SENDAI FRAMEWORK

FOR DISASTER RISK REDUCTION 2015-2030

Resilience World Nexus Summit

6-7 October 2026 | Church House Westminster,
London, United Kingdom

Engineering Resilience for
Performance, Protection, and Growth.

rwnsummit.com

Welcome Message

Advisory Committee Chairman

Cedrick Moriggi

Chief Resilience Officer
Group Resilience

At last - a conference that unites all the essential pillars of enterprise: Insurance, Operations, Finance, Security, Risk, and Governance. By breaking down traditional silos, we are building the foundations of a truly resilient organisation - one that protects its people, strengthens its operations, and sustains its performance.

I present to you a programme that places resilience at the core of corporate strategy. From governance to risk, readiness to recovery, we will explore how resilience becomes not just a response to disruption, but a competitive advantage.

This is the kind of event the **resilience community** has needed for years, focused, strategic and genuinely useful.

Konstantinos Stergiopoulos
Chief Security Officer

Nestlé

If you're responsible for keeping your **organisation resilient** in uncertain times, this forum belongs on your calendar.

Marc Vink
Group Head of HSE & Security

ABB

“Systemic risk is the new normal and the Sendai Framework makes clear: resilience must be co-created. The private sector isn’t just a stakeholder, it’s a system-shaper. This forum is a timely step toward unlocking the leadership, innovation, and investment needed to future-proof our economies.”

Dr. Abhilash Panda

Deputy Chief, Intergovernmental processes,
Interagency cooperation and Partnerships Branch

UNDRR

The Premier Resilience Summit

In a world of conflict, volatility, and rapid disruption, resilience is no longer optional—it is a core business advantage.

The Resilience World Nexus (RWN) Summit brings together C-suite leaders to turn uncertainty into strategy. This is where decision-makers meet peers, learn directly from global experts, and gain practical tools to protect value and drive performance.

Get access to high-level discussions, applied masterclasses, and curated networking designed to translate insight into action.

If resilience isn’t embedded in your strategy yet, the cost of delay is already rising.

Endorsements

"In a world where disruptions are the operational baseline, this forum embraces uncertainty, reframes high-impact, low-probability events as strategic realities, and positions resilience as the practical path for leveraging adaptive capacity."

Dr. Gianluca Pescaroli

Professor in Operational Continuity and Disaster Resilience

University College London (UCL)

"In a world where geopolitical and climate risks are accelerating, this summit cuts through the noise to deliver what senior leaders actually need to know."

Dr. Emmanuel Fragnière

Professor of Service Innovation and Risk Management

University of Applied Sciences Western Switzerland (HES-SO Valais)

"Resilience is as much a strategic imperative than it is a complex topic. The opportunity to share best practices with other leaders is essential for everyone involved in this matter."

Antoine Minot

VP Global Security

Novo Nordisk

"This forum addresses a gap I've observed. The need to integrate human rights considerations into resilience planning. From supply chain ethics to community impact, resilience and rights are two sides of the same coin."

Prof. Dorothee Baumann-Pauly

Director

Geneva Center for Business and Human Rights

"As we come together at the Resilience World Nexus, I anticipate invaluable insights and transformative strategies that will propel our resilience efforts, ensuring we're not just prepared for tomorrow's challenges, but ready to thrive."

Marco Mille

Head of Security

Siemens AG

"The team behind this event understands what C-Suite executives value: practical frameworks for business continuity, peer insights, and strategies you can implement Monday morning."

Raj Samani

SVP, Chief Scientist

Rapid7

"A forum that reflects the positioning of Business Resilience away from an operational necessity and towards a strategic asset that features on the Executive Committee's standing agenda."

Richard FitzHugh

Co-chair

UNDRR Corporate Chief Resilience Officers Network

Committee Members

"Finally, a forum built by practitioners that combines theory and practice to promote strategic and tactical thinking from people who've actually implemented resilience strategies at scale."

Dr. Jerry Hart
Global Head of Corporate Security

SGS

Engineering Resilience for **Performance,** **Protection, and Growth**

Today's leaders don't manage resilience - they engineer it.

The RWN Summit brings together the C-suite to turn resilience into a bankable asset that powers performance and long-term value.

Organisational Resilience: Threats and Opportunities

Past crises teach - but they can also mislead.

This track examines emerging risks and opportunities across geopolitics, climate, supply chains, and technology – helping leaders turn foresight into actionable resilience.

Resilient Living, Building Resilient Societies

True societal resilience emerges where business, community, and individual strength converge.

This track explores how organisations can help build resilient communities – from frontier towns to future megacities – tackling the challenges of conflict, climate, and rapid change through innovation and shared responsibility.

Adaptation, Governance and Regulatory Challenges

Regulation is redefining resilience.

From CSRD to TCFD, this track shows how leading organisations are turning compliance into strategy – integrating adaptation planning to boost performance, disclosure, and reputation.

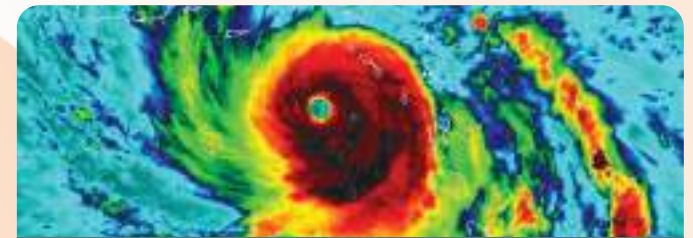

Engineering **Resilience** Across All Threat Vectors

Human-made Threats

Technological Threats

Environmental Threats

We offer strategies, insights and tools to organisations and societies to enable them to **adapt** to evolving **threats** while complying to complex **regulations**

At the Summit, threats and risks are addressed through:

- Keynote speech for each threat vector during plenaries
- Specific sessions in each track
- Dedicated masterclasses

From civil unrest to quantum computing and climate disruption, RWN delivers the intelligence security, risk, and resilience leaders need to protect value in a volatile world. We provide rigorous analysis of human, technological, and environmental threats—clarifying risks, impacts, and mitigation strategies, and showing how the RWN Summit equips leaders to turn resilience into competitive advantage.

| Schedule | Track 1: Organisational Resilience: Threats and Opportunities | Track 2: Resilient Living, Building Resilient Societies | Track 3: Adaptation, Governance and Regulatory Challenges |
|--------------------|--|--|--|
| Opening Plenary | <p>The Rise of Resilience In the past 30 years, resilience has evolved from a technical function within an organisation, to an essential cornerstone of any functioning organisation. Increasingly integrated within strategic execution, resilience today is not just about protecting people, assets, operations - but an essential and embedded element in the development of an organisation's reputation and bottom line. How did this transformation happen? And what developments are happening today and in the near future as the importance of resilience is recognised by investors, customers, and the wider community?</p> | | |
| Morning Sessions | Artificial Intelligence: Friend, Foe, Frenemy or Something else? | People and Communities: Strengthening Societal Resilience as a Sum of the Resilience of its People | <p>Is ESG the Real Driver for Better Resilience?</p> <p>How to be sure you are Good Enough at Resilience?</p> |
| Afternoon Sessions | <p>Locking in Resilience with Blockchain Solution: Real World Applications</p> <p>NextGen Cyberthreats: From Quantum Unlocking State Nexus and Vishing: Are We Ready?</p> <p>Future Proofing your Organisation, the Next Generation of Risk & Resilience Tools</p> <p>Disease Watch: From Avian Flu to Novel Haemorrhagic Viruses: Outlook and Preparation</p> | <p>From Model Village to Megacities of the Future: Engineering in Resilience</p> <p>Vulnerable Frontiers: Innovative Ideas for Cost Effective Resilience in Challenging Environments</p> <p>How Organisations can Work Together with Insurance to Improve Resilience and still Own the Risk?</p> | <p>CSRD, TCFD, TNFD, EUT and ISSB - Resilience in the Alphabet Soup of Regulatory Disclosures</p> <p>Climate Events: Leveraging Insights to Manage Future Risks</p> <p>Measuring Resilience: Leading and Lagging Indicators for Better Performance</p> |
| Closing Plenary | <p>Resilient Supplier Networks: Raising the Game All customers are juggling the competing requirements of supply chain cost, resilience and sustainability. As many organisations have found out, any fragility in the supply chain is most likely to be exposed during the stress of a crisis manifestation. This plenary focuses on work conducted to look at how this trilemma can be resolved to ensure that resilience is not compromised by an over focus on cost, and sustainable practices are in place to balance these competing needs.</p> | | |

Conference Programme

Day 2 Wednesday | 07 October 2026

| Schedule | Track 1: Organisational Resilience: Threats and Opportunities | Track 2: Resilient Living, Building Resilient Societies | Track 3: Adaptation, Governance and Regulatory Challenges |
|--------------------|--|---|---|
| Opening Plenary | <p>Geopolitical review: Ensuring readiness for geopolitical uncertainty today and tomorrow In a climate of interstate conflict, bipartisanship and resource competition, new lines are being drawn to ensure that countries and businesses are able to withstand unpredictable shocks. In this plenary session, we review the challenges of the geopolitical environment today and look ahead to the preparation and adaptation required to predict and prepare for the events of tomorrow.</p> | | |
| Morning Sessions | <p>Early Warnings For All: What are the Latest Tools and Techniques?</p> | <p>Practical Methodologies to Develop and Grow Public Sector Resilience</p> <p>Learning from the Edge: How Emerging Technologies is Empowering Resilience in Emerging Nations?</p> | <p>Assigning a Market Value to Resilience</p> <p>What does a Good Adaptation Strategy Look Like and How Do You Know?</p> |
| Afternoon Sessions | <p>Practical Methodologies for Identifying and Assessing Resilience of Critical Suppliers</p> <p>Modelling Long-term Weather Trends: Practical Approaches to Preparing for Disasters</p> <p>How do we Manage the Skills Gap in Business Resilience?</p> <p>Space: From Communications, Travel, Threats, and Defence. What is the Final Frontier?</p> | <p>Sendai Update: How Communities are Driving Resilience?</p> <p>Societal Resilience Before, During, and After Conflict</p> <p>How to Attract Better Financing through Resilience?</p> <p>Resourcing and Budgeting Resilience to Optimise ROI</p> | <p>Harnessing Technology to Enhance Governance and Assurance</p> <p>Reporting Resilience: What Regulators, Customers and Investors Really Need to Know</p> <p>Balancing and Integrating Regulatory Resilience and Adaption Requirements</p> |
| Closing Plenary | <p>Resilience Outlook: Threats of Tomorrow - Action Today The greatest value of the resilience mindset is the ability to analyse events and anticipate the crises of tomorrow. This foresight enables organisations to invest in the development of tools and techniques to detect adverse events at the earliest stage, and to put in place the tools and techniques that minimise disruption and optimise recovery. We are joined by world experts who can provide a unique glimpse inside the crystal ball.</p> | | |

Masterclasses

A series of closed-door focus sessions providing sponsors and industry partners with an opportunity to deep dive into specific topics with a targeted audience.

Date: 6–7 October
Time: 10:15 - 15:45

Measuring Business Resilience

Developing Good Adaptation Plans

Harnessing AI for Resilience

Supply Chain Resilience

Pre-emptive Analysis of Risk Manifestations

From Cyber Security to Cyber Resilience

Geopolitics and You, Understanding the Big Impact Picture

Workforce, Personal and Youth Resilience

Controversies, Brand Equity and Share Price

Focus on Regulatory Requirements

ARISE Network Development

Financing Public Sector Resilience

“Building a resilient organisation starts with recruiting resilient minds. This summit is the critical forum for cultivating the thinking that defines modern leadership.”

"If you're a Chief Resilience Officer looking to translate risk into competitive advantage, this is where you need to be. The content of the agenda alone makes it essential."

Mark Wolsey
 CEO & Founder

Convergent Risk

RWN's Mission

Investing in education, coaching and training programmes for business resilience practitioners across all organisational levels

Promoting structured professional development pathways in business resilience

Disseminating practical resources, tools and best-practice guidance

Facilitating strategic dialogue among resilience stakeholders, fostering cross-sector collaboration and knowledge exchange

Recognising excellence and leadership in resilience practice through awards and formal recognition

Supporting students, interns and early-career professionals entering the resilience field

Speaker Profile

Chief Resilience Officers

who are inhouse experts from the world's most resilient companies

Government and Public Sector Leadership

making public-private partnership for community resilience

Adaptation and Crisis Practitioners

with track records of implementing programmes that save lives and boost the bottom line

C-Suite Executives

who integrate risk and resilience in business strategy

Risk Experts

who really understand how to turn expertise into business intelligence

Why Register

Develop

Turn risk into a competitive advantage. Build risk-based strategies that align with your business goals and secure leadership buy-in.

Learn

Learn from experts who transform risk intelligence into fully funded resilience and adaptation systems—and know how to get top management on board.

Meet

Connect with global leaders in risk and resilience who turn strategy into scalable, sustainable solutions.

Registration Fees

Delegate Early Rate

Until 31st July 2026

£ 1,850

Delegate Standard Rate

£ 2,200

Sponsor Special Rate

£ 1,650

Why Sponsor

Turn your uncertainty into competitive edge and see risk and opportunity before the rest of the market.

Get access to high level, in-house risk and resilience practitioners

Demonstrate your products and services are aligned to cutting-edge industry challenges

Integrate and share with a community of leading business resilience representatives

Discover proven frameworks for building organisational resilience
