

AUTOMATIC VIDEO CONVERSION

AMPED
DVRCONV

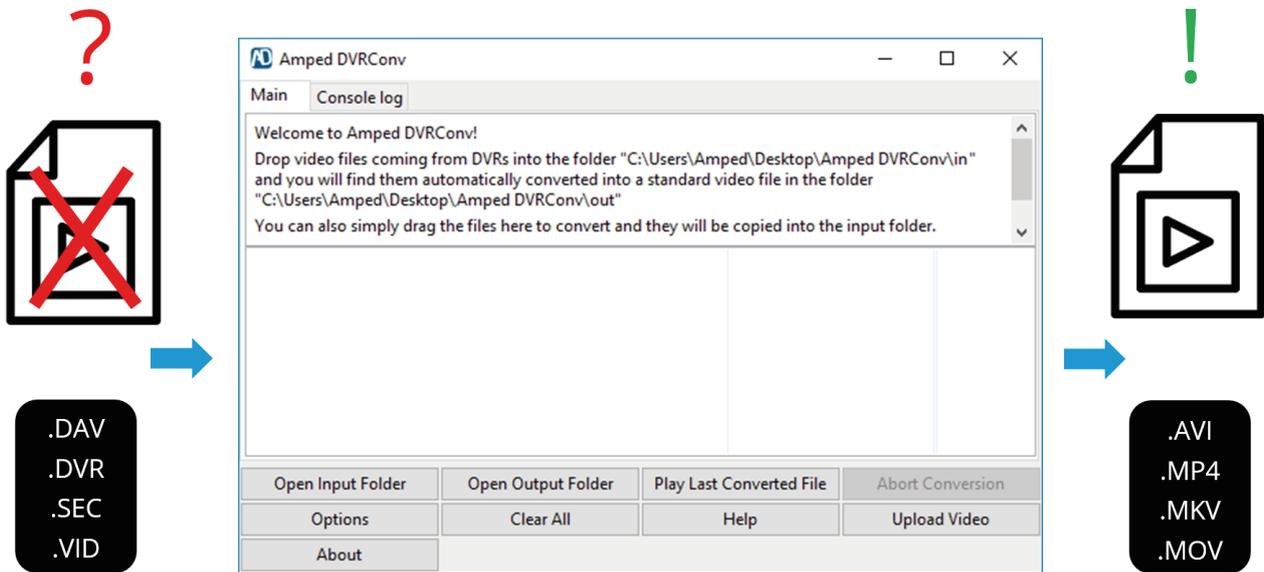

THE EASIEST WAY TO BATCH CONVERT UNPLAYABLE VIDEOS

CONVERT STANDARD AND PROPRIETARY FILE FORMATS FROM DVRS/CCTVS,
DRONES, DASH CAMS, BODY WORN CAMERAS, AND MORE

USED BY

THE WORLD'S TOP FORENSIC LABS, LAW ENFORCEMENT,
GOVERNMENT, MILITARY, AND SECURITY ORGANIZATIONS

MOST DVR MANUFACTURERS HAVE THEIR OWN PROPRIETARY VIDEO FORMATS THAT DON'T PLAY WELL WITH THE STANDARD WINDOWS PC

FAST AND EASY

Just drag, drop and you're done. With a click of a button, previously unplayable files can now be viewed in just minutes. An investigator can easily hand off a USB key or multiple folders with unique video file types in them to untrained staff to convert.

FORENSICALLY SOUND

Amped DVRConv not only produces a playable proxy file, but also preserves the original and creates a report detailing the conversion process.

AUTOMATED BATCH CONVERSION

Once you configure the settings of the conversion process and the output format, all files dropped into the input folder are queued and converted automatically.

POWERFUL

Amped DVRConv is not a screen capture tool. It is a powerful drag and drop tool to perform straight conversion to create a proxy file from a proprietary original CCTV file to make it viewable by investigators and shared with prosecutors.

COMPATIBLE

The only product that converts most proprietary video formats. Support for new formats is continually updated.

TOP LEVEL CUSTOMER SUPPORT

For the files that Amped DVRConv can't yet convert, users can upload videos to our server so we can try to decode them and add support for their formats in the next software release.
