

BREACHER

FR

TACTICAL SPECIALTY HAND PROTECTION

The Breacher is a flame-resistant tactical glove designed to protect the hands of military and SWAT team members during forcible entry and high-risk operations. A one-piece knuckle guard molded with dense Thermoplastic Rubber (TPR) protects the back of the hand and D30® palm padding absorbs impact to reduce hand fatigue in the field. When handling lethal and non-lethal explosives, military and SWAT team members are protected by flame-resistant Nomex® and high-dexterity FR goatskin leather. The Breacher's 0.6mm FR goatskin leather palm maintains connectivity in the field with touchscreen capable technology in the palm of your hand.

IMPACT PROTECTION

One-piece Thermoplastic Rubber (TPR) knuckle guard and dedicated finger guards reduce impact injuries.

FR LEATHER

High-dexterity 0.6mm FR leather provides flame resistance.
