

Simpson Associates Data Science Proof of Concept

Helping organisations to explore, quantify, and prove the value that data science can bring to their data function.

What is the Simpson Associates Data Science Proof of Concept?

Data science has the capability to transform almost any area of your business – if you're able to harness it in the best way for your organisation. Simpson Associates have developed the Data Science Proof of Concept as a standardised approach to solving bespoke problems.

Due to the exploratory nature of data science, spending precious budget on what might seem like uncertain outcomes can seem daunting, which is where our Proof of Concept comes in.

Discover the feasibility of solving a business problem with data science, by developing a use case without committing excessive budget, time, effort and resource, and with guaranteed insights for action.

Data science solutions have a wide variety of applications, and with the Proof of Concept you can see where data science can add value across your business functions and operations.

Benefits & Deliverables

- ✓ Immediate and actionable insight based on the problem statement and model performance.
- ✓ A costed plan for enablement and productionisation activity (eg. Data platform, integrations, data quality).
- ✓ Validation that the problem is solvable using data science methodologies, and how best to go about doing so.
- ✓ Quantification and evidence of the viability of a data science solution based on your current data maturity.
- ✓ Provision of a 'PoC sandbox' on our own Azure tenancy where you don't have one.
- ✓ Input and knowledge transfer from our vast data science experience.

Who should use the Simpson Associates Data Science Proof of Concept?

It is ideal for organisations that:

- ✓ Want to develop a data science use case without committing excessive budget, time, effort and resource.
- ✓ Want to explore how valuable data science could be to their organisation.
- ✓ Don't have in-house data science resource to explore the use case.
- ✓ Are looking for a costed plan for enablement and productionisation.

Data Science Proof of Concept deliverables

Our Data Science Proof of Concept will explore a use case to assess the feasibility of using a data science approach.

- Solution scoping workshop
- Feasibility plan
- Actionable insights
- Solution evaluation workshop
- Honest & reliable assessment
- Costed plan

Outcomes

The Data Science Proof of Concept can help you explore the value of data science for your organisation. With an actionable roadmap and costed plan, we can help you fully understand the opportunity for productionising the model without the need for heavy investment upfront.

Why Simpson Associates can help customers on their AI & Data Science journey

Simpson Associates' team of AI & Data Science specialists brings proven experience and deep industry knowledge to any project. We've helped businesses of all sizes across diverse industries harness the power of AI & Data Science to achieve remarkable results. Forget the one-size-fits-all approach, tailoring solutions that fuel your organisational goals.
