## Fire & Rescue Tools Product Guide

## Jafco Tools Ltd. *(established in 1981)*

**Jafco Tools Limited are renowned for the manufacture of specialist hand tools for use in safety critical situations.**

No one demands more from their tools than professionals who work in environments where safety and performance are key.

The majority of our extensive tool range features the significant advantages of **Pultruded Fibreglass Handles.**

Jafco is committed to continuous product development and we have conducted extensive research to produce our own high specifications, ensuring that our specialised tools are designed to deliver superior strength, performance and durability in all situations.

We are also extremely active in the field of customer project development, we work closely with our clients to help them achieve their final product goals.

### Pultruded Fibreglass Handles

Jafco handles exceed the relevant British Standards for Fibreglass. Fibres are electrical grade, tensioned, continuous and parallel, with over 70% fibre by mass.

# Fire & Rescue Tools

The Jafco range of tools which feature Fibreglass handles have been developed specifically to improve the performance, safety and stowage restrictions required by the Fire and Rescue Services.

All Fire and Rescue Tools are marked with the Jafco FIRE Logo.

Following research to establish the requirements of the Fire & Rescue Service we carried out extensive tests and trials in collaboration with the major Fire Services.

These developments culminated in an extensive range of tools, including new concepts and designs.

Close contact with the Fire and Rescue services enables Jafco to offer a continually expanding range of specialised tools.

We produce a specialised range of Long Handled and Take-Apart tool systems with yellow fibreglass handles, these can be supplied to any reasonable length with a choice of grips.

# FIRE & RESCUE Fibreglass Fixed Length Specialist Tools
