Introducing the LiteScope™ laryngoscope

Ready for use ▪ Fully disposable ▪ Single use

LiteScope is the new, one piece, single-use, fully disposable laryngoscope from Intersurgical, offering a quick and easy-to-use solution for intubation whilst maximising patient safety.

Unlike a standard laryngoscope, the innovative one-piece design of LiteScope eliminates the need to connect a separate blade and handle, thus saving valuable time in an emergency. Modelled on a Macintosh size 4 blade, the insertion technique is the same as for any standard laryngoscope with a Macintosh blade.

LiteScope is ideal for use in:

- Pre-hospital
- Emergency medicine
- Resuscitation
- Anaesthesia
- Difficult airway
- Intensive care

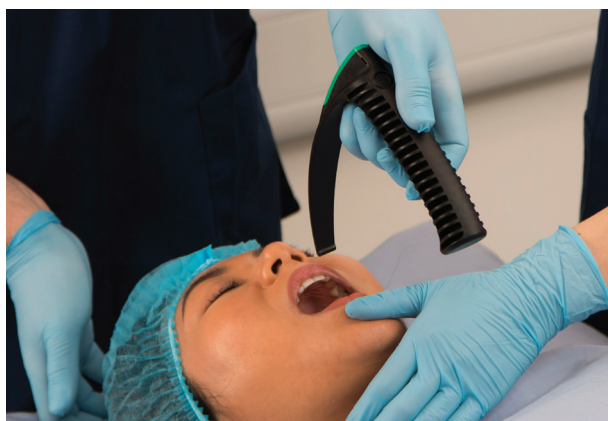

Infection Control

Recently published infection control guidelines have confirmed that in relation to laryngoscopes, 'current practices for decontamination and disinfection between patients are frequently ineffective, leaving residual contamination that has been implicated as a source of cross infection¹. Blades are also regularly contaminated with blood, indicating penetration of mucous membranes, and puts these items into a high-risk category.' They also confirm that, 'Ideally, a fully disposable laryngoscope, whereby the handle is also discarded with the blade, is recommended.'

As a single use, fully disposable laryngoscope, LiteScope eliminates the risks associated with the reprocessing of reusable devices, and therefore provides an ideal solution where there is a concern regarding infection control. It also avoids any reprocessing costs.

Anaesthesia

Intensive care

Emergency medicine

Features & benefits

Ready for use

no need to connect separate blades

Fully disposable

no need to remove batteries
prior to disposal

Single use

reduces the risk of cross infection and
avoids reprocessing costs

Corrugated handle

For superior grip

On/Off switch

LiteScope is ready to use
seconds after removing
from the packaging

TPE guard

May help reduce the risk of dental trauma
during intubation

Macintosh blade

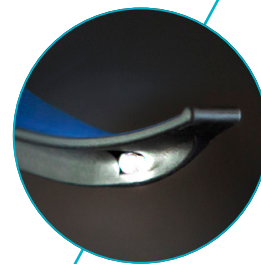

Familiar insertion technique

Ergonomic design

Ensures LiteScope™ is
comfortable and easy to use

LED light

For optimal visualisation

LiteScope™ is supplied in boxes of 10 units. Each device is individually packed to ensure protection of the device, both in transit and in storage.
