vinyl planks & tiles.

**Belgian-designed
vinyl flooring for
any project.**

Zenn Faro

vinyl planks & tiles with a rigid core

Our vinyl planks & tiles have a stone composite core (also known as rigid core). These worry-free floors are waterproof, scratch-resistant, highly stable and durable. In short, they offer the benefits of a traditional vinyl floor with the soothing, authentic look of nature, seamlessly blending into any interior and lifestyle.

waterproof and stain-resistant

Our vinyl planks and tiles are all fully waterproof, and capable of withstanding all forms of spills. What's more, they are UV-resistant, meaning you won't be left with any sun spots – so let the sunshine in!

acoustic comfort

Our vinyl planks & tiles come with a comfortable, soft top layer, designed to absorb and reduce noise. As a result, your footsteps, as well as those of others in the same room or above, will be quieter on the ears.

designed  in Belgium

/ spirit.

Spirit Pro.

The planks and tiles from our Pro collection feature luxury finishing, where even the most refined grain and the smallest detail are palpable. This is all thanks to the real wood structure. The structure perfectly matches the decor of the design. You won't be able to tell the Spirit Pro from a genuine hardwood floor

Choose a firm vinyl floor that looks like genuine hardwood. The collection features 16 planks and 10 tiles: perfect for your home, showroom, store or office building. Anything is possible!

Spirit Pro - Click Comfort 55 - Planks Elite Honey
Spirit Pro - Click Comfort 55 - Tiles Cement White Grey
Spirit Pro - Click Comfort 55 - Planks Cement Taupe

The structure perfectly matches the decor of the design.

/ spirit.

Spirit XL.

Meet the Pro collection's big brother: the 8 different planks from the XL collection are extra long. The elongated planks radiate luxury and are perfect for large spaces. These stylish giants create depth while at the same time giving your floor extra cachet, so that your space will look even larger. Want to add a store or reception area to your business?

Thickness 5,5 mm
4 bevels
5G*

The length of your planks will subtly lead your customers into the direction you want.

The longer the planks, the less work involved in installing them. Makes sense, doesn't it? The XL collection allows you to get fast results from installation even sooner. And that's just what you need as a professional, since – as you well know – time is money.

high pressure floors.

The world's
strongest floors,
made in Norway.

Grand Avenue Rodeo drive

extremely impact resistant

The thick, high-quality top layer of high pressure floors consists of multiple layers and features a super-strong protective surface. It can withstand serious impact and still remain mark-free and undamaged.

scratch resistant

The AC6 wear layer offers the highest protection available in its class. These floors are extremely scratch and stain-resistant, making them perfect for very intensive commercial traffic or a busy home life.

water resistant

The robust water-resistant top layer protects both the surface and the bevels. Even the HDF core of the plank is entirely water resistant. So they are perfectly capable of withstanding all forms of spills at home or in commercial spaces.

/ original.

With its 31 decors in a **standard plank size** (198 x 1207 mm), Original will take you on a global adventure in style. Find your favourite colour amongst various wood and stone designs.

Looking for a shipdeck pattern? Or a sleek, concrete look? The Original collection has it all, bringing a unique look and authentic feel to busy homes and businesses.

Grand Avenue Park Avenue

AluLoc Prime, the strongest lock

AluLoc Prime, our unique and patented aluminium locking system, now features an improved lock on the short side of the planks of Grand Avenue and Grand Majestic, made of 100% recycled polymer. This feature adds even more strength to the already robust high pressure floors, also making them ideal for large, heavy-traffic commercial spaces. In fact, you don't even need to use an expansion profile for areas up to 15 x 15 m.

No special tools are required, making the installation quick and easy. Simply push down the planks and the lock fixes the plank into place.

Chateau+
Bloom light brown

100% water-repellent coating

This water repellent coating further protects your floor around the edges of each plank. As a result, you'll have a 100% water-resistant floor, able to withstand all kinds of liquids.

scratch resistant

natural wood design

made in  Belgium

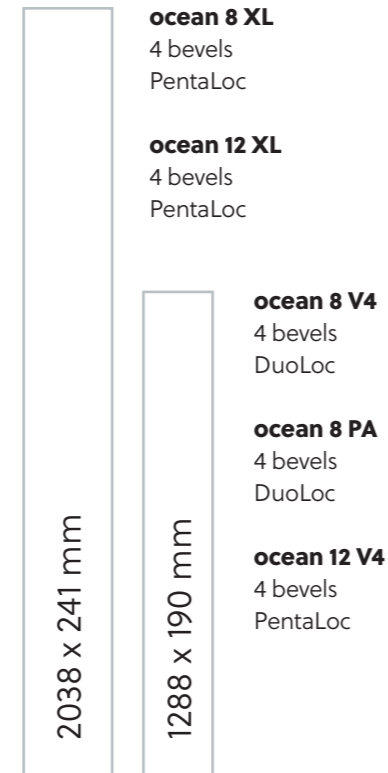

/ ocean+.

Need a floor for a room where you're more likely to encounter water? Enjoy a **100% water-resistant** Ocean+ laminate floor throughout your home thanks to our **pioneering hydro+ technology**. This option is available for **all 50 designs** in standard plank size, but also for a selection of planks with integrated underlay, XL planks, or thicker 12-mm floors.

Formats

Discover our pioneering hydro+ technology

Back in 2008, BerryAlloc was the first company to introduce water-resistant laminate to the market with its innovative hydro+ technology. This unique formulation has indisputably proven its durability, quality, and value for money after years of exposure to daily situations.

How does it work?

A hydrophobic coating is applied to all sides of the plank, effectively repelling water when it comes into contact with the joints. Applied during manufacturing, the Ocean+ collection is completely water resistant when it leaves the production line.

Ocean 12 V4 Select Sand Natural

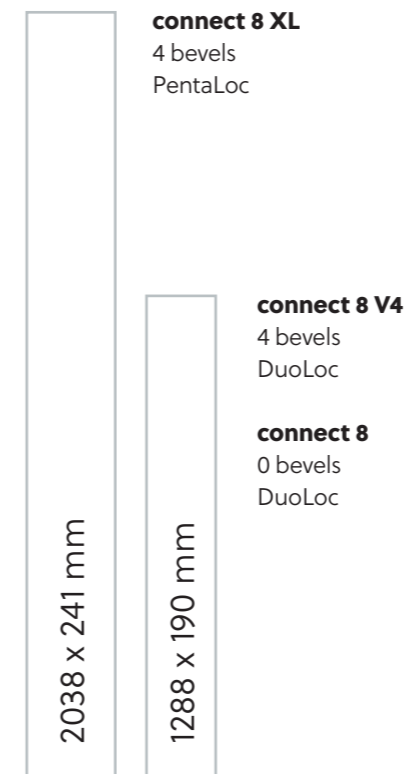

/ connect.

The **splash-resistant** Connect floors are the perfect all-rounders to elevate your interior. **All 50 designs** are available in a standard plank size or an XL-plank size option for a select few. You can also choose between subtle minimalism in a floor with no bevels or a beautiful plank effect with fully bevelled edges.

The start of your new adventure.

Formats

Connect V4 Charme White

/ chateau+.

The 15 natural wood designs and uniquely small and narrow planks of our Chateau+ collection are perfect for recreating the beloved parquet **herringbone** style that's lasted centuries. Elevate any room with this premium-quality laminate floor that's highly scratch resistant, 100% water resistant, and guaranteed to last a lifetime, adding sophistication and a wow effect to your interior.

Pick a pattern

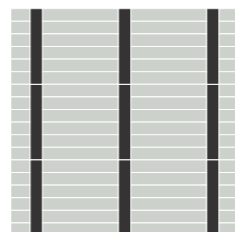

Chateau+ offers four different installation patterns: time to get creative and choose the style that suits you best. Check the installation instructions on how to best achieve these patterns. Mix colors to create your very own and unique herringbone floor. All decors are also available in standard plank size, so you can install Chateau+ in the living room and standard plank Ocean 8 V4 in the kitchen.

/ les iconics.

Iconic in look, lifestyle, and name: this unique collection brings together age-old expertise and beautifully crafted finishes. Brushed, hand-scraped, naturally oiled, our new parquet collection combines both character and craftsmanship into a floor that's full of traditional charm.

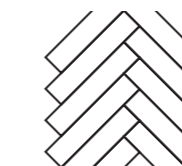

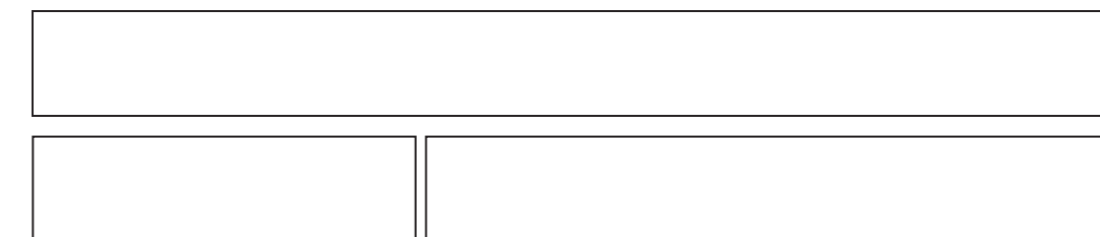

- Aged**
Aged gives every appearance of a sturdy, old parquet, renovated by hand with irresistible aesthetics that accentuate every detail.
- Rustic**
Fashioned using traditional craftsmanship, with a deep-brushed finish to create that distinct character of an old parquet floor.

Choosing the right colours for your project.

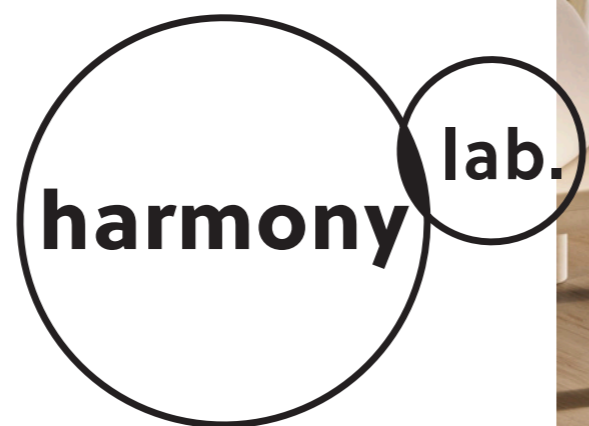

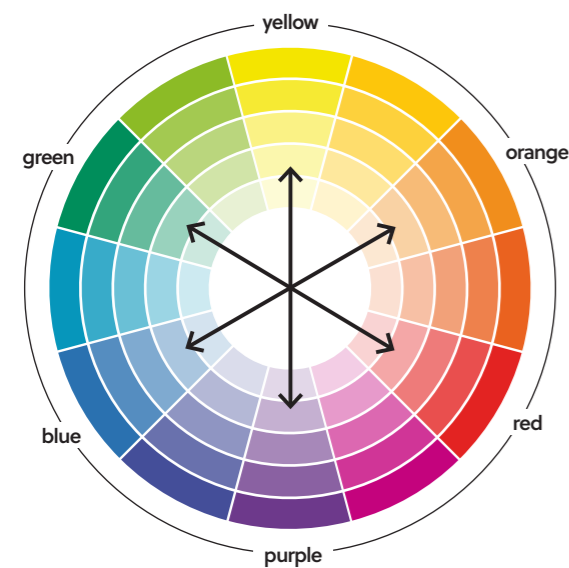

Although the colour of your floor seems fairly obvious at first sight, it has a whole layer of subtle undertones. This underlying shade is called **the colour character** of your floor. **Harmony Lab** will help you to match this with the colour scheme of your interior.

How it works

The colour character of our floors are categorised in 6 colour groups:

Once you know the colour character, the **chromatic colour wheel** will guide you in your decisions.

- yellow
- orange
- red
- purple
- blue
- green

Harmonious colours

Let your creativity shine with a bold and vibrant contrasting colour scheme, or create a beautifully balanced and harmonious palette for a peaceful atmosphere. You choose!

Using **harmonious colours** means using colours on the colour wheel that are either the same colour or the neighbouring colour of your floor's colour character. For example: if your floor has a blue character, this means using variations of blue, green, and purple.

Using **contrasting colours** means using colours that are directly opposite to your floor's colour character on the chromatic colour wheel. For example: if your floor has a yellow character, offset it with purple elements in your interior.

We've determined the colour character for every single decor of the Zenn collection, which you'll find on p. **24-25**.

Contrasting colours

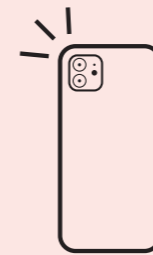

Are you having difficulty imagining your floor in your own interior project? **Floorfit** has got you covered. This **digital tool** simulates your top picks in a room of your choice. Take a moment to try out your favourite choices and figure out what suits your style best!

Visualise a floor in your project with Floorfit.

Find out how it works:

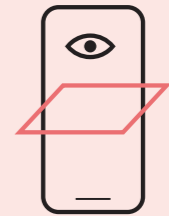

Snap

Take a photo of your room and **upload** it to **Floorfit**. Or choose from a range of standard rooms in the tool.

Select

Choose the **colour** you want to visualise through the built-in filters. Don't forget to select a laying direction and pattern.

Floorfit

Have you found your dream floor? **Share** your final look with family and friends, or get in touch with your **local BerryAlloc dealer** for the next step.

What are you waiting for?
Floorfit it out!

Sustainability.

Live Nogstalgic Oak Cinnamon

Responsible flooring solutions.

We truly care!

From Belgium to France to Norway. We always go that extra mile. Throughout BerryAlloc, we prioritise the joy and well-being of our employees, customers, and end-users. But there's another stakeholder that's equally as important. And that's our planet. Sustainability is an integral part of our DNA, from management practices to our production processes.

Why? Because we are wired to care and dedicated to act. We take ownership and accept the responsibility to get things done. We are devoted to continuously reducing our impact and building a healthier environment. We don't strive for perfection – instead, we work towards making you happy. And keeping our planet happy.

Connect 8 V4 Crush Brown Natural

Close to home

What do labels such as "Made in Belgium", "Made in Norway", or "Made in France" mean to you? To us, they mean quality assurance, shorter transportation routes, and less CO₂ emissions. They also mean we follow European norms and regulations, providing ethical and safe work environments.

made in  France

We share the French love for quality: all our parquet products are made with love in France. The wood is locally sourced from fully regulated PEFC™-certified forests.

made in  Belgium

For over 20 years, we have been producing high-quality laminate in Belgium.

 made in Norway

Inspired by Scandinavian nature and design, all our high pressure floors are designed and produced in Norway.

Taking care of your well-being

We spend most of our time indoors, yet the air we breathe in our homes is sometimes more polluted than the air outside. And that's not OK. Our products are designed to contribute to an optimal indoor air quality so that you can relax at home without worrying. And there's more. The materials used in our products are phthalate-free, 100% REACH compliant, and the vast majority of our products hold an A+ ranking for Indoor Air Quality.

What are VOCs?

Volatile organic chemical compounds are a type of chemicals that are commonly present in products used in and around our homes and tend to vaporise into the atmosphere. Unfortunately, some chemicals in VOCs may have short and long-term adverse health effects, and are especially sensitive for individuals suffering from allergies, asthma, or experiencing thyroid issues. It is our goal to reduce the amount of VOCs in our products as much as possible.

VOCs can be found in all sorts of products used to build and maintain your home or commercial space: from cleaning supplies to air fresheners, to paint and varnishes, and yes, even your floors.

At BerryAlloc, we realise that VOC concentrations are consistently higher indoors, even though they are present everywhere you go. As your well-being is our highest priority, we avoid using materials that could cause any harm. We measure and verify the level of VOCs in our products through an externally accredited lab and comply with some of the strictest VOC regulations across several countries (requirements can differ depending on the focus of a particular regulation).

Wood: a natural choice

Choosing a wooden floor means bringing nature into your home in both looks and materials. A wooden BerryAlloc floor also means you're supporting responsibly sourced materials that help preserve nature. All our wood is sourced from sustainably managed forests and nearly all are PEFC™-certified.

PEFC™ certified wood

BerryAlloc are sourced from sustainably managed forests. Our PEFC™ certification proves that we meet the strictest environmental, social, and economic requirements for our wood. This means that the timber used for the production of our products:

- Does not come from protected forests
- Does not endanger protected species
- Does not further contribute to deforestation
- Does not negatively impact local communities

Solid, high-quality materials

Our wood selection is always top-tier. All so that you can enjoy your naturally beautiful floor longer, without compromising on either quality or design. Our products carry a lifetime warranty for residential buildings, and a 10-year warranty for commercial buildings.

Wood recycling

To help achieve our goal of reducing the use of virgin materials, we continuously explore new ways to increase recycled content in our products, and we aim to further develop this in the future. The top layer of our high pressure floors range, for instance, consists of 30% recycled paper.

There are also small amounts of recycled paper present in our DPL (deep pressure laminate).

Wood dust: waste or valuable resource?

Our Menen, Meaulne, and Lyngdal production sites produce wood-based flooring (parquet, laminate, and high pressure floors). As a result, we create significant amounts of saw and milling dust as a by-product. But there's no way we would let that go to waste.

At our Menen site, the sawdust is used externally as an energy resource. In our Lyngdal and Meaulne sites, the sawdust is used both as an energy resource for the factories themselves, as well as one for the local community and neighbouring production sites.

Connect 8 V4 Gyant Sand Natural

Thoughtful choices, sustainable results

We select our materials using thoughtful and sustainable processes. To us, quality and recyclability are fundamental factors in our battle to eliminate waste. Not only that, but healthy materials are also essential in improving your well-being.

Solid, high-quality material

When it comes to material selection, we always choose top-tier materials. All so that you can enjoy your naturally beautiful floor longer, without compromising on either quality or design. Our products carry a lifetime warranty for residential buildings, and a 10-year warranty for commercial buildings.

Recycled materials

To help achieve our goal of using fewer virgin materials, we continuously explore new ways to increase recycled content in our products, especially for the product core.

We're also trying to reduce waste within the production sites too. It happens from time to time that raw materials, such as wood boards, aren't fit for production. Since we want to maintain our high quality standards, we prefer not to use these materials. In the example of the wood boards, we work together with local sheltered employment to resize these and re-use them to protect our planks during product shipment.

Original Barrell Oak

Healthy materials

We want you to stay happy and healthy. And we do not take this commitment lightly. The best way to ensure this, is to deliver products that do not contain suspicious nor potentially harmful substances.

All our products are phthalate-free, and our materials are 100% REACH* compliant. Why is this important? This EU regulation helps us protect your health and focus on your comfort. The result? All our floors meet the highest standards in terms of Indoor Air Quality and are proven to take care of your well-being.

Industry professionals have a high level of trust in our products, knowing they meet the highest standards. Our floors contribute to the improvement of their BREEAM and LEED (sustainability assessment for buildings) project ratings.

Labels & Certifications

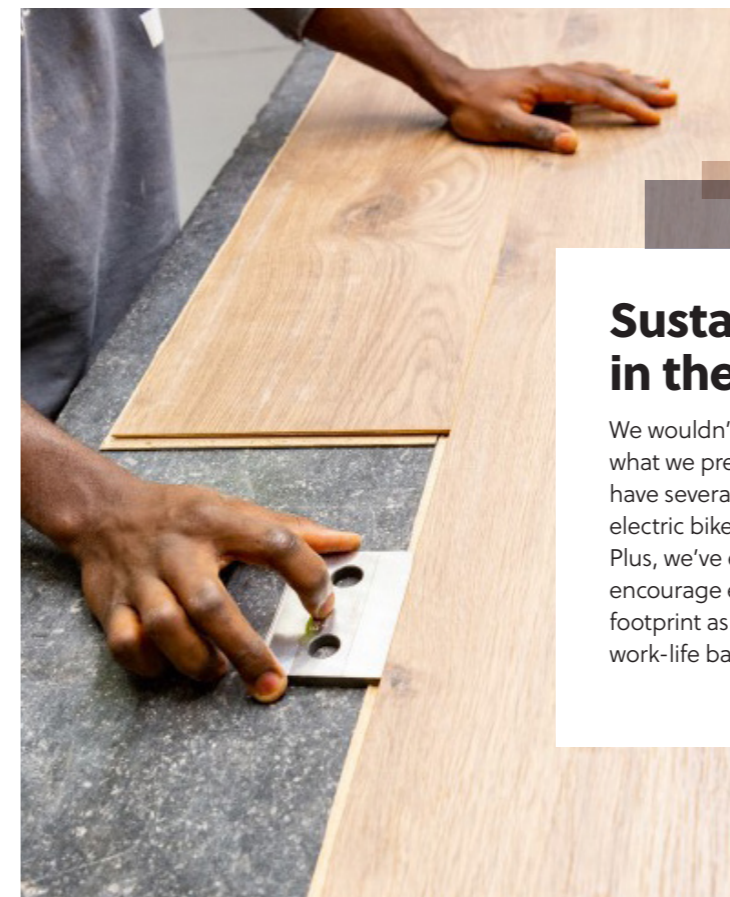

BerryAlloc is resolutely committed to environmental and societal challenges. Our manufacturing processes and our products respect the highest standards of sustainable development.

Our sustainability certifications

Our products meet the highest standards, so you can enjoy them longer in your home. Over the years, we've accrued many labels and certifications.

Organisation	What does this mean to you?	Which BerryAlloc™ products?
Indoor Air Quality A+	The A+ label demonstrates that the amount of VOCs (volatile organic compounds) produced by our products is among the lowest and that all indoor air quality standards are met in full.	All products, except for Chateau+, high pressure floors and Les Iconics parquet. (A)
M1	This Finnish classification presents emission requirements for building materials, fixtures, and furniture used in office and residential buildings concerning good indoor air quality. M1 is the highest score possible.	All our high pressure floors and Zenn (LVT).
PEFC™	All the wood we use is sourced from sustainably managed forests (PEFC™-certified) that meet the strictest environmental, social, and economic requirements. PEFC™ certification ensures that the timber used for the production of our products: <ul style="list-style-type: none"> — doesn't come from protected forests — doesn't endanger protected species — doesn't contribute to deforestation — doesn't impact local communities negatively 	All our wooden and wood-based floors are certified.
EPD (Environmental Product Declarations)	Environmental Product Declarations (EPD) present transparent, verified, and comparable information about the life cycle environmental impact of products.	Currently available for all our laminate, high pressure floors and wall&water. Parquet and Strong wood floors - WIP.
FDES (fiche de déclaration environnementale et sanitaire)	The FDES presents transparent, verified, and comparable information about the environmental lifecycle impact of products. This is an EPD with extra information about maintenance /cleaning.	Our parquet, high pressure floors and laminate. Strong wood floors - WIP.
Ortho phthalate-free	None of our products contain phthalates which can be harmful to your health.	All our vinyl planks & tiles are ortho phthalate-free.
REACH	REACH is a European Union regulation and stands for Registration, Evaluation, Authorisation, and Restriction of Chemicals. REACH aims to protect human health and the environment from the use of chemicals.	All our products are 100% REACH compliant
Eurofins Indoor Air Comfort (Gold)	Eurofins Indoor Air Comfort Gold certification is your best assurance that our products fulfil low emissions requirements.	Our Pure products hold the Indoor Air Comfort label, all other vinyl products hold the Indoor Air Comfort Gold label

Organisation	What does this mean to you?	Which BerryAlloc™ products?
ISO 9001	The ISO 9001 standard demonstrates our ability to consistently provide products and services that meet customer and regulatory requirements.	All our laminate floors, luxury vinyl planks & tiles, and high pressure floors
ISO 14001	ISO 14001 is the international standard that specifies requirements for an effective environmental management system (EMS).	All our high pressure floors
CE	This label means that our products have been assessed to meet high safety, health, and environmental protection requirements.	All our products
ISO 45001	ISO 45001 is the international standard that specifies the requirements for an occupational health and safety management system.	All our high pressure floors

Sustainability in the workplace

We wouldn't truly be sustainable if we didn't practice what we preach in our daily work lives! Our employees have several eco-friendly commuter options through electric bike leasing or paid public transportation fees. Plus, we've established a Work From Home policy to encourage employees to further reduce their carbon footprint as well as maintain a healthy and flexible work-life balance.
