

Multimedia redaction with unrivalled accuracy and speed

The advanced redaction solution to transform the video evidence process in UK Policing

Integrate Secure Redact to advance your DEMS capabilities

Integrate Secure Redact – the optimum solution for advanced automated redaction – into your DEMS platform to bring world-class automation together with specialist and intuitive user tools for review and editing of video for redaction. Purpose-built to augment redaction capabilities over that of existing basic redaction in DEMS platforms, Secure Redact is proven to reduce video processing-time, speed up operational efficiency and free up valuable time to focus on other critical projects.

Key features:

- ✓ **Automatic** detection for redaction of faces, heads and/or license plates.
- ✓ **Intelligent tracking** for redaction of user-identified objects.
- ✓ Blur specific areas of the video.
- ✓ Selective **audio** redaction.
- ✓ Single sign-on support and connect to private cloud storage.

Enterprise capabilities

- ✓ Large volume video processing.
- ✓ Multiple users across sites and teams for collaborative projects.
- ✓ Automated and secure bulk upload, redaction and download from/to your private cloud.
- ✓ Custom feature options, SSO and API integration, data deletion and additional file formats.
- ✓ Admin management capabilities, reporting, invoicing and support.

Video Right of Access Requests

Equip Information Access teams with a reliable video redaction tool that easily blurs video within the allotted deadlines.

Digital evidence presentation

Quickly redact all video evidence before sharing it with the Crown Prosecution Service. Once approved, edit to unredact certain individuals ready for court.

Deliver trust and confidence

Be even more proactive around community engagement by responsibly showing redacted stop-and-search videos to the public.

Benefits and commercial model of Secure Redact

Licensing is based on an annual fee of usage

An annual fee secures a volume of video redaction hours that can be shared across all teams within a force.

Already integrated into various DEMS and VMS platforms

Deployed directly into your private Azure tenant for InfoSec confidence.

Significantly reduces manual work, costs and resources

Police officers, Information Access and Response Investigation Teams can fulfil all redaction needs within their constricted time-frames.

To redact 10 minutes of CCTV for a Right of Access request, it would take:

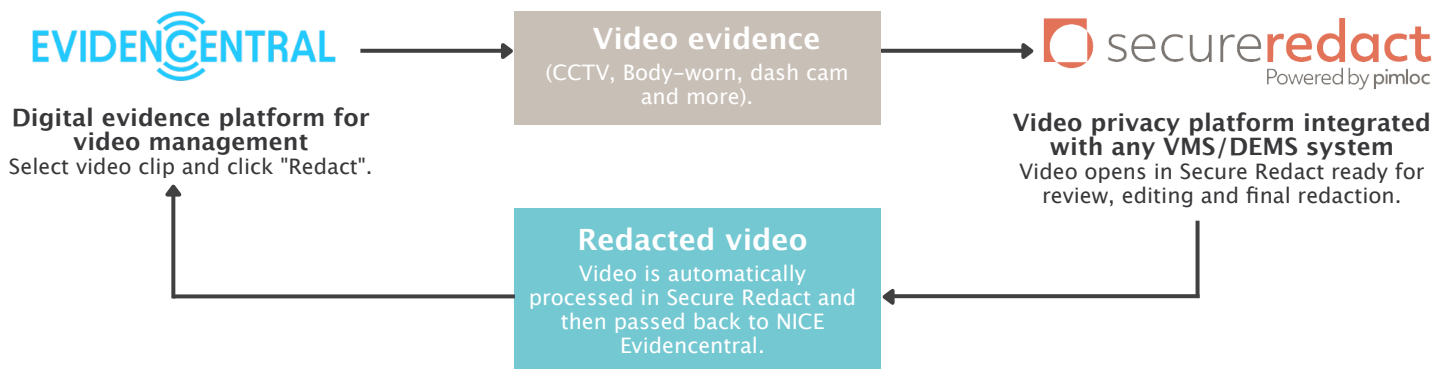

8 HOURS
With video editing software

VS

10 MINUTES
with Secure Redact

*The scenario assumes a medium-busy CCTV scene + video editing carried out by a Security Manager for 8 hours a day using traditional video editing software

Secure Redact into NICE Evidencentral: a fully integrated and automated video workflow

Key DEMS and VMS platforms such as NICE Systems, Milestone Systems, Eagle Eye Networks and others have chosen to integrate Secure Redact into their platform to provide new capabilities or to augment any existing basic redaction capabilities.

Pimloc's Secure Redact can be deployed into any private Microsoft Azure tenant, with partnership support from Microsoft – to facilitate secure video data processing and speed up operational efficiency.

Secure Redact is procured and purchased separately to your chosen DEMS platform – contact us at partner@pimloc.com to discuss your requirements further.
