# SAVE OUR OCEANS

## *Our Green Message.*

Approximately 12 million tonnes of plastic waste are dumped into our oceans every year, which equates to a truckload of rubbish, every minute of every day.

This rubbish is harming not only the sea life but also our environment. 70% of the oxygen we breathe is produced by plants that live in the oceans and are fundamentally tied to our health and livelihood...but pollution has our oceans on the brink of disaster.

Plastic does not break down as fast as other waste and can take approximately 450 years to degrade, and then it does not go away completely. It breaks down into smaller and smaller pieces, called micro-plastics. This means that more sea life is not only being harmed by plastic waste, they are now eating it. This can be very harmful for us, as this plastic will eventually end up on our plates.

What we do on land can change the fate of what goes on offshore, and small mistakes in waste disposal have a large impact on everyone's health and well-being.

# REDUCE PLASTIC

# WASTE

Here at Marmax Products, we are very passionate about recycling plastic waste and making it into maintenance free, award winning outdoor furniture and play equipment for any type of environment.

This saves millions of tonnes of plastic waste from landfill and our oceans, at the same time making products that people can appreciate and use for generations to come.

*100,000 Sea creatures and 1 million sea-birds die each year from being tangled in plastic.*

*Recycled plastic is better than timber or metal, especially when considering the cost of maintenance, both financially and environmentally.*

# PICNIC BENCHES

## *For your garden...*

People of all ages benefit from having the opportunity to spend time outdoors to observe the environmental changes that surround them, as well as providing the opportunity for social interactions and extending their language, communication, and social skills.

By providing outdoor seating within your hospitality establishment not only means that people can benefit from some well-deserved vitamin D, but you will be able to accommodate more visitors, and create a warm, welcoming atmosphere which will have people returning again and again. Our picnic benches are perfect for all ages. We have our standard 'A-Frame' picnic benches and our extended top picnic benches which cater for wheelchair users and can sit up to 6 people at any one time. Our Olympic Picnic Bench can not only sit up to 8 people at any one time, but it can also cater for wheelchair users; just omit one or two of the seats and wheelchair users can sit at the table with others. Our Octobrunch Picnic Bench is perfect to fit 8-12 people around the bench at any one time; the perfect picnic bench for family gatherings. The picnic benches can be used for other activities to extend your enjoyment too with our range of gameboard tops that can be added to our A-frame picnic bench.

# PUB GARDEN SEATING

*Sit back and  
enjoy your  
outdoor space...*

The design of our outdoor seating range provides hospitality establishments with a relaxing place in which their customers can sit and observe life going on around them.

Outdoor seating provides everyone with the opportunity to relax, find calm and reflect with a drink in their hand.

All Marmax products furniture is made from 100% recycled plastic, and are designed to complement any outdoor area, and provide comfort to all who use them. We also want to look after your budgets, and by using 100% recycled plastic material, the products will save you both time and money in maintenance costs. If the product gets dirty, just wipe down with a cloth or jet wash, and they will look as good as new.

### Why is recycled plastic better than wood?

It does not fade so it keeps its appearance without the need of paint or stain, eliminating expensive labour costs and environmental damage.

It cannot rot, so can tolerate damp conditions.

It does not absorb water, so resists fungal growth.

It is robust enough to withstand the demands of urban situations.

Plastic extrusion eliminates splinters.

It is very easy to keep clean, especially where hygiene is important.
