NOSA  
Breathe with care

**Bad odor is a work environment problem for many**

Odor has just as much of an effect on us as temperature, light and noise—particularly in certain professions where bad odor is unavoidable.

In the healthcare sector, hygiene is paramount, and yet there are often situations where unpleasant odors have a negative impact on both patients and staff. We aim to change that.

**NOSA plugs is like ear plugs, but for your nose**

Discreet protection that neutralises bad odors without affecting your breathing capacity. NOSA ensures dignity in care for patients and staff alike.

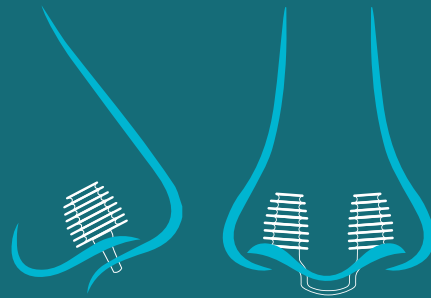

*"I found myself in a situation where bad odors affected both the care of and the interaction with the patient. This made me realize that something had to be done and so the idea for NOSA was born."*
