HAAS ALERT

A New Era in Connectivity is Here

Safety Cloud is the largest and fastest-growing connected car platform, bringing millions of motorists, vehicles, and roadway assets together in a unified network for real-time communication and collision prevention.

Roadways are unpredictable, and changes can happen in a moment's notice. Safety Cloud delivers in-dash alerts to drivers as they approach emergency vehicles, work zones, roadside incidents, and a wide range of other specialty vehicles and hazards.

An Enhanced Driver Experience

Safety Cloud provides drivers with the most advanced V2X experience on the road, while serving as an offboard ADAS sensor for preventing collisions and reducing distracted driving. Safety Cloud data is optimized and delivered over everyday cellular networks, enabling deployment and functionality anywhere your customers drive.

SAFETY CLOUD

On-Board Sensors

Safety Cloud is a software-only implementation customizable to any automaker and deployable on existing cloud and vehicle technologies.
