MSc Counterterrorism, Risk Management and Resilience

Full-time/part-time

Developed in partnership with Pool Re, the MSc Counterterrorism, Risk Management and Resilience should appeal particularly to candidates who are either serving or recently retired from government, military or policing agencies, or those who are already in the risk management or insurance space who want to specialise in counterterrorism risk management and protective security.

This course provides students with the fundamental knowledge, core expertise and evidence-based methodological tools and approaches necessary to understand, analyse, prevent and mitigate terrorism.

This development reinforces Pool Re's investment in Risk Management programmes and projects and builds on Pool Re's co-sponsorship of the Professor in Terrorism, Risk and Resilience and their long term strategic relationship with Cranfield.
