Touch Screen Friendly Rig Operations Gloves

Style GL-OPS-TS

The *Rig Operations Gloves* provide a balanced mix of high levels of flame protection whilst remaining highly tactile to allow the effective handling of firearms or other fine motor skills such as delicate operations when involved in dealing with trauma patients.

They now come with Touch Screen friendly finger and thumb pads for the modern Tactical Operator. **Also ideal for Drone Operators using touch screen equipment in the field.**

The design of this highly successful product was conducted using feedback from Specialist end users who know how difficult it is to operate in the field whilst wearing hand protection. Double layers of leather and padding at vulnerable points also make these gloves suitable for rope access and light to moderate technical rescue work.

Features:

- Touch Screen Sensitive forefinger and thumb pads
- Flame retardant knitted Nomex™ construction allows breathability & flexibility whilst offering optimum protection from flame to EN 11612
- Black Fire retardant digital kid leather palms and knuckle protection
- Flame resistant Nomex thread
- Padded heel of the hand & back of the hand for shock absorption
- Ergonomically designed dual layer leather palms
- Double layered construction on areas vulnerable to wear & tear
- High, elasticated cuffs for added protection from debris
- SensiTouch fingertip construction allows optional removal of leather fingertips
- Available Sizes XS- XXL
