PROFITABILITY

BUSINESS SIMULATION

JOIN US FOR

A virtual, simulation training that teaches participants how profit is made, how cash flow is affected and how each individual can make a difference. Participants compete in teams, navigating through monthly sales and delivery cycles. Teams will use business acumen to make decisions on how to price their products which contracts to compete for, how much stock to buy, how to finance investments and how to pay suppliers.

(It is encouraged that Basic Financial Literacy Training be completed as a prerequisite.)
