

Space Only Stands in Gallery Bay

As you have booked a Space Only site in a Gallery Bay, it is crucial that you read the following information carefully.

Example visual of Gallery Bay:

Venue ironwork height restrictions:

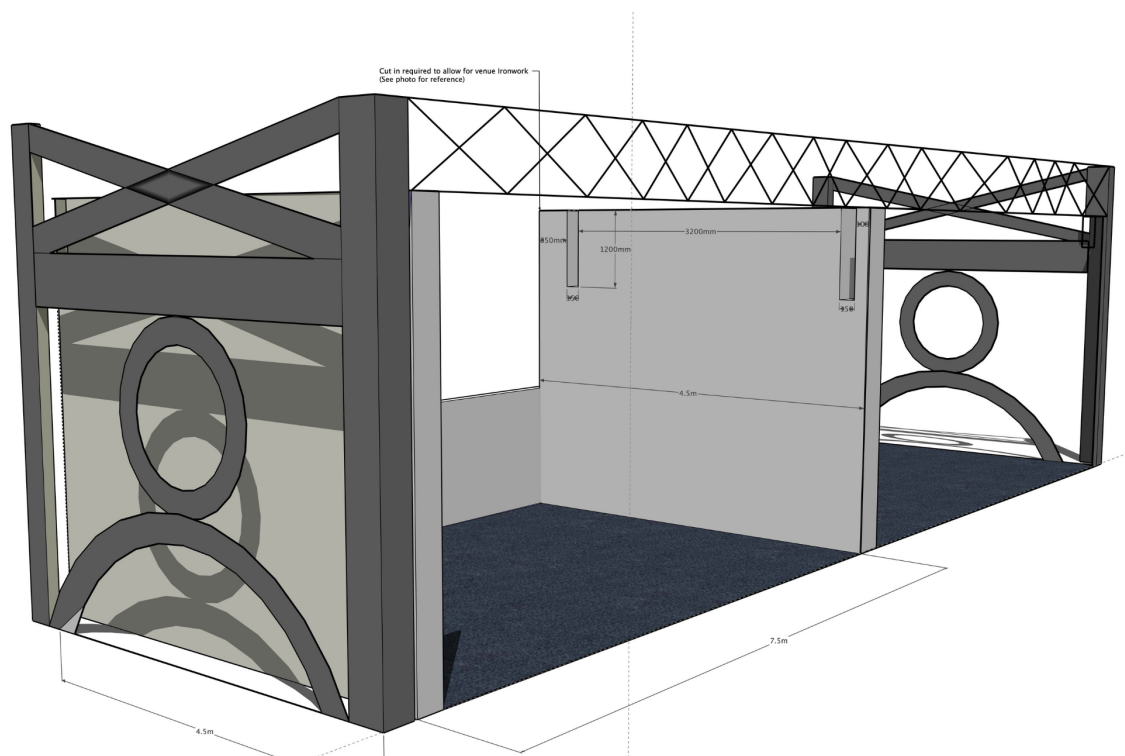

Due to the venue structure, the Gallery Bays have ironwork which you must consider when designing your stand. This ironwork is likely to affect your build as to whether you incorporate cut-outs into your walling to fit around the ironwork, or you can bring your walling forward by 50cm to avoid the ironwork.

New Regulation: You are now permitted to build a wall against the gallery edge however please note as this can be seen from the floor below you must ensure you dress both sides of the wall.

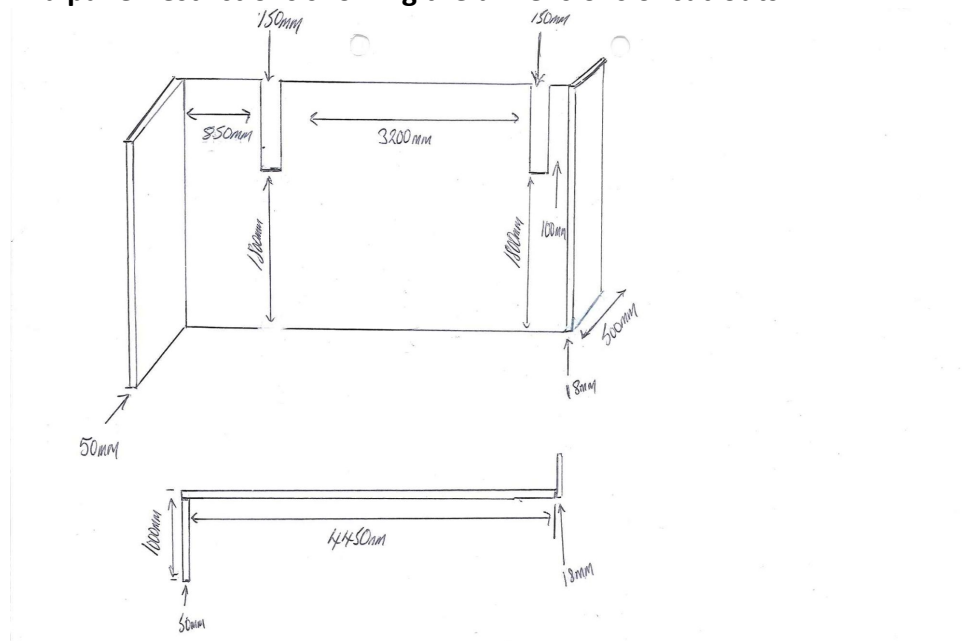

Gallery Bay – Height Limit

Walling measurements with cut-outs

End panel restrictions showing the dimensions of cut-outs:

Any gallery space only stands, we recommend a site visit, please contact Isabella Blachin the Venue Services Manager.
