

HedgeStar is a global provider of valuation and hedge accounting services. Our suite of services includes training and consulting on the use of derivatives for risk management purposes, as well as comprehensive hedge accounting for derivatives. Our experts use the Reval system, an industry leading software for derivatives valuation and hedge processing. We take the operational burden off your personnel, and we work faster and cheaper than the competition.

Services

Risk Management Consulting

The preliminary steps for creating a derivatives-based risk management program can be overwhelming for the uninitiated. We will guide you through the process from start to finish, assuring comfort and understanding by all personnel involved. Instituting a hedging program can be quickly achieved when you engage with HedgeStar.

Valuations

At HedgeStar, we provide independent valuations on a timely basis using a proven process that has been approved by leading audit firms. We value a broad range of financial instruments, from plain vanilla to exotic. We support asset classes including municipal bonds, foreign debt, illiquid securities and derivatives.

Hedge Accounting

Hedge accounting is complex, and subject to interpretation—and getting it wrong could mean an earnings restatement. Since 2004, we have been helping clients meet the challenges of derivative accounting. We provide tailored solutions for hedges of interest rates, currencies and commodities. Our clients require precision and flawless execution, and HedgeStar delivers every time.

Training & Education

We offer custom training and education to our clients, boards of directors, audit firms, and other stakeholders looking to improve their understanding of derivatives – how these contracts work, how they're priced, how they're traded, how they can be expected to perform, and the accounting that should be applied. Let us tailor a program for you.
