### Advanced UV Air Purification

Control infection, eliminate unpleasant odours & improve air quality with our advanced UV technologies:

- Supports indoor ventilation
- Circulates fresh clean air
- Reduce harmful viruses, bacteria, mould and fungi
- Suitable for areas of continuous occupation
- Runs 24/7, providing ongoing protection
- Attacks odours at their source
- Extensively tested by Health Protection Agency & University of Leeds\*

\*Tests show airborne microorganisms are undetectable after 60 minutes
