TIME IS EVERYTHING™

Be prepared and confident to act quickly to save a life.
CellAED® can be applied in seconds.

Graphics show how to apply the device on both adults and infants

A perforated label marks the place for easy snap activation

Audio speaker gives instructions on what to do every step of the way

Infant mode button for use on infants weighing less than 10kg

Length: 19.6cm
Width: 9.3cm
Depth: 1.7cm
Weight: Approx 300g

LED indicator with periodic blinking showing the status of the device

Your handheld, smart, personal defibrillator

CorMed-DX have partnered with Rapid Response Revival as the Authorised Resellers of CellaAED® in the UK.

CellAED® is designed to save lives from sudden cardiac arrest, which can happen to anyone, anywhere, at any time.

During a cardiac arrest, every minute without an AED lowers the chance of survival by 10%!

With CellaAED®, you can ensure there is always an AED nearby to help save a life.

SNAP

Power CellaAED® by snapping in half along perforated centre line. This will automatically start the audio instructions.

PEEL

Remove the protective liner under your CellaAED®. This will expose the integrated gel pads and extend the connecting cable.

STICK

For adults, place each half of the CellaAED® on the bare chest. For infants, place one half on the infant's chest and the other half on the back.

CellAED™ TRAINER

LEARN.
PRACTISE.
REPEAT.

Visually differentiate your TRAINER device from CellaAED® by the yellow colour.*

Internal magnetic closure to repeat the snap activation

Push button to retract ribbon cable and reset the TRAINER to the start position

Reusable liner design covers the adhesive gel pads

Washable pads to practise applying in the correct position**

DESIGNED TO HELP YOU SAFELY PRACTICE THE APPLICATION AND USE OF YOUR CellaAED®

Practice using your CellaAED TRAINER™ with the same audio voice prompts included in your CellaAED®, which guide you through the CPR and defibrillation process.

CellaAED® Trainer™ includes a free APP which gives scenarios and audio prompts so you and your teams can practise how to use the device in an emergency on adults or infants.

- Get familiar with hearing each voice prompt and practise the associated action at your own pace
- Play pre-set scenarios for infants and adults to gain confidence in positioning the pads correctly
- Choose from a variety of scenarios to test your listening and responsiveness and hone your skills in specific areas
- Access to instructional videos from identifying sudden cardiac arrest through to how to deactivate your CellaAED® after use

F+RST AED

Responder

tac:life
respond first with confidence

The FirstAED responder box is designed to provide all the kit and equipment needed to tend to trauma and cardiac incidents. Complete with a bleed control kit and the revolutionary CellaAED®, all in one place, fit for purpose.

The box can be mounted on walls as well as transported in vehicles or carried. This equipment is an affordable and versatile option to make sure your family remains safe. This can be wall mounted, carried, or stored in a vehicle, making sure you have the right kit there when you need it.

The FirstAED Responder Box Includes...

- Items held in waterjet cut foam inserts
- 2 x CAT tourniquets
- 2 x Trauma Bandage 4"
- 2 x Foxseal chest seals
- 2 x Celox rapid
- 2 x pair of nitrile gloves
- 1 x CellaAED®
- 1 x Tuff cuts
- 1 x Gallant disposable razor blade
- 2 x NPA (6 & 7)
- 1 x Sharpie pen
- 1 x ATMIST/MARCH card

dynamic.

creative learning

As one of the UK's leading elearning design companies, dynamic. creates and delivers high-impact online learning for your audience. It's a highly effective way to drive greater efficiency, knowledge, productivity and profitability throughout your organisation. Whether you need bespoke content, off-the-shelf elearning or you'd benefit from our unique dynamicLMS, you can discuss your options and opportunities on how you can add value to your business.

solutions

Using the latest creative and immersive technology, dynamic. offers a wide range of solutions, including:

Advanced Authoring

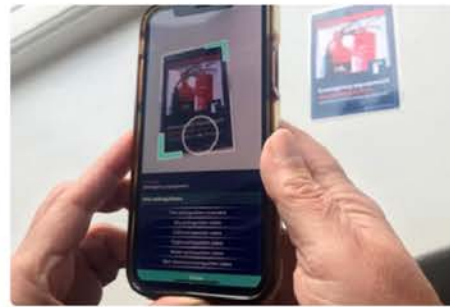

Games

360° Virtual Tours

VR (Virtual Reality)

AR (Augmented Reality)

Apps & other support materials

Emergency Services

the dynamic approach

Dynamic have extensive experience of creating comprehensive materials to support those working in both health and social care sectors. We are keen to look at where our expertise could be beneficial to those who work within Emergency Services and have taken time to consider some of your potential hotspots:

Medical Training

dynamic. have created materials to support many medical procedures. Whether you have a need for ad-hoc bespoke courses or programmes to support your mandatory learning agenda dynamic. can help.

Vehicle Layout

We appreciate that the effective configuration of an ambulance is essential. dynamic. could support with the development of materials to help with training on the clean-down and make-ready processes and vehicle safety checklists.

Bespoke Learning

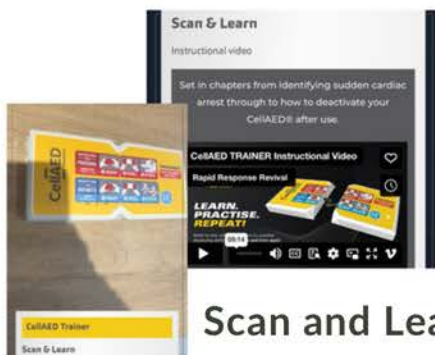

Virtual Reality (VR)

We have the skills to create immersive materials that draw upon the use of VR for training. The example shown is based on fire safety training provided for those working in acute hospital setting.

360

We can develop materials that put the learner at the centre of a scenario. The example shown relate to resuscitation in neonatal care and scenarios in a social care setting.

Scan and Learn

The Scan and Learn technology helps to put learning at the point of need. You can have cards or even products that can be scanned, real-time, to display instruction or guidance. This can include videos, tutorials, and even links to purchase a product. The example shown is the CellaAED® Scan and Learn App, simply point the camera at the CellaAED® or CellaAED Trainer® to reveal the guidance: Instructional Video, CellaAED Trainer® App download, CellaAED® online shop link.
