

## Our History

Defib Store is the UK's leading Automatic External Defibrillator (AED) cabinet manufacturer and independent defibrillator supplier.

Our expertise has been developed through 30 years of designing and manufacturing bespoke cabinets and specialist enclosures based at our offices in Derbyshire, UK.

Our products are engineered to face up to the harshest environments and locations to ensure your defibrillators are kept safe, secure, and always ready for rescue.

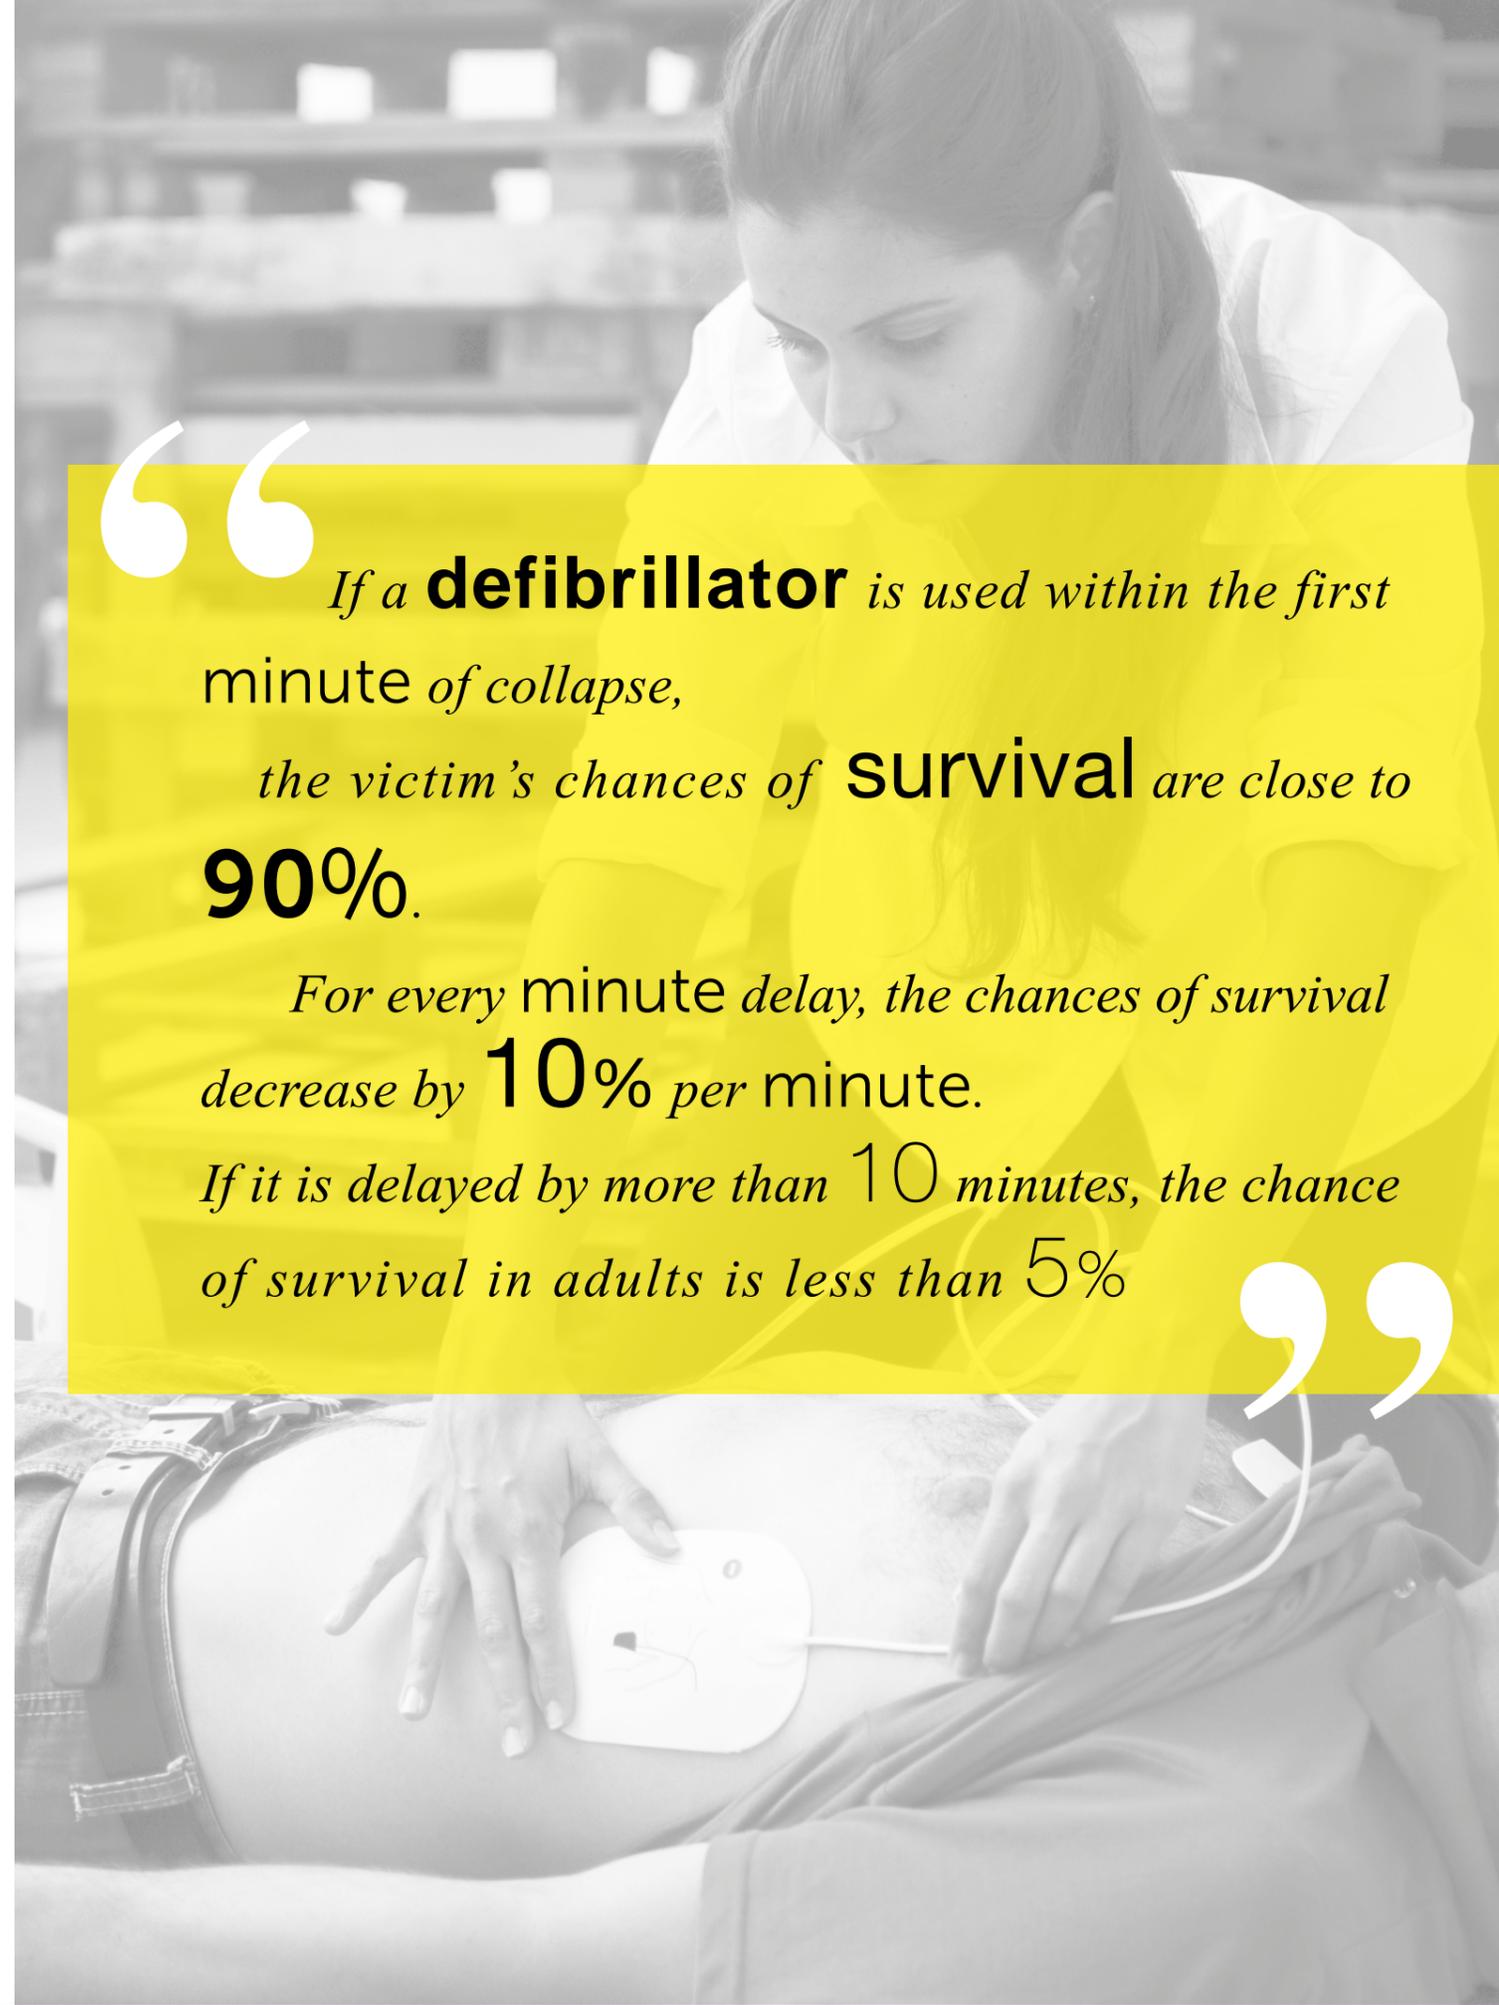

All of our cabinets are crafted and assembled by our team to ISO9001 specification and have been specially designed to be relied upon every day by emergency services teams across the country. Our cabinets are recommended by the UK ambulance services, heart charities and AED manufacturers.

With ever-growing demand for life-saving devices to treat sudden cardiac arrests, it is vital that everyone has 24 hour immediate access to a defibrillator to help improve survival rates. Help us make sure nobody goes without a defibrillator when they need it.

Welcome us as your new partner in all aspects of defibrillator storage, acquisition, and advice.

“ If a **defibrillator** is used within the first minute of collapse, the victim's chances of **survival** are close to **90%**. For every minute delay, the chances of survival decrease by **10%** per minute. If it is delayed by more than 10 minutes, the chance of survival in adults is less than 5% ”

## Defib Store 4000PL Yellow and Green Locked and Unlocked

Our latest introduction to the Defib Store 4000 cabinet line-up is our most innovative defibrillator cabinet to date. Combining ease of use, the highest quality materials, and dependable design, the 4000PL guarantees your defibrillators are always safe, secure, and always ready for rescue.

The 4000PL model is the only polycarbonate defibrillator cabinet on the market that is permanently illuminated once installed, so you can locate your device to assist with an emergency, any time of day or night.

It can be installed in extreme climates, withstand high impact forces, is fire retardant, UV stabilised against the effect of direct sun and will not discolour or degrade over time.

Our industry leading defibrillator cabinet is also fully customisable  
Available with:

- Permanent internal LED light strip
- Thermostatically controlled heater
- Marine-grade stainless steel keypad lock for robust security, or unlocked wing handle for even faster access
- Optional audible alarm upon opening to raise incident profile\*
- Smash-resistant polycarbonate inspection window
- Customisable front vinyl graphics\*
- Polycarbonate cabinet can be moulded in any colour upon request\*
- Made from fully recyclable materials
- All of our Defib Store 4000 cabinets come with a 10-year warranty on the enclosure to ensure your defibrillator is kept secure for the lifetime of the device.

\*Minimum quantity required or available at additional cost

### Key Features

- Ingress Protection Rating: 66 - 'Dust tight' and protected against powerful jets of water
- Suitable for coastal locations
- Fully corrosion resistant
- High impact polycarbonate
- Protects against the harmful effects of the sun.
- UL94V0 standard - Will not support fire and is self-extinguishing. No toxic fumes
- Mains powered permanent internal LED
- Marine grade stainless steel keypad lock
- Thermostatically controlled heater
- Internal hook accommodates any defibrillator without carry case
- Large viewing window to check on the status of the AED defibrillator
- Internal hinges - Does not allow for external tampering or hinge removal
- Double skin clamshell design for robust strength and insulation
- Includes comprehensive installation instructions and a fixing kit
- Made from fully recyclable materials
- Manufactured in the UK
- 10 year warranty (5 year warranty on heater and keypad lock)
- Option to customise vinyl front face

\*Minimum quantity required or available at additional cost

### Dimensions

- Height - 465mm
- Width - 435mm
- Depth - 240mm

- Optional alarm available\*

\*Minimum quantity required or available at additional cost

### Dimensions

- Height - 465mm
- Width - 435mm
- Depth - 240mm

## Bleed Kit

The items in our Defib Store Bleed Control Kit are specifically chosen to assist with treating traumatic injuries.

Available with both hard and soft-shell cases, we have developed these kits to fit in our defibrillator cabinets alongside the defibrillator, so you can be the most prepared to treat sudden cardiac arrests alongside traumatic bleeds.

We recommend that this should supplement normal workplace and domestic first aid kits to assist in emergencies, especially in cases of severe injuries or multiple patients.

### Contents

- 1 x Guidance note
- 2 x Large trauma dressings
- 1 x Strap tourniquet
- 1 x Tourniquet (SOF®)
- 1 x Foil blanket
- 1 x Tuff cut scissors
- 1 x Box haemostatic plasters
- 1 x Haemostatic dressing (10cm x 1m)
- 1 x Haemostatic dressing (7.5cm x 3.7m)

# Indoor Cabinets and Signage

## Indoor Alarmed Wall Cabinet

Our Indoor Alarmed Defibrillator Safety Cabinet is the perfect solution to store your indoor public access defibrillator.

This cabinet comes fully equipped to increase rescue efficiency. It will call for assistance with an audio alarm to raise awareness of emergency in noisy environments and has a magnetic closure for rapid access to the life-saving device inside.

Suitable for all automatic external defibrillators, this indoor cabinet also includes an acrylic inspection window to check on the rescue readiness of your device.

### Key Features

- Automated External Defibrillator Safety Cabinet
- White powder coat
- 2mm high quality steel construction
- PLEX acrylic inspection window
- Power Supply: 3x AA Batteries
- 1 Year Warranty

### Dimensions

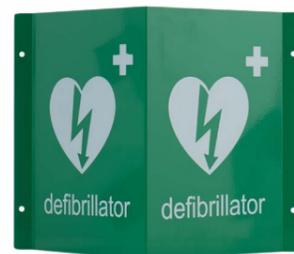

- Height - 370mm
- Width - 370mm
- Depth - 170mm
- Weight - 4kg

## 3D Metal Public Access Defibrillator (PAD) Wall Sign

The Defib Store 3D Metal Public Accessible Defibrillator Wall Sign is manufactured to be hard to miss.

Made to stand proud and printed with the universally recognised symbol for 'Defibrillator', our sign directs rescuers to your device location, ensuring it is visible from all angles in an emergency.

Ensure that all staff members, visitors, or passers-by know that your site is equipped with a publicly accessible defibrillator so they can assist someone suffering a cardiac arrest in an emergency.

### Key Features

- Height: 230mm
- Projection from mounting surface: 120mm
- Suitable for indoor and outdoor use
- Easily identifiable in an emergency

# Accessories

## Defib Store Universal Defibrillator Indoor Wall Hanger

Our Defib Store Universal Wall Hanger is a cost-effective, indoor storage solution no matter which AED you have.

Ensure your defibrillator is stored indoors, is clearly visible and ready to be used in an emergency.

Suitable for all AEDs including the Powerheart G5, Zoll AED Plus, Heartsine 350P/360P/500P, Lifepak CR2 and iPad SP1, among others.

Vinyl can be customised with your logo and choice of text\*

### Key Features

- High Quality Vinyl face with instructions for use
- Fully customisable vinyl face to include logo or text\*
- Includes mounting kit
- Suitable for all AEDs

\*available at additional cost

Defib Store offer a wide range of defibrillator accessories for many of the leading manufacturers. From pads and batteries, defibrillator cases, and signage, we have the perfect solution for your chosen device and storage option.

For further details on our full range of accessories, call us on 01298 872 186.

## Pole Mount Kit

The Defib Store 4000 Cabinet Pole Mount Kit is manufactured to fix your defibrillator or bleed cabinet securely in key areas.

Designed to fit all pole diameters upon request and made of stainless steel, this accessory allows your defibrillator to be stored in even more remote locations.

If you need a pole mount kit to fit a specific diameter, contact us to see how we can help.

### Key Features

- Can be configured to fit all diameters upon request
- Standard sizes: 55mm-70mm, 70mm-100mm, 100mm-130mm & 130mm-190mm
- Designed to be used exclusively across our 4000 cabinet range
- Comes as a set of two horizontal attachment bars
- Can be used to attach your defibrillator cabinet or bleed control cabinet to lamp posts for high-street use
- Made from high-grade stainless steel for use in all weathers

# Defibrillators

Defib Store is one of the UK's major defibrillator suppliers. We stock a wide range of trusted Automated External Defibrillators (AEDs) suitable for all users, organisations, and budgets.

Our Defib Experts are always on hand to provide impartial advice to find you the best solution for your needs. Our large stock of AEDs and accessories means we can provide a next day delivery service on most items.

For any defibrillator purchase with us, we offer a free battery and pad reminder service. We will ensure your defibrillator accessories are always in date and your AED is always ready for rescues.

### Powerheart® AED G5

Whether you are an experienced rescuer or a first-time responder, the Powerheart G5 automated external defibrillator (AED) provides a powerful combination of features that help rescuers provide sudden cardiac arrest (SCA) victims with swift, effective, and life-saving therapy.

The Powerheart G5 is a reliable, rugged AED, tested to military standards which performs automatic self tests: daily, weekly, monthly. The first AED to combine fully automatic shock delivery, dual-language functionality, variable escalating energy, and fast shock times to help save an SCA victim's life.

The Intellisense CPR and adult G5 pads deliver defibrillation therapy and CPR feedback in accordance with Resuscitation Guidelines.

### iPAD SP1

Trusted technology, proven simplicity... Because life matters the iPAD SP1 has innovative features and uses advanced technology to save precious seconds when every second counts.

Save precious seconds when a child's life is in your hands the iPAD SP1 comes with dual adult and child electrode pads. There is a simple switch to select the adult or child setting. No pad changes or setting changes are required.

Audible instructions always heard in noisy environments the iPAD SP1 has an ambient noise detector. In a noisy environment, the volume of the voice prompts will automatically increase up to 90 decibels.

Verbal guidance will always be heard above high levels of background noise.

Highly responsive when it matters most the iPAD uses the latest in defibrillation technology to ensure that the device works as quickly as possible. After a cycle of 2 minutes of CPR, the device can perform analysis and be ready for shock delivery in less than 5 seconds.

### Heartsine

Durable, affordable and highly portable, the HeartSine Samaritan PAD is a simple to use and simple to own AED. Compact and lightweight (1.1kg/2.4lbs) including Pad-Pak battery, the Samaritan has easy to follow visual and verbal guides. With One Pad-Pak (electrode and battery cartridge) with 4 year life, the Samaritan has a low cost of ownership. Available as semi or fully automatic 350P or 360P.

The Samaritan PAD 500P uses an Impedance Cardiogram (ICG) to assess the effectiveness of the CPR and give the rescuer feedback on compressions.

# Defibrillators

### Zoll AED 3

The ZOLL AED 3™ automated external defibrillator (AED) provides rescuers with unrivalled support during a cardiac arrest. The ZOLL AED 3™ builds on ZOLL's reputation for providing rescuers with unmatched support plus a low total cost of ownership and embodies all the same great qualities of its predecessor, the AED Plus, while offering advanced features to provide unrivalled rescuer support.

High resolution Colour touchscreen LCD display with easy to follow graphics, Programme Management Onboard™, and Real CPR Help® providing real-time visual and audible feedback on the rate and depth of chest compressions. WiFi enabled for PlusTrac Cloud Connection, Case Review™, ZOLL RescueNet, clinical event case push, and UTC synchronization. IP55 rated and passes 1 meter drop test. USB port for data upload or software download for rescuer support.

### Zoll AED Plus

The latest European Resuscitation Council (ERC) Guidelines, issued in 2010, are clear: successful defibrillation requires high-quality CPR performed at the proper depth and rate. When it's time for CPR, the AED Plus® with Real CPR Help® provides the best support to help save a life.

Only ZOLL's AED Plus is equipped with Real CPR Help technology. The sensor in the CPR-D-padz lets the AED see each chest compression and lets you know how you're doing. It guides you, with prompts and a real-time bar gauge, to the recommended depth and rate of compressions.

A back-lit display screen that provides simultaneous text with every audio prompt, and a circle of lighted graphical icons that show what to do. The screen also presents the elapsed time and number of shocks delivered, critical information needed by EMS personnel when they arrive.

### Lifeline View AED

*The Automated External Defibrillator with a view...*

The Defibtech Lifeline View AED comes fully equipped to provide rescuers with the assurance and confidence to deliver high-quality CPR when it matters.

With a high-resolution, LCD colour screen, the Lifeline View AED provides clear instructions to the rescuer throughout the defibrillation process, along with full-volume audio description.

This device is designed to be used by anyone, regardless of experience, to help save lives.

# stryker

## Lifepak CR2

The Lifepak CR2 fully automatic defibrillator, equipped with Wi-Fi connectivity and continuous self-monitoring, enables both rescuer and device to deliver swift, life-saving treatment every time.

The CR2 is the only AED that allows continuous chest compressions to be performed while the device conducts heart rhythm analysis. This reduces the time needed between CPR and defibrillation, improving blood circulation, and increasing the chances of patient survival.

Always connected to LIFELINK Central AED Programme Manager, enabling the user to manage and check the device remotely to ensure it is always ready to rescue.

The Lifepak CR2 defibrillator is the effective, safe, and affordable choice.

# PHILIPS

## Philips Healthcare Heartstart FRx Defibrillator

The FRx defibrillator features Life Guidance intuitive, step-by-step voice instructions, including CPR coaching, to help give responders the confidence that's needed while treating a cardiac arrest. A clear, calm voice and descriptive visual icons guide you through every step, from pad placement to cardiopulmonary resuscitation (CPR) and shock delivery.

## Philips Healthcare Heartstart HS1 Defibrillator

Designed for the ordinary person in the extraordinary moment, Philips Heartstart HS1 is ready to act and ready to go. It allows virtually anyone to treat the most common cause of sudden cardiac arrest (SCA) by delivering a shock quickly and effectively, wherever SCA happens.

Now you can Rent a Defib from as little as 99p per day\*

# Rent a Defib

Affordable Defibrillator Rental

Rentadefib want to make sure all companies have an opportunity to protect their employees, customers, guests and the general public in the event of a cardiac arrest regardless of their size or financial standing. That's why here at Rentadefib, a sister company to Defib store, we offer competitive defibrillator rentals plans ranging from one to four years.

The benefits of utilising such a system means you can pay for the defibrillator on a six monthly basis freeing up capital and spreading the cost over an agreed set term. Great for cashflow. The monthly rental cost is 100% tax deductible and VAT can be reclaimed in full.

Additionally, the Rentadefib introductory package includes the following:

- 
**Full support and management**  
 Dedicated account specialist, 24 hour device swap if faulty
- 
**3D Wall Sign**  
 3D wall sign, easily applied to the wall giving greater awareness of the location of your defibrillator
- 
**Defibrillator Wall Hanger**  
 A convenient way of displaying your defibrillator with instructions
- 
**Defibrillator Ready Kit**  
 All you need in a life saving situation
- 
**Replacement Batteries & Pads**  
 Fully covered for the whole term or your contract if used or out of date, replacement within 24 hours

Examples of some of our deals

You can choose from the full range of defibrillators from the world's leading manufacturers.

Renting your defibrillator also allows you to be at the forefront of technology; at the end of your agreed term you simply return the defibrillator and agree a new contract for a brand new state of the art model.

- 

**conserve cashflow**
- 

**pay as you go**
- 

**tax planning**
- 

**flexible terms**
- 

**any Defib**

Terms and conditions apply and subject to credit check. Flexible terms of contract available.

Per day prices quoted are based on a 48 month rental rate on a standard rate, paid half yearly and are subject to change without notice.

Full Terms and conditions available on request

# DefibSure

At Defib Store, DefibSure is your complete defibrillator management service.

By choosing to be DefibSure, your organisation can rest easy as we take full responsibility of ensuring your defibrillators are ready to use in a rescue at all times.

We give you complete peace of mind by offering comprehensive cover depending on the level of policy you choose, and the number of devices across your organisation.

Whether you have purchased your defibrillators with us or not, our Defib Experts will always be on hand to help and make sure your devices are always ready to save a life.

DefibSure has three service packages to choose from: Bronze, Silver, and Gold.

All packages as standard include device and accessory diagnostic testing for full, operational performance. During testing, a replacement defibrillator issued by us at no extra cost and a test report to show the rescue readiness for each of your devices. For sites with 10 or more defibrillators, we offer an onsite service by one of our Defib Store engineers.

Speak with one of our Defibrillator Experts for more information, or to find the best option for you on:

**01298 872 186**

ensuring peace of mind

# Training

Defibrillator half-day awareness and training course.

Our four-hour defibrillator training course is the most effective way of teaching you how to use a defibrillator with full confidence in the event of a serious emergency. Using a defibrillator correctly can increase the chances of patient survival by up to 75%, and the faster a defibrillator can be used effectively, the higher the chance of survival from cardiac arrest.

That is why our defibrillator training course is so important. By the end of the course, you will be able to identify the symptoms of someone suffering a cardiac arrest, unpack and accurately apply a defibrillator, then use one without hesitation to increase the patient's likelihood of survival.

## Course Content

Our half-day course includes course materials, expert tutoring, and practical exercises to give all learning in-depth training in the following:

### Contents

- Basic life support (CPR)
- Safety aspects of defibrillation
- Breathing management
- Incident assessment
- Legal aspect of defibrillation
- Life-threatening cardiac rhythms
- Practical training with the defibrillator

## Course Certificate

Upon successful completion of the course, each participant will receive a defibrillator (AED) training certificate which is valid for 12 months.

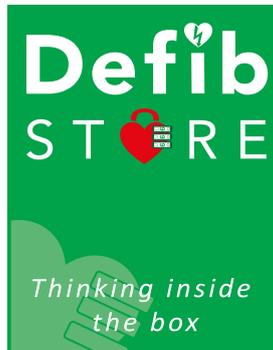

“

# *Saving a* **Life**

*deserves the*  
**BEST** *protection*”

**SCAN IT. LEARN IT.  
SAVE A LIFE.**

**We are excited to be partnering with the Resuscitation  
Council on the launch of their new CPQR Symbol.  
A QR code that helps save lives.**

**Learn it before you need it.**
