

Our Tactical Trousers are designed with you in mind!

At KADRI, we are revolutionising sizing using the Waist-Hip Variation Representation Matrix™. We believe clothing sizes should be as diverse as women's shapes, not determined by set waist/hip ratios. KADRI's revolutionary system provides a customisable fit utilising three points of measurement -- waist, hip and in-seam -- giving the end user the option to choose a hip size up to two sizes larger than the waist size. This enables women to purchase trousers specifically built for their unique body type. KADRI is a proud for women, by women company.

Proper Fit - Practical Function - Durable Design.

- Eleven functional pockets; zippered front pockets to secure important items; bellows-designed cargo pockets with single button 'stealth' closure and external pockets that will fit most common pistol magazines; 2 back welt pockets that hold an AR15 magazine/larger mobile phone; 2 flap less back pockets; a small calf pocket perfect for a knife, flashlight, tampons etc.
- Two waist gussets providing up to 2"/5cm stretch in the waist for monthly weight fluctuations and room for concealed carry options.
- A crotch gusset that extends down the inner thigh to provide increased mobility and stretch for stronger-thighed women.
- Reinforced seat and knees with enhanced crotch gusset. UK variant features internal knee pads pockets.
- A mid-rise waist with crossed belt loops that accommodate up to a 2" belt allowing for comfortable placement of a gun belt on top of the hip bone. It also prevents pants from riding down/slipping down when wearing body armour or bending over (squat-proof pants).
- Made with a top-quality 4-way stretch Nylon/Spandex blend that provides durability and flexibility without sacrificing comfort. Complete with a DWR finish to repel water.
- Developed by Female SOF Veterans.
