## Wildland Fire Protective Suit-EN 15614

It is highly impractical and uncomfortable for Fire fighters engaged in combating Wildland Fires, RTC extrication, Rope Access or Medical Response to wear structural firefighting garments.

They are cumbersome and encourage the quick onset of fatigue and dehydration for the operators wearing them.

Operators engaged on these deployments require ergonomically and practically designed garments which are fit for purpose.

To meet this need, Rig Equipment Limited have developed four ergonomically and practically designed garments which are fit for purpose. They provide all the necessary protection for the tasks in hand, yet they are light and comfortable to wear in the most extreme of environments.

**Please contact us for further information.**

**Made in UK**

### Jacket Features:

- Front closing with channelled zips and under flap.
- Two radio/torch chest loops with Velcro pull tab flaps.
- Left arm pocket with Velcro flap over.
- Two debris excluding hand warmer pockets
- Collar with Velcro throat tab, which can be high or standard position.
- Fully adjustable Velcro strap at cuffs with self fabric thumb loop.
- Double thickness elbows, with Kevlar high abrasion resistant material.
- Internal zip skirt for joining together with trousers.
- FR yellow silver yellow and plain silver retro reflective tape.

### Trouser Features:

- Zip fly with Velcro fastening waist band extension.
- Elasticated waist band with 25mm removable elastic braces with slide release buckles.
- Zip for joining together with jacket.
- Two side thigh pockets with Velcro fastening flaps.
- Internally located Tuff cut scissor pockets.
- Double layered re-enforced crotch area.
- Extended double thickness to front of knees and legs with high abrasion resistant material.
- Waterproof Knee area and pockets with full length fixed knee pads (included).
- Zip gusset at leg bottom with Velcro strap adjuster.
- Twin bands of FR yellow silver yellow and plain silver retro reflective tape.

A comfortable, light weight, single layer suit that offers maximum protection and optimal temperature regulation.

Manufactured and certified in the United Kingdom to provide protection to the latest European standard, EN15614:2007 A1. They are easily cleaned in a domestic washing machine and long-lasting. The fabric weights and colours have been carefully chosen to provide the right balance of protection and comfort throughout various regions of the world.

We have certified this range of Wildland firefighting garments in two premium quality branded materials. The Protal rip-stop 280g/ms material used in the makeup of these garments provides optimum protection with maximum comfort for those who prefer a slightly heavier garment and the Nomex Comfort rip-stop 220g/ms material which provides a slightly lighter weight ensemble for more temperate climates or for those who prefer the lighter garment with the tried and trusted Nomex Comfort brand.

Available as a 2 piece suit and 1 piece coverall. All of our garments are made to order and we supply a self-measurement guide.
