. **We have developed an advanced Climate Action Plan that began with measuring our carbon footprint over the last 2 years** and designing a roadmap that will allow us to reduce, and even neutralise, the impact generated by our commercial activity. This effort has been recognised by the Spanish Ministry for Ecological Transition and Demographic Challenge which has awarded Panespol a certificate and has recognised the effort in the 32% reduction of our Carbon Footprint.

2030 circular economy: recycling Panespol products

The Spanish Circular Economy Strategy, España Circular 2030, lays the foundations towards the promotion of a new production and consumption model in which the value of products, materials, and resources remain in the economy for as long as possible, thus minimising the generation of waste and taking the greatest possible advantage of those that cannot be avoided. **Thus far, we have been able to grind our products and we have incorporated 20% of the amount obtained into the manufacturing of new products,** contributing to Spain's efforts to achieve a sustainable and efficient economy in the use of resources.

New natural fibre raw material

At Panespol we lead the way in the **use of new fully biodegradable raw materials.** We have the development and ability to manufacture the same decorative panels but using a completely natural, sustainable and ecological raw material. **We use bio mesh made from woven biodegradable natural fibres.**

Implementation ISO 14001

BETTER WORLD
