

# iOS POC USING MICROSOFT ENDPOINT MANAGER

## Why would you want it?

iPhone and iPad have seen significant growth in enterprise settings, with iPhone often being the preferred choice of phone for users and iPad being used as either a primary or supplementary/companion work device due to the versatility it offers over and above traditional notebooks.

At CDW many of our customers have made an investment in Microsoft's stack and are licensed for Endpoint Manager and whilst they are using this for managing Windows endpoints, other endpoints are yet to be onboarded.

The objective of this engagement is to show you how iOS and iPadOS devices can be quickly and easily brought into management and compliance using your existing investment in Endpoint Manager. CDW's Professional Services Consultants will configure your Endpoint Manager to manage iOS devices and help you test how this works.

## Who is it for?

This engagement is aimed at organisations who want to make the most out of their investment in Endpoint Manager and expand their reach to iPhone and iPad ensuring these devices are managed, secure, and compliant in your organisation.

## Key Deliverables

All work will be carried out by one of CDW's Consultants.

- Initiation workshop – Introducing your team to CDW and understanding the work that will be done
- Configure Endpoint Manager
- Testing assistance
- Building documentation – To ensure the details of the build in Endpoint Manager are fully documented

## Why CDW?

CDW is a leading workspace solutions provider. This is underpinned by CDW holding many of the highest partner accreditations for the top Workspace vendors such as Apple, Microsoft, VMware, and Citrix.

## Requirements

- Access to stakeholders who are responsible for the management of Apple endpoints as well as Endpoint Manager itself
- Access to Endpoint Manager so CDW can configure it

## How CDW can help Focus on Customer Satisfaction

CDW focus on delivering customer satisfaction. Beyond this particular engagement, at CDW we have the capabilities to architect, implement, and support workspace solutions to meet your business needs.

Additionally, CDW offers a range of workspace managed services such as our Device as a Service (DaaS) where we help with the day-to-day management of your endpoints. This will free up time and resources in your business that instead can be used to drive initiatives to increase productivity and value.

## Business Impact and Disruption

The tools and methods utilised by CDW to perform this service are designed to run in a production environment with minimal impact on the end-user experience.

The work will be performed remotely making it COVID-safe and aside from organising CDW access to the MDM solution, there should be few requirements from your team.

## Pricing

The iOS POC using Endpoint Manager engagement is priced at £3,500

## Get in touch

**For more information on how CDW can help you to understand your endpoint environment please get in touch with your account management team here at CDW, call +44 207 791 6000 or contact your nearest CDW office.**
