But no matter what you choose, you'll find our tracks a fast, easy way to help pick the right Compliance & Ethics Institute sessions for you.

GENERAL COMPLIANCE/ HOT TOPICS

- We will discuss the elemental building blocks of accountability, why organizations do not see enough if it, and what has to happen from both the “top down” and the “bottom up” in order to create a high performing ethical culture.

Monday, 3:00–4:00 PM

James Sheehan, Chief, Charities Bureau, Office of the New York Attorney General

Kenneth Zeko, Director, Navigant

- “Choice architecture” is used by marketing professionals and government agencies to move people to better choices. Compliance changes like signing certifications before completing the form increases the likelihood of accurate information.
- Behavioral economics looks at how perceived risks and rewards change behavior. Risk of loss (identity theft) is a strong motivator. Emphasis on “protecting your reputation and financial information (Bank of America) gains more compliant behavior.
- Relatively more anonymous behavior (on-line or in the dark) has been demonstrated to be more likely to be non-compliant. How should compliance officers and risk managers address this problem in an on-line world?
