

// DECONTAMINATION SHOWERS

APPLICATION FIELDS

Fire department, rescue
service and aid organisation

Triage, field hospitals,
first aid posts

Military

Decontamination and
Hazardous Goods Operations

Decontamination is crucial for preventing hazards. An inflatable decontamination shower is the easiest, fastest, and most flexible solution. Our decontamination showers are designed to meet ANSI/ISEA 113 standards, ensuring optimal safety and effectiveness.

- **FASTEST, MOST FLEXIBLE DECON SOLUTION**
- **UNINTENDED CONTAMINATION PREVENTED**
- **ESPECIALLY DESIGNED FOR EASY HANDLING AND QUICK SETUP**
- **RELIABLE DECONTAMINATION SYSTEM PROVEN IN PRACTICAL SITUATIONS**

// DECONTAMINATION SHOWERS

Yellow

FRAME

Inflatable frame, operated with 4.40 psi overpressure, made of airtight coated fabric 32 oz/yd², connected to the shower cabin with a 'cord and loop system'. The frame is inflated with compressed air or by using an electric blower within approx. 1 min.; the relief valve prevents the frame from overfilling.

SHOWER CABIN FABRIC AND GROUND SHEET

The shower cabin is made of yellow PVC treated polyester fabric, waterproof, anti fungicidal and has large transparent foil windows. The groundsheet is permanently attached to the shower and made of grey PVC-coated polyester fabric.

SHOWER EQUIPMENT

Arched tubular system containing nozzles, hand shower with a 4.90 ft hose, D-coupling head for water supply, C-coupling head for water discharge.

ADVANTAGES

- Short erecting time and small manpower demand
- Small damages can be repaired on site
- Easy cleaning
- Separation of shower cabin and frame
- System proven in practical situations

SAFETY

- Partition walls and thresholds prevent a carryover of unintended contamination
- Relief valve prevents from overfilling the tubular system
- Inflatable frame made of PVC
- Flame retardant fabric, according to DIN 4102 B1, available
