

Training

Our clients come to us for our expertise and support with all things related to derivatives, financial risk management and accounting for derivatives. We are at the forefront of what's happening in the industry and to provide our clients with training and education on current topics and concerns. Our team of CPAs and quantitative analysts deliver customized training sessions, both on and off-site, along with webinars on relevant topics.

Flexible training topics and scheduling

Whatever format best fits your needs, HedgeStar can accommodate. If your team wants more in-depth and hands-on training for a specific asset class or topic, we can develop a session around that scope. We deliver training on your schedule, and on topics that are most relevant for your team.

Training topics include:

Accounting for derivatives under FASB/GASB/IFRS

Concepts on derivative valuations

Interest rate risk management

Currency risk management

Commodity price risk management

Hedging strategies for managing interest rate, currency, or commodity price risk

Instrument specific training:

Futures

Forwards

Options

Swaps

Exotic derivatives

Training for every level

Our training can be delivered at any knowledge level. For example, if you need a refresher on swaps, one of our webinar trainings work best. Maybe you're a board member that wants to understand more about derivative hedging strategies? Our sessions are developed with your learning objectives in mind, to better prepare you for your day-to-day job.

Continuing Education Credits

Most training courses offered by HedgeStar qualify for Continuing Professional Education (CPE) credits.
