

SR CHOPPING BOARDS

THE PERFECT ADDITION TO YOUR KITCHEN

Manufactured using optically clear low iron glass, our scratch resistant product is non-porous and provides stylish looks and exceptional durability. Toughened to BSEN12150 (1C1, BSEN12600), our chopping boards are hard-wearing and hygienic with the capacity to colour coat, ensuring suitability for high use functional areas, both commercially and domestically.

Details:

Gone are the days of frayed old chopping boards. Utilising the latest in acid etching technology to deliver practical scratch resistance, our chopping boards are manufactured to a set size of 306 x 346mm, available in two styles: with and without a handle.

Durable, heat resistant to 250°C and resistant to the build up of scratches through general use, our product delivers longevity to ensure its stylish aesthetic remains as appealing as the day it was purchased.

This specialist product is repellent to staining, yet can be cleaned with regular cleaning products.

Key Applications:

Kitchens, Tea-points

Specification:

- UK processed toughened glass to BSEN12150 (1C1, BSEN12600)
- Scratch resistant to MOHS 'hardness' value of 5 – harder than marble & comparable to granite
- Non porous
- Will not degrade or discolour over time
- Resistant to marks, stains and scratching under normal use

Colours:

Available in 3 standard colours: Clear, Black & White.

Bespoke colours are available on request with discounts available if the product is being coated to the same colour as part of a broader job. E.G. paired with a splashback and/or worktop.
