Owner of KLIK FAST
Device Carrying System

UK-based manufacturer

£6.4 million group net sales

INTERNAL RESOURCES

OUR PRODUCTS

We specialise in the design and manufacture of carrying solutions for portable and wearable devices. Many of our products consist of cases/pouches/holders made from high quality, durable leather or a combination of leather and plastic moulded components.

These attach independently to belts, waistbands, garment pockets etc. or they can be attached using our innovative KLICK FAST Mounting System. This system enables devices to be carried anywhere on the body, vehicle dashboards, lockers and bicycle handlebars.

MARKET SECTORS SERVED

KLICK FAST IN ACTION

A KLICK FAST Connector, attached to a device or holder, slides and locks easily into any KLICK FAST Dock located anywhere on the body, vehicle dashboards, lockers and bicycle handlebars. Once docked, the device can be rotated to any of seven ratcheted positions. It undocks quickly by rotating it to its inverted position and sliding it free of the Dock.

Please click on the KLICK FAST logo to view the KLICK FAST in action.

KLICK FAST HARNESS OPTIONS

SSHLDER999ADJKF

Chest Harness with Height-Adjustable KLICK FAST Dock

Webbing Harness with KLICK FAST Dock for chest area mounting of a device. Can be worn over the left or right shoulder. The KLICK FAST Dock can be vertically adjusted to the preferred position. Waist straps have a tripoint quick side-release buckle for easy fastening/detaching. Size-adjustable. Larger size harness also available.

SSHLDER17KF

Four-Point Chest Harness with Central KLICK FAST Dock & Quick-Release Buckles

Four-point webbing harness with a KLICK FAST Dock centrally located on the chest for mounting devices such as body-worn video cameras. Straps slip over the shoulders and around the waist and fasten to two quick-release buckles attached either side of the central leather pad. Size-adjustable.

KLICK FAST HARNESS OPTIONS (CONTINUED)

SSHLDER4KF

Four-Point Chest Harness with Central KLIK FAST Dock & Spring Hook Fastenings

Four-point webbing harness with KLIK FAST Dock centrally located on the chest for mounting devices such as body-worn video cameras. Straps slip over the arms and shoulders and can be quickly fastened by connecting two flat spring hooks to the D-rings attached to the central leather pad. Larger harness size and an Intrinsically Safe version also available. Size-adjustable.

SSHLDER18KF

Shoulder Harness with KLIK FAST Dock Under Left Shoulder

Shoulder harness with KLIK FAST Dock mounted on a comfortable, leather strap just below the left shoulder. Suitable for high mounting of devices such as two-way radios, body-worn video cameras and portable gas detection monitors. A length-adjustable, elasticated strap fits over the right shoulder to secure the harness. Can be worn covertly under jackets or over outerwear.

SSHLDER15*

Sam Browne Harness with Height-Adjustable KLIICK FAST Dock

Webbing strap worn diagonally over the left or right shoulder with KLIICK FAST Dock for chest/shoulder area mounting of devices. The KLIICK FAST Dock can be vertically adjusted to the preferred position. The harness attaches to a utility belt (not included) via a KLIICK FAST Belt Dock fitted at the rear and at the front. Size-adjustable.

**Belt not included but can be supplied separately, if required.*

KLICK FAST HARNESS OPTIONS (CONTINUED)

SSHLDER21KF

Four-Point Chest Harness with Central KLICK FAST Dock & Elasticated Straps

Four-point elasticated harness with KLICK FAST Dock centrally located on the chest for mounting devices such as body-worn video cameras.

Straps slip over the shoulders and around the ribs and fasten via a quick-release buckle attached to the left side of the central, nylon fabric pad. All-round elasticated straps allow more give and, together with the tri-glide buckles on each strap, offer complete adjustability to comfortably fit thick outerwear as well as a wide range of body shapes and sizes.
