SentraCath
IV Safety Cannula

- Flashback needle to confirm venepuncture
- Thin-walled needle
- Robust safety clip
- Minimal withdrawal resistance and activation force required
- Reduced risk of dislodgement

PHARMA DEVICES LOGISTICS

SentraFlex IV Safety Cannula - ported and winged

Double-tapered and more kink resistant polyurethane catheter

Unique flip-top port lid and flexible wings

Self-activating safety mechanism to prevent needle-stick injuries and blood splatter

Universal attachment of needle-free valves

Quick flashback technology needle for immediate confirmation of venous access*

Triple-faceted needle tip for improved patient comfort and reduced incidence of phlebitis

Double-lipped grip plate for extra control

Flashback chamber

Removable white cap and hydrophobic filter, to prevent blood leakage during cannulation

*ADVA – Quick flashback technology needles available in 18G, 20G, 22G, 24G, 26G

SentraWin IV Safety Cannula

Double-tapered and more kink resistant polyurethane catheter

Small lip present to allow users to push catheter off the needle

Quick flashback technology needle for immediate confirmation of venous access*

Self-activating safety mechanism to prevent needle-stick injuries and blood splatter

Universal attachment of needle-free valves

Triple-faceted needle tip for improved patient comfort and reduced incidence of phlebitis

Side grip points allow user to insert the cannula effectively

Flashback chamber

Removable white cap and hydrophobic filter, to prevent blood leakage during cannulation

*ADVA – Quick flashback technology needles available in 18G, 20G, 22G, 24G, 26G
