

# Arktis

DESIGNED & ENGINEERED IN THE UK  
EST. 1985

RANGE DIRECTORY  
VERSION 6.0

## THE ARKTIS BRAND STORY

The Arktis brand was created in 1985 by a former British Royal Marine Commando, determined to improve the function and performance of the standard issue combat uniform. Arktis has developed a specialist reputation for designing and engineering some of the best quality, functional clothing & equipment out there. Arktis' iconic smocks, jackets, tactical vests and specialist gear have been tested to the extremes by the Military, Special Forces and Emergency Services in the toughest environments around the world.

We believe it's of the utmost importance that the men and women on the front line are well equipped to deal with any potential hazards they might face in everyday life. We've made this seemingly simple task, our mission.

# YPO®

We are ISO 9001:2015 accredited, meaning our quality management systems are of the best standard, ensuring you get the best product and service possible.

We are an authorised supplier of the YPO framework for foul weather clothing. If your Police force is part of this, it allows purchasing our products much easier.

## BESPOKE DESIGN SERVICE

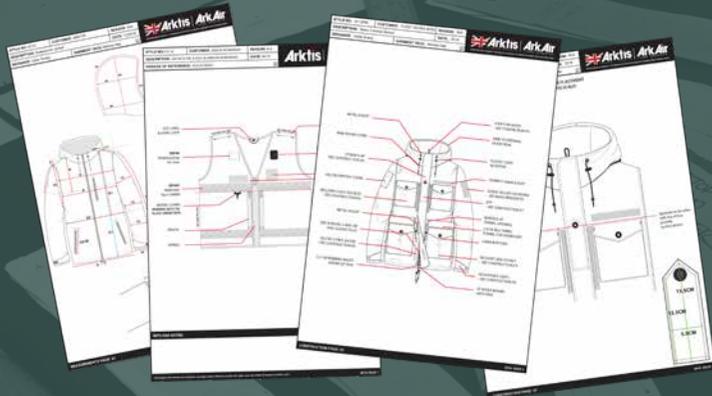

We've always been your local shop, that you can call in to when you need a special or bespoke piece of equipment or kit. That's a service we want to keep alive, even though it is very niche, it's the heart and soul of what we do. Its only through designing, and redesigning, that we can better our products. In turn bettering our offer to the brave men and women who take to the front line every day to protect and defend us. We will always strive for excellence, because when lives are on the line, you want nothing less.

### How to order:

Contact our head office with a clear idea of the equipment. Our sales & design team are ready to help with any requirement or variation to the main product line that you may have. We have a vast list of past projects and the majority of the time we will have something very similar to your request.

MINISTRY OF DEFENCE

DEVON & CORNWALL  
CONSTABULARY

Arktis has a long history in camouflage. Comb (Arid/Blizzard/Urban) and Tundra are unique camos created by our in-house design team. On this page is our core line of camos & colours that we actively print & stock. However, the front line is constantly changing, so it's important to be able to adapt & meet the requirements of future terrains. Our dynamic design team can create, redesign & print many other camouflages, providing the order is of viable size.

### Ripstop (RS)

Made from 50% Cotton, 50% Polyester. Ripstop is used mainly for clothing and has a DWR (Durable Water Resist) finish. The distinctive cross weave design prevents tears from spreading if punctured. Due to the high cotton count our ripstop it has No Melt/ No Drip properties. Permethrin & wicking finishes are also available on request.

### Nylon Minirip (NM)

The lightweight alternative to Ripstop featuring the same cross weave design. Suited especially for packable garments such as our classic A192 Stowaway shirt. It includes a DWR finish to provide protection from the elements in the lightest form possible.

### Nylon Cordura (NC)

Used primarily for backpacks, pouches, and vests. This high tenacity fabric is known for its extreme durability and resistance to abrasion, tears, and scuffs. Available in multiple weights such as 500D & 1000D to suit its desired purpose best.

### Polyester Mesh (PM)

Used mainly in the main body of our tactical & Load Bearing Vests (LBV). The mesh allows for maximum airflow whilst maintaining durability and high load weight. It is also seen in our ghillie suits to allow vegetation to be threaded through its holes.

A110 Hot Climate Shirt

FEATURES & BENEFITS

- Rear vents for better ventilation.
- Mesh lined vents for comfort.
- Dual access chest pockets for access in tight spaces.
- Low profile arm pockets with loop patch.
- Two zipped chest pockets.
- Buttoned shirt with press stud collar.

SIZES: XS-3XL

A112 Short Sleeve Shirt

FEATURES & BENEFITS

- Short sleeved variant of the A110.
- Rear vents to allow for better ventilation.
- Mesh lined vents for comfort.
- Dual access chest pockets for access in tight spaces.
- Two zipped chest pockets.
- Buttoned shirt with press stud collar.

SIZES: XS-3XL

A126 LW UBACS Shirt

FEATURES & BENEFITS

- Breathable eyeleted polyester knit torso fabric.
- 50/50 Ripstop sleeves & shoulders.
- Cordura reinforced elbow pads.
- Low profile arm pocket with zipped entry.
- Bartacked for added durability.
- Adjustable hook and loop cuff.

SIZES: XS-3XL

## A192 Stowaway Shirt

## FEATURES &amp; BENEFITS

- Water & wind resistant.
- Garment fully packs away into its own integrated bag.
- Elasticated cuffs and hood.
- Adjustable waist with drawcord.
- Weight under 200g (Size M).

SIZES: XS-4XL

## A210 Mammoth Shirt

## FEATURES &amp; BENEFITS

- Rugged fibre-pile lining for warmth.
- Two directional side zips for ventilation.
- Large front side access hand warmer pockets.
- Top access document/ map pocket.
- Available in ripstop & minirip depending on use.

SIZES: XS-3XL

## A212 SWAT Shirt

## FEATURES &amp; BENEFITS

- Micro fleece lining.
- Long cuff design with thumb hole.
- Underarm two-way zips for ventilation.
- Half zip, overhead entry.
- Anti-abrasion Cordura reinforcement panels.

SIZES: XS-3XL

**A310 V2 Rainshield Coat**

*Hood and Drawcord*

*Pocket Detail*

**FEATURES & BENEFITS**

- Waterproof dropliner & taped seams throughout.
- Waterproof zips with garages & storm flap behind main front zip.
- Packable & lightweight design (Included compression sack).
- Adjustable elasticated waist & hood, with hook & loop cuffs.
- Improved fit throughout & larger hood coverage.

**SIZES: XS-3XL**

The Rainshield is a lightweight packable waterproof coat. This product encompasses the technology of our waterproof smocks and the lightweight properties of the Stowaway shirt. The result of which is a 400g (Size M) low profile waterproof solution.

The Rainshield has had a rework in 2019. We've had lots of great feedback over the years from our military, police & civilian customers. Whilst its core features have remained the same, lots of improvements have been made since its predecessor.

The pocket configuration has been revamped and simplified for ease of use. Two side pockets, single chest pocket complete with waterproof zips & garages minimise water ingress. An internal storm flap provides an extra layer of protection in torrential rain and wind. We've also made an improvement to the general fit, including longer sleeves and better hood coverage.

**B801 Ranger Smock**

**FEATURES & BENEFITS**

- Underarm zips for ventilation.
- Detachable hood design.
- Inserts for advanced elbow pads (sold separately).
- Two front, two side, & large rear box pockets.
- Two zipped chest equipment pockets.
- Low profile arm pockets with hook & loop.

- MOLLE looping to attach to tactical vests.
- Constructed from durable Cordura.
- Designed to house receiver for live feed camera.
- Dropdown design to view receiver device screen.

Our K9 friends have a large role to play in policing, helping to protect and defend us. We were more than happy to see Finn's Law passed in the UK, new legislation to protect service animals. Meaning that injuring a service animal will no longer be classified as "criminal damage". This is the first step to ensure our K9 friends are getting the rights they deserve. We know first-hand how important dogs can be in the line of duty, as a result we have carefully designed a harness system for man's best friend

## P9M Molle Chassis

POLICE

## POLICE AVENGER STORY

As the winters get wilder, colder and harsher, and the rain, relentless, the police came to us with an issue. The standard issue kit wasn't cutting it anymore. A familiar story in our ever-shifting climate. Sometimes officers were being asked to stand in these horrendous conditions for up to 12 hours, cold, wet, and miserable.

Arktis was put to task to come up with a solution. The design had to work for the police, meeting all their demanding specifications, but also give comfort to the wearer, that they are equipped for anything. Fighting every day on the front-line, facing hazards in everyday life, it needed to inspire confidence and authority. With Arktis, quality is always guaranteed, and thus a feat of design and engineering marvel, The Avenger, was born. The Avenger is the epitome of design and function, providing comfort and practicality to anyone who wears it.

These days the Avenger has been recognised by the police forces in the UK and has now been deployed to the majority of these, who all sing its praises.

### B315 Avenger Coat & Detachable Fleece B315W Womens Avenger Coat & Detachable Fleece

#### FEATURES & BENEFITS

- Fully waterproof with dropliner and taped seams.
- Removable zip in fleece for multi-climate use.
- Dropdown panels for police/ security badges.

Arktis has been around for a while now (over 30 years can you believe?), gaining many believers in the brand and self-confessed “Arktis Addicts”.

We’ve decided to release a few items for you guys to show your support for the brand, whilst giving you that Arktis quality that we are renowned for. Some of these are just handy items to have, that we’ve been asked for over the years and we’ve finally got around to making!

Green/ White Logo Tee

Navy/ Colour Logo

White/ SC Logo Tee

Black/ TUN Logo Tee

Cordura Wallets

Cordura ID Slip

Patches

Round Logo Stickers

Arktis will now be holding stock of some “Arktis Approved” equipment. Currently we have the following items to offer:

#### Boots:

Jolly/ COSMAS® are a world-renowned brand for developing and supplying boots of the highest quality. There is truly a boot for every occasion. All made from real Italian leather, most can be bought with Gore-Tex lining for high breathability. These boots can come in many different shapes, sizes and colours. Not to mention there are highly specialist boots for the extraordinary circumstances

#### Torches:

We are excited to be stocking items for a company called “Powertac”. Powertac create a wide variety of torches, all quality built with a 2-year guarantee. All of these products have been trialed and tested to perform under extreme circumstances.

#### Gloves:

Arktis can now boast that they have durable, hard wearing gloves available. There is a wide variety of gloves available from cut resistant to flame resist, waterproof and breathable. If there are any specifications you need to meet, we are confident we can do so.

To order, contact Arktis HQ.

**Care Guide:**

Our ripstop clothing is made from robust, hardy fabric that lasts for years. All dyes will tend to fade, but ours has an excellent colour fixative that will remain effective for years.

The basic principle of care is to be sensible. Heavy reactive chemicals will strip the fabric, overly gentle treatments will not be particularly effective. Be sensible.

The thing to remember is that general wear and tear comes in many forms, not just abrasion, but strong light has a powerful effect (photodegradation), and there are even chemical compounds in rainwater, so generally everything you use can be expected to deteriorate but your Arktis fabrics have been developed with these characteristics in mind. Making them durable and resistant to wear and tear. Most caring involves being thoughtful about what you do.

**Washing:**

**Ripstop (RS) & Nylon Minirip (NM):**

For light marks and dirt, use a wet cloth to wipe down your garment.

For more serious cleaning, you can place your Arktis garments in the washing machine with minimal issues. Wash at 30°C using non-bio cleaner. Do not use softeners or bleach. Leave to dry in a warm ventilated room, do not tumble dry.

Whilst our ripstop has resistance to dry cleaning, chemicals are used in the production of coatings such as DWR. These chemicals can react with dry cleaning chemicals, so we recommend that you do not use this method.

**Nylon Cordura (NC) & Polyester Mesh (PM):**

The best way to clean these items is with a soapy water and a scrubbing brush. It's that simple. To get them dry, turn them upside down so that the water can drain out quickly and leave in a warm ventilated room.

**Reproofing:**

A time will come in the life of a waterproof garment where you notice that you are still dry but that the outer garment is becoming waterlogged and heavy. A modest restoration of the outer's water repellency could help solve this problem - not to make it waterproof but to diminish the absorption of water into the outer fabric. With some coated fabrics, pressing the garment with a cool or "1 Dot" iron will revive the coating to an effective level. The reason behind this is that heat can reactivate the finish, bringing it back to life. It's always worth trying ironing as the first step.

If required you can restore outer water repellency using NIKWAX or similar products. We prefer spray-on type products to allow for precision on key areas. When spraying make sure garment is clean and free from any detergent, focus on the shoulders and hood.
