

Secure online 1:1 and group appointments, simplified.

About Clinic

Clinic makes it easy for healthcare professionals and patients to meet virtually in a secure setting, from the comfort of their own home. Whether for check-ups, ongoing management of chronic conditions, peer support sessions or clinical monitoring, Clinic can be used to facilitate both 1:1 and group appointments.

Key Features

-  Up to 15 participants can join a group call via web browser
-  Secure participant ID authentication
-  Send automated messages to your virtual waiting room
-  High-quality imaging for diagnosis & monitoring
-  Use on any device
-  Simple & user friendly

Benefits of Clinic

- **Connect patients to the right clinician(s)** in a quick, efficient and convenient way.
- **Minimise unnecessary admin** with our intuitive, user-friendly appointment manager.
- **Improve patient experience** by removing their need to travel to appointments.
- **Reduce missed appointments** as patients can join from anywhere with ease, simply by clicking a link.
- **Seamlessly triage patients** by allowing them meet with multiple clinicians and transition through a pathway in one single appointment.
- **Efficient use of clinicians' time** enabling them to be on call from home or from anywhere.
- **Reduce risk of infection** by enabling vulnerable patients to not have to attend in person.

How it works

Appointments are created on the Visionable platform (within app or browser) with the ability to set up one-to-one or group clinics.

Patients simply join their private waiting room by clicking on a unique URL sent via email or SMS, with no download necessary.

Clinicians and patients can join the live video consultation from anywhere - using high quality imaging and audio, alongside a chat tool.

Clinicians can easily add others to the call as needed, to speed up the patient pathway.

Follow-up appointments can be quickly scheduled or repeated.
