

CPD and Training Seminars

Hair Drug and Alcohol Testing – Determining Parental Substance Use

- / **Duration:** 1 hour
- / **Cost:** Free of charge
- / **Location:** Virtual
- / **Details:** To outline the evidence drug and alcohol testing can provide when assessing parental substance use. On completion of the course, delegates will understand the benefits and limitations of drug and alcohol testing and will be equipped with the knowledge to instruct appropriate testing.

The Seminar...

- / Covers the benefits and limitations of hair drug testing and its use in family law
- / Discusses best practice in hair alcohol testing and its appropriateness for court
- / Details hair growth rates, profile of drug use and the relevance of detecting metabolites
- / Explains DNA Relationship Testing and SCRAM Continuous Alcohol Testing™
- / Provides an opportunity to seek clarification on specific queries
- / Can be used as part of your CPD learning activities

Speaker Profile:

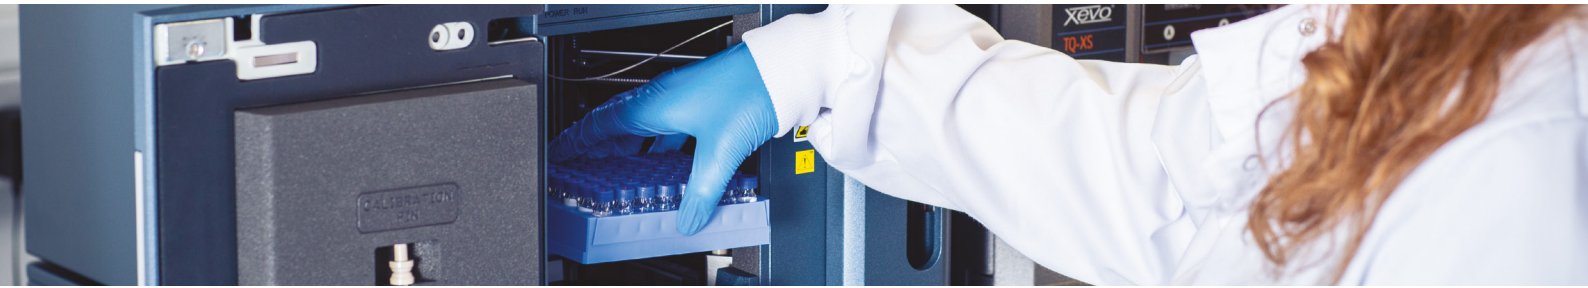

Liam Feasey has over 20 years' experience in drug and alcohol testing after gaining BSc (Hons) and MSc degrees in Biology. He started his career in a forensic toxicology laboratory, analysing human biological samples for the detection of drugs and alcohol.

For the past 15 years, Liam has been providing advice and guidance to solicitors, local authorities, judges, barristers and sheriffs. Drawing from his laboratory experience, Liam provides presentations to educate on the most appropriate testing options for the detection of drugs and alcohol in hair.

Liam holds a PgCert in Forensic Science, is a UKAS trained quality management system auditor, a member of the Society of Hair Testing (SoHT) and an Affiliate member of The Chartered Society of Forensic Sciences (MCSFS).
