TYPHOON

Trusted Since 47

Typhoon International have been innovators in providing personal protection from the elements since 1947. We have a reputation for the manufacture of exceptionally high-quality marine products, including drysuits, wetsuits, diving suits, lifejackets, buoyancy aids and more.

Today, Typhoon is one of the world's largest drysuit manufacturers. Our drysuit timeline dates to 1976, when we developed the first lightweight drysuit. Typhoon continues to innovate in this field, while the development of fabric technology, product design and innovative new components keep our range of suits at the forefront of design evolution.

Typhoon's leading range of commercial products have been supplied to many organisations working in or near the water, both within the UK and worldwide. These include defence, water and environmental organisations, coastguards, fire brigades, police services, wind farms, local authorities, and search & rescue organisations. In addition to maintaining appropriate approvals, all our products are continuously checked throughout the production process, including relevant performance tests before they leave the factory.

Typhoon's head office in Redcar, UK provides a full in-house after sales service which also includes repairs and servicing.

BESPOKE CAPABILITIES

Typhoon's bespoke capabilities produce lifejackets and drysuits for the ultimate safety of every individual, tailored for each specific activity and branded to represent your organisation or team.

Typhoon has a complete range of off-the-shelf models through the Challenger brand, we are also proud to offer bespoke 'own label' lifejackets to our customers to complement their own branding and product requirements. Typhoon offer the widest possible choice of fabric technologies, buoyancies, inflation mechanisms and logo styling, using the latest designs and technologies available. Bespoke products can be approved to meet the latest UKCA, ISO, SOLAS and MED approvals as required.

Safety is key for every individual who is active on or near the water and we know just how important it is for each organisation to choose what is best for their personnel's often extremely demanding roles on the water.

Customers can select from Typhoon's cover designs and fabrics, such as heavy-duty nylon, durable PVC 'wipe-clean', fire-retardant fabrics or soft and comfortable polyurethane coated nylon for example. Typhoon pay close attention to detail too – a yoke styled for ultimate comfort, belt pouch options for carrying tools, zip, velcro or popper fastener options.

Our designers are fanatical about safety, detail, fit, style and performance. Precise measurements, speed of inflation, the cut and placement of every panel, buckle and harness, all ensure the most comfortable ergonomic fit imaginable and highest standards of safety for both our bespoke

and standard jackets. Typhoon's in-house design team's expertise is based on many years working in tandem with test processes and approval bodies.

Typhoon's lifejackets deliver a superfast inflation speed in the water, turning the wearer onto their backs in less than five seconds. They are designed to keep the head raised well above the waterline for maximum freeboard for easy breathing. Typhoon's sculpted designs give a tailored fit and flexibility that ensures freedom of movement for a jacket users won't notice they are wearing.

Typhoon has extensive knowledge and experience of working with each sector in the maritime world. We have worked closely with our partners in the emergency services, oil and gas and renewable energy markets for four decades, developing market leading designs.

Typhoon also offers bespoke solutions for niche military applications for ground forces to air crew and amphibious operations. Typhoon's low-profile models integrate with combat equipment. These carry a wide range of national and international approvals and have NSNs where appropriate. Numerous accreditations include Typhoon's work as a Design Authority to sections of the MOD.

Typhoon offers selected models, including ISO 12402 and SOLAS approved lifejackets, with integrated personal AIS (Automatic Identification System) MOB units.

WORK BOAT SUIT

A two piece jacket and trouser set designed for everyday use by crew members of work boats, pilot vessels and dock side workers to keep them warm and dry from the elements in normal operation, but with the added benefit of reducing the effects of cold water shock should the user fall into the water.

A fully breathable, hi-visibility, water and wind proof suit, fitted with a removable high collar hood, YKK Aquaguard® zip, glideskin neoprene neck collar and cuff seals, which keeps water from entering the suit at the body, neck and cuffs. The trousers are fitted with ankle and knee straps to reduce flushing of water. Own company logos can be added to suits upon request.

MED APPROVED

OCEAN SAFETY INSULATED IMMERSION SUIT

A SOLAS and MED-approved emergency abandonment suit, designed as an easy-to-don, single-use garment to ensure personnel can evacuate stricken vessels in an emergency situation and aid survival until rescue.

The suit offers excellent thermal protection to the wearer via its 5mm fire retardant neoprene, which is further glued and blind stitched to ensure waterproof integrity.

It also benefits from an integral lifting strop with built-in buddy line, whilst the SOLAS-approved reflective tape, located on the hood and arms aids visibility, which in turn aids recovery. Reinforced soles on the feet, offer increased durability and protection.

Each suit is supplied in its own carry bag, donning instructions are clearly displayed on both the bag and the suit.

FABRIC

- 5mm neoprene (4-way stretch)

FEATURES

- SOLAS approved
- 150cm² retro-reflective tape on the hood
- Full face seal
- 5mm neoprene (4-way stretch)
- Fire retardant
- Oversize zip buckle for easy donning
- Tailored design

CHALLENGER INTERLOCK 275 SERIES III OFFSHORE

The SOLAS approved Challenger Interlock 275 Non Harness is specially designed for the Oil and Gas market constructed using a highly durable nylon cover fabric making it ideal for professionals working in the highly abrasive oil and gas environments.

If stored in the conventional manner ie. hanging in a cabinet - the service interval is every 12 months.

This incredibly lightweight and comfortable to wear lifejacket design gives excellent neck and head support which is particularly vital for an unconscious wearer. With 300 Newtons of buoyancy it is designed to be worn when the user is wearing heavy duty clothing or with an abandonment suit, where it guarantees to self right the wearer in less than five seconds.

The interlocking lobe design also creates an effective wave barrier preventing water channelling into the airways.

FEATURES

- 300N Twin Chamber
- Interlocking bladder
- SOLAS 2010 Approval
- Spray hood fitted
- Lifejacket light fitted
- Single crotch strap
- Packed into foil bag to support extended service
- Whistle
- Lifting becket
- Adjustable fit
- Retro reflective tape
- Compatible with MK1 and MK8 Immersion Suits
- Buddy line
