

Certified Ladder Inspections

On all types of Ladders to all European & BS standards

Our on-site ladder service covers the inspection of all access equipment located on your premises, from general ladders, step ladders to machine stairways, scaffold towers and working platforms.

We provide on-site inspections, repairs and testing for all height access equipment to the required EN standard.

As we are part of Europe's Largest Ladder manufacturer all our engineers are fully certified to undertake all aspects of this work "On All types and standards of ladder".

How Frequently Should Ladders Be Inspected?

It is recommended that ladders and steps, that are used on a daily basis, should have a written, recorded inspection by a competent person every 3 months. As part of the Provision and Use of Work Equipment Regulations 1998 (PUWER), This can be done by your own personnel if required as long as they are competent with the item.

With a full inspection and test Annually by a qualified individual, all employers, managers have the responsibility to provide employees with correct equipment for the task and, more importantly that this is safe and fit for purpose.

H&S requirements state that accurate records of these inspections and tests must be recorded and kept, and that the equipment is maintained and used in a safe way to prevent any serious injury or even death.

Replacement and Quality Repair Of Faulty Ladders

Any damaged equipment **MUST** be repaired or taken out of service and replaced.

Fire Ladders & Equipment if required can: remove damaged/faulty items and provide new replacements.

Why choose Fire Ladders to carry out your inspections?

- In the UK we have an experienced team of inspectors and as a company have been carrying out "Approved" ladder inspection since 2009.
- Fire Ladders are the "**only**" Company within the UK that offers a full package! for all ladder standards and types:- Fire Service, Industrial, Trade and Domestic.
- We provide on-site ladder inspections and at your request carry out repairs on any damaged items.
- Any new items purchased from Fire Ladders will be delivered to your site already tagged and added to your ladder register.
- Inspections can be carried out as frequently as the client requests; at 3 monthly up to Annual intervals,
- All items will be given an individual ID reference number.
- We will contact you approx two weeks before your next visit is due and arrange a convenient time and day to attend.
- Every product that we inspect will receive a new ID label showing the date of the inspection. and if required, 'Next Inspection Date'.
- After each inspection a detailed report will be sent via email clearly showing the status of each item and what took place on the inspection.

Please contact us to discuss your individual or specific requirements.
