BENEFITS OF JAMIS PRIME ERP.

Simplify Government Contracting

Designed for government contractors, giving businesses the accountability demanded by the government and the flexibility needed for growth.

Making DCAA Compliance Easier

Built-in rules, reporting, and billing features designed to help businesses meet all DCAA requirements.

Automate Financial Processes

Improve financial operations, efficiency and productivity with automation tools built for your industry specific solutions.

Powerful Dashboards

Dashboards and inquiries allow businesses to capture vast amounts of data and focus on key performance indicators.

Mobile Application

JAMIS Prime is accessible on mobile devices, giving visibility into key performance indicators and the ability to keep the workforce productive on the fly.

Personalize Your ERP Experience

Based on the user's role in the organization, specific screen-based and even field-based access is restricted.

PRIME CORE SUITE

Project Accounting and Financial Management

- Enable full compliance with DCAA, FAR, and CAS requirements
- Tracking of detailed cost information (direct, indirect, and overhead expenses) for each contract, project, and subtask
- Manage, control, and adjust indirect cost structures and support the generation of annual incurred cost submissions
- Automated processes via artificial intelligence with machine learning

Timesheet Management

- Make it fast and easy to capture accurate labor charges, process approvals, and process labor distribution while reducing administrative, payroll, and billing processing costs
- Prime's labor distribution was designed to support total time (such as effective rate for uncompensated overtime) accounting as well as the Service Contract and Davis Bacon Acts
- Mobile app available for smart phones and tablets, making off-site timesheets, time off requests, and approvals convenient

Expense Management

- Expenses and expense receipts flow through to the project accounting system for improved project costing
- Simplify the travel experience with the ability to submit, review, and approve expense reports on the go with our Prime Mobile App
- Take a picture of receipts on a mobile phone and automatically create an expense receipt from the image
- Supports CONUS & OCONUS per diem rates, including first and last day travel rules

Contract and Subcontract Management

- Tracks and manages contracts, modifications and change orders including funding
- Automates government-compliant billing for all contract types: Cost Type, Time and Material, Firm Fixed Price, and Performance-Based/Milestone
- Provides built-in workflow and approval processes for activities
- Manages and tracks funding of subcontracts, including the ability to manage subcontractor timesheets and expenses

ADDITIONAL CAPABILITIES WITHIN JAMIS PRIME ERP.

Procurement & Vendor Management

- Streamlines the supply chain and reduces the cost of acquiring materials
- Automates the entire procurement process, including: organizing vendor quotes, issuing purchase orders, receiving orders, creating AP vouchers, and analyzing results
- Organizes and simplifies the way businesses gather purchasing requests, obtain vendor bids, create quotes, approve quotes, manage purchases, and fulfill orders

Sales Order Management

- Streamline the quote-to-cash process
- Accelerate order fulfillment and billing processes increasing customer satisfaction
- Use real-time information to control costs across the entire supply and distribution chain.

Inventory Management

- Real-time access to available inventory, inventory in transit, reorder quantities, and inventory costs
- Manages multiple warehouses with location-specific inventory quantities, allocations, and costs
- Multiple Valuation Method allows businesses to value their inventory using standard cost, moving average, FIFO, and item specific method

Asset Management

- Complete visibility into assets and depreciation calculations, as well as provide automated detailed depreciation schedules
- Add Fixed assets From AP purchases, import them From a File, or add them individually
- Contains the Functionality to control government-owned property in accordance with Federal Acquisition Regulation (FAR) 45.000

Customer Relationship Management (CRM)

- Central opportunity management and dashboards for pipeline monitoring
- Account and contact management
- Fully integrated with ERP for full contract lifecycle management and more accurate forecasting
- Optional integrations with MS Outlook and government solicitation websites

Human Capital Management

- Benefits Administration gives the flexibility to define, manage, and adjust benefit plans to match the unique requirements of business
- Automated recruiting makes it faster and easier to acquire the best talent
- Intuitive Employee and Manager Self-Service empowers employees with relevant and operative information

Payroll Management

- Flexible Domestic Payroll
- In-House control combined with outsourced services options
- Integration with Prime general ledger, timesheet management, and your respective benefit carriers.

THE TOP-RATED USER EXPERIENCE

One of the keys to JAMIS' success is that our customers love using the application. If you go to biggest and most established software review sites, G2 Crowd, you'll find that when assessing JAMIS against other solutions, reviewers find JAMIS Prime ERP easy to use, set up, and administer.

Reviewers also preferred doing business with JAMIS Prime ERP overall. This means a lot to us, and we're constantly looking at ways to improve the user experience and innovate to give customers new tools to work with. Ultimately, our goal is for our users to work smarter, not harder.

OVERVIEW OF JAMIS

JAMIS Prime ERP is a next-generation finance & business management software solution designed for federal government contractors and nonprofits. JAMIS provides its customers with a fully integrated, easy to-use, modern ERP solution with the tools you need to compete, win, control costs and grow your business.

In today's challenging business environment, the smartest organizations have clarity across all aspects of their business, allowing them to act quickly with increased insight, efficiency, and flexibility. JAMIS Prime delivers real time information, exceptions and alerts to customizable dashboards that help our customers make winning decisions.

TECHNOLOGY & FEATURES

JAMIS Prime ERP is the most technologically advanced application on the market, built on the award-winning Acumatica XRP platform. Utilizing cloud technology, businesses have access to the application anywhere, and on any device. This elegant and flexible design includes dynamic dashboards, integrated document management, native mobile apps for iOS and Android, strong and reliable security, single sign-on (SSO) capability, and web services APIs. Take advantage of a solution that will adapt to the way each business works, with customizable screens and fields, and personalized role-based views.

JAMIS Prime will provide the tools needed for improved operations, and a foundation for growth.
