# MX SARMAN ENTERPRISE

Release 2022

## A fully integrated online/offline Search Management Solution

MX SARMAN ENTERPRISE is the latest evolution in search management capability for Web, PC, mobile iOS, and fully integrated with our existing solutions. Underpinned by a unique concept that allows simultaneous interconnectivity between multiple users/platforms and importantly, incorporates failover and synchronisation modes to allow for variances in internet connectivity; in simple terms, internet connectivity, albeit desirable, is not a dominant factor in search management; our solutions can be used both on and offline.

This unique solution succeeds where purely web-based solutions fail; it meets our overarching design philosophy to provide resilient solutions that work with or without internet connectivity in any location.
