

Keeping friends and family together, even when they're miles apart.

## About Connect

Connect is a secure and trusted video platform that ensures healthcare professionals, patients and family members can stay connected during hospital stays. Developed during the onset of Covid-19, Connect has been vital in providing a secure space to unite patients with family and friends.

## Key Features

Send an invite via SMS/email & join on any device

No app download required for invited participants

Hands-free mobile cart option for bed bound patients

Safe & secure

Simple & user friendly

## Benefits of Connect

**Safe and secure** – Unlike other platforms in the market, no patient or clinician details are stored or shared when using any device.

**Stay connected during critical times** – Connect gives patients and loved ones the opportunity to be together whilst unwell or at the end of life.

**Easy to connect** – No app download necessary. Simply enter the phone number or email address and the recipient receives a message to connect right away.

**Simple to implement** – Little set up required. Join by web browser on your existing hardware for a quick and secure connection.

**Available to all** – Connect ensures all patients can benefit from video calling during a hospital stay once given access to a smart device.

**Secure Trust access** – Connect will be accessible to all Trust employees to use on any device.

**Join hands free** – Bed bound or isolating patients can easily participate in a call via an optional mobile cart setup.

## How it works

Simply open a link on a browser to get started. No sign-in necessary.

The patient can choose to send an invite to a mobile number or email address.

We'll send the invite and let participants know when the patient is ready.

Once everyone is connected to the call, the patient joins.

Either party can end the call.
