The concept behind each design

Know-how means care for every detail, selection of the best production technologies and no compromise in achieving state-of-the-art quality.

Talent and creativity of our graphic artists is the essence and inestimable value of the brand. People with thorough artistic education, passion and offbeat, expressive outlook at reality. They use various techniques in their works and follow different paths of artistic expression in order to change each and every interior into a fantastic journey to undiscovered corners or imagination.

DigiWet™

It's an innovative solution developed jointly with an Italian cooperating party. The technical coating with print in this system is a material with a roughly braided jute structure. The graphics are printed in high resolution, with perfect color reproduction. The DigiWet™ coating is resistant to moisture and direct exposure to water, therefore it can be used without problems even in shower cabins. It's a system adapted for application to any type of waterproofing. We recently introduced a dedicated MATT coating, for clients who look for a different finish and more modern finish.

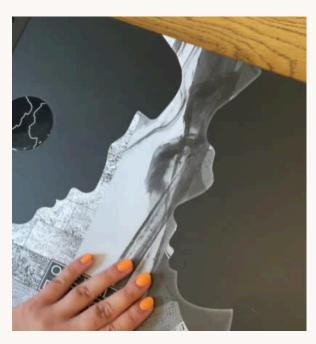

DigiOut™

DigiOut™ is a high quality three-layer outer coating with excellent weather resistance.

The launch of our proprietary DigiOut™ was preceded by several years of trials and testing in collaboration with laboratories of leading chemical component manufacturers. The result of our work is an innovative solution that allows you to freely create the appearance of facades and other external walls. DigiOut™ can be used for new and existing facade coverings. It is perfect as a finishing touch for thermal insulation systems and for all other exterior plasters. The system will also prove to be an extremely resistant decorative coating for the interiors of residential and public buildings. more

Our new customisable catalogues

You can purchase catalogs for individual collections, as well as purchase a general catalog presenting a cross-section of OneWallDesign's product range.

In the general catalog you will find selected designs and bestsellers, as well as samples of all available materials. Patterns are marked with a QR code leading to a particular collection.

Collection catalogs are an essential tool for working with customers in your showroom. Each catalog contains all the graphics of a particular collection and samples of materials dedicated to that collection.

Samplers

A set of samples presenting all materials dedicated to OneWallDesign (DigiBasic and DigiWet)
