CYTOTOXIC-TESTED NITRILE GLOVES -CUFF FIRST DISPENSING

CUFF-FIRST CYTOTOXIC-TESTED NITRILE GLOVES

STANDARDS:

EN 455

EN 374

FDA 510K

ASTM D6319

ASTM D6978

TGL Chemotherapy Drug Tested gloves in a gold-standard "cuff first" dispensing pack.

Cuff first dispensing boxes of 100 or 250 gloves.

A cuff-first dispenser provides the highest standards of infection prevention and control in any healthcare setting.

Each glove is delivered singularly, with the cuff being fed out of the dispenser box first. Donning the glove cuff-first minimises the risk of touching the outside surface of the glove, reducing the risk of cross-contamination and infection.

Powder-free and non-sterile gloves made from acrylonitrile-butadiene synthetic rubber. Ambidextrous, textured surface at fingers and beaded cuff.

Available in Small, Medium, Large, and Extra-Large sizes.
