## Storage & Charging

## Easy Device Management

### For Laptops, Chromebooks & Tablets

LapSafe® is the UK's industry-leading expert in providing innovative and proficient charging solutions such as self-service smart lockers, trolleys, and cabinets that assist in the deployment of assets.

We offer technologically advanced solutions that ensure assets are taken care of in volume making device management easy.

We are proud to design our own products in-house and manufacture them in Great Britain. Together with our dedicated sales, customer service, and delivery team, you can be assured you are in the right hands.

In this brochure, we showcase our comprehensive award-winning range of mobile trolleys, desk, and wall cabinets together with our range of lockers.

Secure  
Efficient  
Store  
Charge

## Mentor™

LapSafe®'s flagship Mentor™ trolleys provide the very highest levels of security as well as intelligent charging of devices.

Page 10

## ChargeLite™

The ChargeLite™ range offers an unrivalled and cost-effective solution to store, charge and even update your devices in volume.

Page 16

## FLEX™

Personal storage and charging lockers allow users to access individual charging bays at any time.

Page 22

## Diplomat™ Basic

Our Diplomat™ Basic lockers offer several locking styles from simple keyed locks to sophisticated intelligent electronic locks.

Page 28

**Mentor™**  
Our flagship  
Trolley Range

## Intelligent Laptop Charging Trolleys

LapSafe®'s flagship Mentor™ trolleys provides the very highest levels of security as well as intelligent charging for devices such as laptops, Chromebooks, tablets, and similar devices.

The Mentor™ trolley range offers four types of charging, our unique, patented SmartLine™ with PowaSave™ (requires no AC Adaptors and extremely Eco-friendly) SmartLine™ USB-C, ChargeLine™ (uses devices own AC adaptors) or USB charging for use with your USB cable.

LapSafe®'s unique power management system ensures all devices are charged simultaneously in the shortest possible time and incorporates three key areas of protection: soft-start, surge, and residual voltage providing the highest level of protection for the user and your equipment.

Our PowaSave™ automatically turns off charging when devices are fully charged, meaning no electricity is wasted, keeping environmental damage, and running costs low. Your carbon footprint is reduced. PowaSave™ automatically switches the power back on when the devices need it.

### LOCKING OPTIONS

Keyed Locks

(Pg 42 for more info)

## Features & Benefits

- Mix & match devices in one trolley with its modular design
- Future proof and upgradable when your devices change
- Safely store & charge up to 30 full sized laptops or 60 small Chromebooks or tablets
- Devices are charged simultaneously in the fastest possible time
- Fully-welded steel construction, with piano hinges and high security locks
- Different keys to the rear service door for admin and access

### Options

- Data Transfer – Update all your devices at once
- Timer – A configurable 7-day digital timer
- WAP – Internet access with wireless access point
- Docking Station - Secure your trolley to the wall

## Construction

The Mentor™ is the most secure mobile storage and charging trolleys available in the market today. The fully welded chassis, piano style hinges and anti-jemmy features removes points of weakness.

Doors are reinforced and fitted with four-point locks which uses high security keys to gain access. Inside the trolley, it has a modular construction allowing you to 'Mix & Match' devices and can be easily upgraded when your devices change.

A truly sustainable storage and charging trolley, built to withstand the test of time.

## Power Management

- Overcurrent Protection
- Residual Voltage Protection
- Soft Start Power Management
- Energy Saving and Eco Friendly with Powersave®

## Warranty

Lifetime Warranty for complete peace of mind. For full details please see [lapsafe.com/warranty](https://lapsafe.com/warranty)

## Features & Benefits

- Safely store and charge up to 32 laptops, Chromebooks or tablets
- Devices are charged simultaneously in the fastest possible time
- Neat and tidy cable management for safety
- Full steel construction to withstand the test of time
- Compact design with a small footprint
- Different access keys for front and rear service
- Durable antimicrobial powder coated paint finish

### Options

- Data Transfer – Update all your devices at once
- Timer – A configurable 7-day digital timer
- WAP – Internet access with wireless access point
- Docking Station - Secure your trolley to the wall for increased security

## Construction

All units are manufactured from steel and painted in a durable antimicrobial powder coat paint finish. Rounded corners give the ChargeLite™ range a smooth exterior.

Devices are kept at an optimal temperature by encouraging maximum airflow through a series of ventilation holes. If you have our data transfer option fitted, thermostatically controlled fans are also included as standard.

Trolleys include recessed handles and high-quality 360° castors, providing easy-to-manage manoeuvrability from one location to the next. The two castors have brakes to lock the trolley in place. Desk, wall, and locker units can be securely fixed to a solid surface.

## Power Management

## Diplomat™ UV-C

LapSafe.com

## Sanitising Station

### Sanitise your device in just 15 seconds!

How often do you clean your laptop, Chromebook or tablet? I bet it's not that frequently. You might wipe your screen with the odd screen wipe every now and then, but actually cleaning the keyboard, come on admit it, not that often.

Viruses and bacteria left on laptops or similar devices increase when the devices are shared. This is why just as you wash your hands to stop the spread of germs, bacteria and viruses, you should also clean your devices.

**No Touch Operation**

**18 UVC Bulbs**

**Sanitises most laptops and tablets**

## Features & Benefits

- No-touch, semi automated operation
- Only a single standard power socket required
- Fitted with 18 UV-C bulbs, and bulb failure warning
- 'Fail-Safe' and 'user protection'
- Senses when a device is placed in or taken out
- Step-by-step instructions on LCD screen
- Sanitises most laptops and tablets
- Sanitises devices in just 15 seconds
- Sanitises all areas of the device at once

### Options

- Choice of colours
- Works standalone or can be added to existing LapSafe® Smart Locker installations

## Construction

A robust all-steel construction with easy to clean powder coat paint finish. Built in 'fail safe' & 'bulb failure' warning for safe use

## UV-C

99% of bacteria and some virus\* are deactivated when exposed to high-intensity UV-C light.

Fitted with 18 UV-C bulbs ensure all areas of the device are sanitised, including hard-to-reach places.

\*When tested, our UV-C light sources deactivate 99% of SARS-Cov-2 virus on a surface with an exposure time of 6 seconds.

## Warranty

Lifetime Warranty for complete peace of mind. For full details please see [lapsafe.com/warranty](https://lapsafe.com/warranty)

Customise to match your decor

Sanitise devices in 15 seconds

## Ultra-Safe Power Management

## Charging Options

### Safety as Standard

All our products come with safety as standard; this was our ethos when we started more than twenty years ago. We have provided 'safe' charging solutions to thousands of customers around the World. That is why we are LapSafe®. Our units come with integrated power management to ensure user safety and the safety of devices.

LapSafe®'s ultra-safe power management system incorporates three key areas of protection: soft-start, surge, and residual voltage. These provide the highest level of protection for the user, equipment, and electrical circuits.

Safety as standard

Highest level of Protection for user and equipment

### **SmartLine™ with PowaSave™**

SmartLine™ charging uses fitted cables specific to the make and model of the device, eliminating the need for AC adaptors. This patented, ultra-safe low voltage system, charges all devices simultaneously, in the fastest possible time. PowaSave™ provides an energy efficient system by shutting off power supplies when the devices do not require them. Each device is tested by our engineers to ensure compatibility.

### **SmartLine™ USB-C**

Each charging bay is equipped with a USB-C charging lead and delivers 65w per channel, supporting 5v, 9v, 15v and 20v to suit your device.

### **SmartLine™ USB 2.0**

Our USB charging system allows devices to be charged at full rate (5v 2.1amp). Users connect their USB cable to the conveniently placed USB 2.0 sockets.

### **ChargeLine™**

ChargeLine™ uses the device's AC adaptor and is plugged into a standard mains socket to charge the device. Standard units are supplied with a Type G UK standard 13 amp 3-pin socket. Other versions are available upon request to suit other Countries.

Depending upon the unit model, sockets are either situated at the front of each bay, making them easy to remove and use outside the unit if required, or fitted in the rear service compartment to keep them secured and out of the way.

### **ChargeLine™ Ultra**

ChargeLine™ Ultra provides a single mains socket and twin USB 2.0 sockets to use the devices charging leads or AC adaptor. These are particularly useful in our hot lockers, or when you need to charge more than one device. Standard units are supplied with a Type G UK standard 13 amp 3-pin socket with twin type 2,0 USB sockets.

Other versions are available upon request to suit other Countries or configurations.

## Safe & Secure Locking Options

## Keyed Locks

### Simplicity

A range of either cam-style or safe locks are fitted in our product ranges. Locks are available with matching keys or differentiating keys to offer levels of access and some degree of control and responsibility.

Keyed locks offer a simple solution to secure your trolley or locker without complexity.

- Cost effective locking solution
- Simple and easy to use
- Available with generic or individual keys
- The Diplomat™ range can be master keyed

## KitLock KL1000 G3 NetCode®

### Cost Effective PIN Code Lock

The KL1000 G3 NetCode® lock is an easy-to-use keyless lock that uses PIN codes to lock and unlock your trolley or locker.

The KL1000 G3 NetCode® uses technology to generate date and time-sensitive temporary coded access. Once generated, a NetCode® can be shared via email or SMS and will expire after their set duration - ideal for visiting service engineers, delivery personnel and short/medium-term locker rental.

Locks can be quickly programmed to operate in one of two modes:

- Private Function (single user)
- Public Function (multiple users)

LapSafe.com

## NetCode® Pricing

To generate a NetCode®, you will need to purchase a credit pack.

1 NetCode® or 1 SMS = 1 Credit

### Features

- Date/time-specific code generation
- Send generated codes via email or SMS
- No WiFi connection required
- Front battery change
- Key Override
- Battery Override
- Private, Public + NetCode® Functions
- Up to 20 User Codes
- Auto-unlock after a set time

## KitLock KL1000 RFID

### Cost Effective MIFARE® Classic Lock

The KL1000 RFID KitLock offers functions for single users (private function) and short-term use by multiple users (public function). The lock will perform up to 15,000 openings on just two AAA batteries.

RFID card locks and unlocks with a single swipe.

#### Features

- Supports MIFARE® Classic
- Master User Card
- Technician Card
- Public Pairing Feature
- Up to 15,000 operations from 2 x AAA batteries (supplied)
- Battery override

LapSafe.com

## KitLock KL1060

### Cost Effective Online Code Generation

NetCode® is the smart way to generate time-sensitive codes for a wide range of our lockers and trolleys.

Through the online NetCode® Portal or via the codelocks simple API. You can create codes that have a specified start date, time and duration. Once the period expires, the codes no longer work. Using time-sensitive codes is a more secure way to grant access as codes expire, and the locks cannot be used outside of a designated time slot.

Time-sensitive codes can be provided to service engineers, delivery personnel (drop boxes), and medium-term locker rental. Generated codes can be sent by email or SMS.

## BeCode miniPAD

### Sleek PIN Code Lock

The BeCode™ MiniPAD is a simple keyless locking solution with a 'slam-latch' style locking bolt. This makes it ideal where quick access and easy operation is required.

Available in both Private and Public modes to suit your requirements.

#### Private Mode

The most common function and where the same ID card will be used on the same lock continuously

#### Public Mode

The user controls the lock with their ID card, and after use, the lock is cleared for a new user.

## BeCode miniPAD TAN mode

### Advanced Online Code Generation

TTANmode offers cloud-based intelligent software that enables the individual management of each lock. TANmode automatically creates random codes, transmits these to the respective users and allows administration online or via a mobile device.

**Diplomat™ Basic**

**Flex™**
