PROMAT FOLDABLE MATS

This versatile folding mat is ideal for PE and basic gymnastic work in a school, club or at home. Similar to the heavy-duty lightweight mat, it is constructed from a lightweight, but shock absorbing foam core that is wrapped in a tear resistant sewn PVC cover and superior anti-slip base for extra durability. Comes with carry handles and hook & loop connectors so the mats can be joined together.

SKU	Size
FOLDING10	3.04m x 1.22m x 50mm
FOLDING8	2.44m x 1.22m x 50mm

PROMAT TUMBLING MATS

Tumbling Gym Mats are ideal for nursery, infant and primary schools. Each mat has a hook and loop connector allowing them to be made into a larger area or to be used individually. Our tumbling mats are produced from a closed cell polyethylene foam with good shock absorbency. This type of foam makes each mat lightweight and easy to transport. Each mat is constructed using a durable, fire retardant, wipe clean PVC cover.

SKU	Size
PM003L	1.2m x 0.6m x 40mm
PM004L	1m x 1m x 40mm

PROMAT CRASH MAT

Crash Mats are specially designed for landing, tumbling and general sport applications. The mats are made from a soft, but shock absorbing PU foam. The zipped cover is flame retardant and made from heavy duty nylon reinforced PVC. The mat also comes with anti-slip panels on the base, breather holes so air can escape, carry handles for easy transportation and toggles so mats can be linked together to make larger areas.

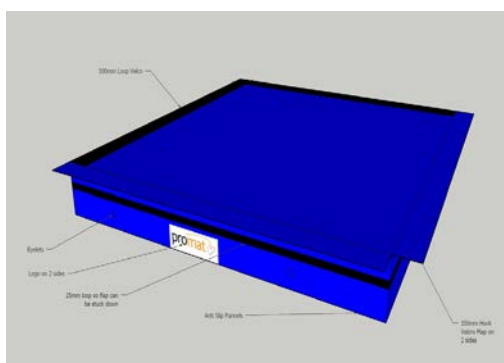

SKU	Size

PROMAT CARPET ROLL OUT MAT

Carpet roll-out mats have long been popular in Gymnastic & Cheerleading clubs for their ease of use, durability and light weight design. The new roll-out system allows Gymnastic floor areas to be set up or taken down in minutes. Perfect for multi- purpose facilities where mats have to be moved in and out frequently such as school or Leisure Centres.

- The carpet roll-out mats come with a Heavy-Duty Carpet Top Surface. Whilst being heavy duty and resilient the carpet finish still remains soft.
- Manufactured using a high-density cross-linked XPE foam. Lightweight and easy to transport.
- The Crosslinked XPE Foam is great for shock absorbing and gymnastics.

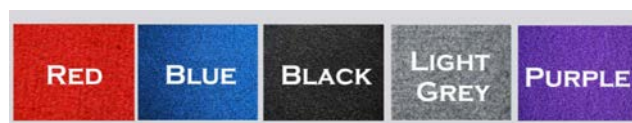

Size

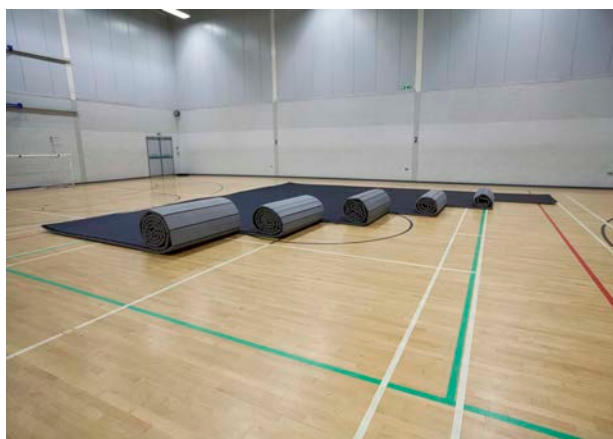

6.4m x 1.82m x 35mm

12.8m x 1.82m x 35mm

Colours Available

PROMAT HYBRID ROLL OUT MAT CONNECT

The connecting system with a hook and loop fastener makes setting the mats up even easier than before with no need for any tape. Simply put one flap over the other between the mats and you will have a seamless matting area set up in minutes. The Hybrid Roll Out Mat Connect is manufactured using a high-density cross-link foam – using tiny air pockets to cushion the impact from falls and take-downs.

- Perfect for Multi-Purpose facilities.
- Large areas can now be set up or taken down in minutes.
- Lightweight, easy for transportation.
- Manufactured using a high-density cross-link foam.
- Heavy duty tatami PVC surface.

Size

3m x 1.5m x 40mm

6m x 1.5m x 40mm

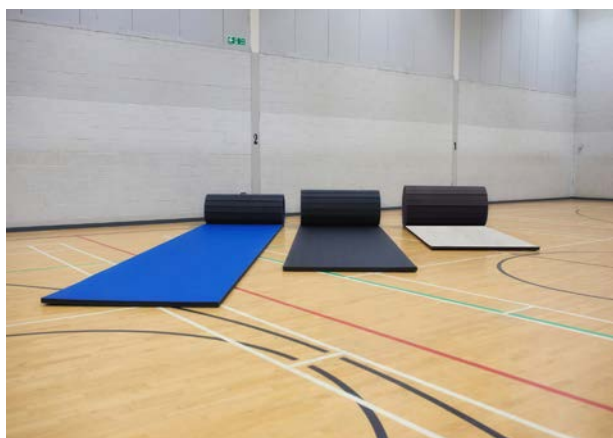

9m x 1.5m x 40mm

12m x 1.5m x 40mm

Colours:

PROMAT HYBRID ROLL OUT MAT

Since first launching our Roll Out Mats have quickly become one of our most popular products, and it isn't hard to see why! They are an all-purpose mat designed for use anywhere from schools to leisure centers to martial arts clubs. They are the ideal mat for places where matted flooring needs to be installed and removed regularly to make way for different events or sports.

Full specification:

- Large areas can now be set up or taken down in minutes.
- Lightweight, easy for transportation.
- Manufactured using a high-density cross-link foam.
- PVC is a perfect cross between a tatami and smooth surface giving the best of both worlds.
- Low-profile tatami emboss offers a sufficient amount of grip for kicks while making it less likely to get burnt when grappling.

3-SIDED FOAM PLYOMETRIC BOX

The 3-Sided Foam plyometric Box is a new product from Foams4sports and is ideal for using in gyms. It measures 30" x 24" x 20". This product is purpose built for developing explosiveness and power by doing core exercises.

At a height of 20" minimum this is for intermediate level of athletes upwards for performing box jumps. The biggest benefit of box jump training is the reaction of fast- twitch muscle fibres throughout the body. The higher you jump the more muscles are used

SKU	Size
PLYOMULTI	0.76m x 0.61m x 0.51m

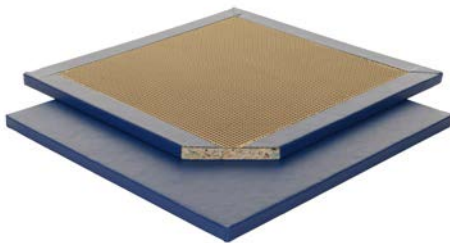

FOAM PLYOMETRIC BOXES

The advantage of Foam Plyometric boxes over more traditional one is less chance of injury. Foam boxes are firm enough to stay in place but will not hurt your shin if you miss your jump. Jump vertically from floor to box and incorporate different techniques to diversify your work out. With Plyometric boxes you can develop explosive power, and increase agility and manoeuvrability. They are excellent for training in MMA, Boxing, Rugby and any sport that requires explosive strength. Supplied as a set of 4 boxes of varying depth to take you from beginner to advanced and beyond. An excellent addition to any cross-training fitness regime. Ideal for gyms and personal trainers.

GYM PIT FOAM AND LOGS

Foams 4 Sports are a leading UK manufacturer of high-quality Gym Pit Foam. We have many years of experience and expertise helping to keep users safe. Gym Pit foam blocks are the perfect choice for gymnastics facilities, trampoline parks, training gyms, or for practicing extreme sports like BMX, motocross or skateboarding. Gym pit foam can be produced as cubes or logs and is manufactured at our factory in Manchester using various high-quality flame-retardant polyurethane foams. We never cut any corners and give the utmost attention to detail to ensure a great end product produced under an approved Quality management system to BS 9001:2015.

- **Sky Blue Olympic 33 kg/m³ Density** – Highest density foam logs/cubes for extra life expectancy. Ideal for BMX and gymnastic pits with heavy use.
- **White Superior 30 kg/m³ Density** – Superior foam grade with excellent physical properties. High-Density foam with good physical properties for high life expectancy. Ideal for BMX and gymnastic pits.
- **Grey Superior 28 kg/m³ Density** – Most suitable for Gymnastic Pits. Higher density than the Grey standard which gives it better physical properties.
- **Grey Budget 25 kg/m³ Density** – Standard grade foam is best used in conjunction with socks to ensure the longevity of the foam cubes/logs.
- **Coloured foam 24 kg/m³ Density** – We now also supply coloured gym pit cubes or logs in Deep Blue, Red, Yellow or Green! High Tensile, ideal for trampoline parks.

PROMAT GYM PIT EDGING

Health and safety legislation states that there should be no hard edges left uncovered in gym pits. This is why gym pit edging is an essential piece of equipment that helps ensure activities can be carried out in complete safety. Gym pit edging will help guard against injuries from miscued jumps and accidental slips and falls. Our Gym Pit Edging is available in a range of colours that can be matched to the branding of your business or club and comes in up to 50mm thick foam.

PROMAT GYM PIT BASE FOAM

When you add Gym Pit Base Foam to your foam pit it will help improve the lifespan of the logs, cubes and gymnastic foam blocks in it. The 300mm foam provides your logs, cubes and gymnastic foam blocks with an increased level of protection which means they will last longer and do not have to be replaced as often which is a definite cost-saving.

GYM PIT SOCKS

If you are looking for something to store or transport your foam cubes and logs in then our high-quality gym pits socks are ideal. Our gym pit socks have 100% recyclable flame resistant covers and come in a range of colours. They also have high strength polyester strings that provide our gym pit socks with a secure closing mechanism.

- All fibres and yarns we use are certified to a STANDARD 100 by OEKO-TEX
- Easy-care, low-crease and dimensionally stable
- High abrasion resistance
- Kind to the skin
- High strength polyester strings
- Wide range of colours available

TRAMPOLINE FRAME PADDING

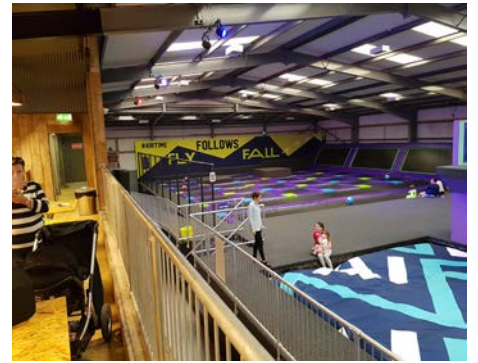

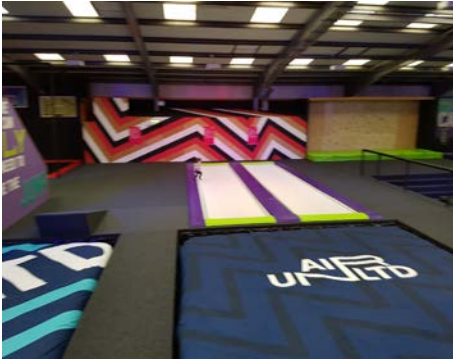

Our framework padding comes in many a form. We make all pads from a high-density foam core which is covered in a heavy-duty PVC cover. These PVC covers are available in a wide range of bright colours to perfectly match your branding.

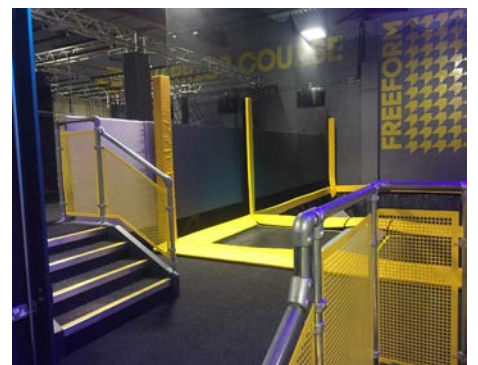

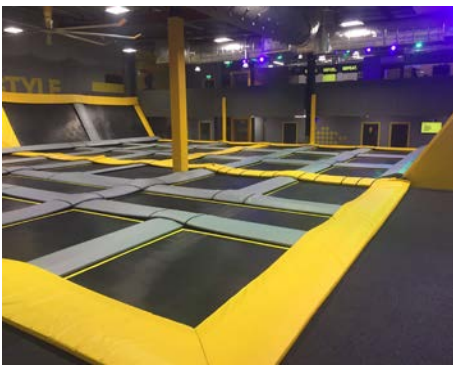

Frame Padding comes with various fixing methods to suit your needs. New safety guidelines are now available for trampoline parks. It is imperative safety requirements are met. Foams 4 Sports' framework padding is built in accordance with the new Standard PAS (Publicly Available Specification) 5000:2017

SKU	Size
PARKNS2	65cm x 65cm x 70cm

PROMAT BOULDERING WALL CARPET & PVC MATTING

Bouldering is a form of climbing that is limited to 4.5m. For safety and protection, it is recommended that bouldering mats are used when practising bouldering; the mat gives climbers the encouragement to go further knowing they have the safety of a mat to fall onto, reducing the risk of any injury. Climbing Wall Matting are the leading manufacturers of high-quality bouldering wall mats in the UK. Bouldering wall mats offer protection when climbing with ground fall potential.

Promat bouldering wall matting is ideal for indoor bouldering areas and climbing walls for both commercial and home use. We custom make bespoke bouldering wall matting to any shape and size with a combination of different density resilient foams to resist the impact of landing, helping to reduce the likelihood of injury. The use of dual-density foams with a firm top layer makes it easier to walk on and prevents ankle roll and helps to prolong the life of your matting.

Promat bouldering matting is manufactured in modular units and designed to fit your floor area with as many standard sizes modules as possible. This means you have the ability to “swop” around modules which are in a high usage situation to increase the longevity of your bouldering matting area. Individual modules can be replaced if and when necessary. All modules are manufactured with heavy-duty flame retardant PVC covers connected using PVC bandages which removes any gaps. An option of a PVC wear to cover or heavy-duty carpet to lay over the top of the modules is recommended for added durability.

Promat bouldering wall matting is durable, with safe foam for comfort and impact protection – comply with BS EN 12572-2:2017 – Artificial Climbing Structures – Part 2: Safety Requirements and meet a 5m Critical Fall Height (CFH) in accordance with BS EN 1177:2008. All foams used are flame retardant and meet BS5852:Part2:1982 High Hazard.

PROMAT ARTICULATED MATS

Designed for use on a rope or traverse climbing walls used in climbing centres, schools, universities and other sports facilities. When in use Promat Hanging Mats offer cushioned flooring when dismounting from the wall and are simple to raise and lower.

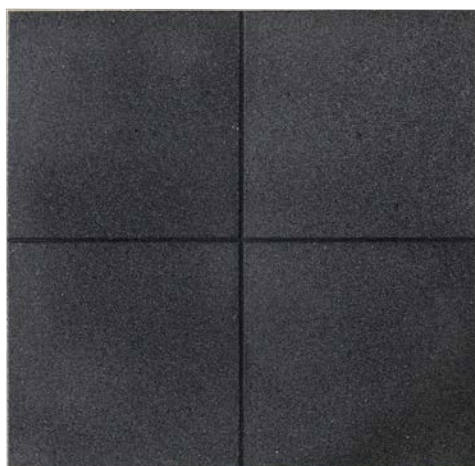

When not in use they are folded upright to protect the wall from unauthorised climbing use and to allow the floor area to be used for other sports activities.

Standard Sizes

- 2.0m x 1.0m
- 2.0 m x 1.5m
- 40mm and 50 mm thick
- Other sizes/widths are available to fit all situations from 0.2m up to 2.0m

Constructed using lightweight but high-quality shock absorbing rigid foam encased in heavy-duty zipped flame retardant PVC covers. Supplied with metal floor fixings and bungee wall fixings.

PROMAT RUBBER TILES

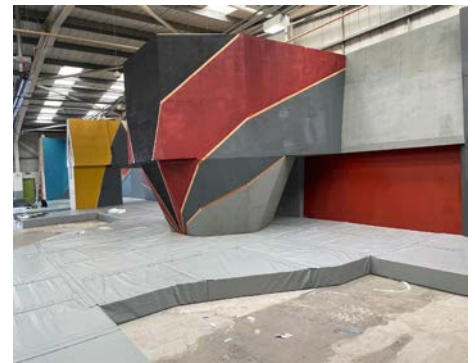

Promat Rubber tiles for climbing walls are ideal for those who are looking for new options to cover outdoor areas such as underneath Traverse Wall Panels or low-level climbing walls.

These rubber tiles are eco-friendly and are recyclable. They are non-slip and water-resistant. They are easy to install and come in seven thicknesses with corresponding critical fall heights. All Promat Rubber Tiles are moulded with a shrinkage allowance with a nominal size of 1015 mm x 1015 mm (1 m²).

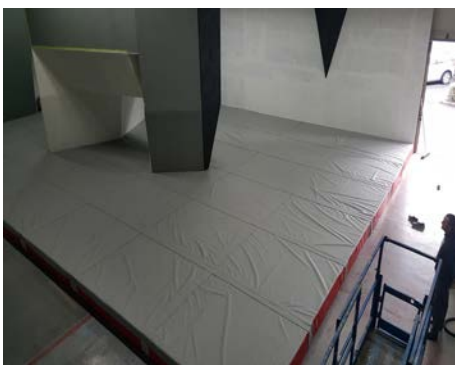

Can be supplied with ramped outer edges to minimise any trip hazard around the area.

Thickness	C.F.H.
20mm	0.59m
30mm	1.14m
40mm	1.20m
50mm	1.50m

PROMAT SCHOOLS HIGH JUMP MAT PRO – 3 MODULES

The schools high jump mat pro consists of 3 separate modules which are connected together to form a 5m x 2.5m x 510mm landing area.

Each module is only 2.5m x 1.66m x 510mm and weighing approx. 35kg each making them easy to transport and put in storage

The Schools Pro High jump mat comes with cut outs for the high jump stands and comes with either a PVC coverall or 50mm thick spike resistant wear sheet to make the thickness of the mat 560mm

All landing areas come with carry handles, connecting straps and breather holes to allow rapid air displacement for a softer landing.

SKU	Product
HJ002CA	5m x 2.5m x 510mm with Rain Cover
HJ002WS	5m x 2.5m x 560mm with Spike Wear sheet
HJ006	Spike proof Wear sheet only
HJ007	Rain Cover Only

PROMAT SCHOOLS HIGH JUMP MAT – 7 MODULES

The School High Jump Mat is manufactured by our parent company, Foams4sports Ltd, who have had years of experience in designing and manufacturing landing areas in the UK for specialist Athletics Stadiums and school sports equipment. This allows us to offer the best prices in the marketplace while maintaining the highest

This Schools high jump mat is ideal for use in both primary and secondary schools. It consists of 7 separate modules that can be connected together to make a 5m x 2.5m x 510mm area. Not only does the smaller modules allow it to be easier for the High Jump Area to be put back into storage, but the modules can also be used as small crash mats for other sports like Gymnastics and Karate etc.

The module dimensions are:

- 2.5m x 1.66m x 255mm A Modules (3 off)
- 2.5m x 1.25m x 255mm B Modules (4 off)

The school high jump mat comes with a PVC coverall or 50mm thick spike resistant wear sheet to bring the total height of the landing mat to 560mm

SKU	Product

GM003	4.9m x 0.91m x 25mm

FOAM SPORTS PITCH DIVIDERS

Foam dividers are the most cost-effective and efficient way to divide you're playing pitch. Limiting or shrinking the pitch allows a player to experience more touches, and also helps them to develop special awareness along with individual skills. Foam Dividers are designed to easily divide your area in width, but they are also perfect for containing drills.

Made with high-density foam, with a heavy-duty PVC cover and hook and loop connectors, our Foam Dividers are built tough. In addition, they are light and easy to man oeuvre to wherever needed for your specific needs, so setup and take down is made easy.

Panels come in various heights, lengths, and are easy set-up and take-down. Our panels are perfect for dividing ice rinks, sports fields and sports courts, so go ahead and create your perfect training space with Foam Dividers!
