

# What is ROAMER

The Remote Operational Advanced Medical Emergency Response (ROAMER) course is amongst the most advanced three-day medical courses offered to non-healthcare professionals on the market today.

The course includes modules such as:

- Scene Safety
- Use of medications
- Advanced Airway Management
- Wound and catastrophic bleeds management

The ROAMER course is dual certified so individuals working in the renewables and offshore wind sector will receive a GWO Enhanced First Aid certificate and a ROAMER Enhanced First Aid certificate.

To support ROAMER trained individuals and provide the legal administration of pain relief, you must have a robust Clinical Governance provision. To discuss your site requirements, please contact HFR Solutions for further information.

“Amongst the *most advanced* medical courses offered to non-healthcare professionals on the market today.”

## What is Clinical Governance

Clinical governance is a framework, used by organisations that provide healthcare, to ensure high-quality, safe and effective patient care which supports continuous improvement and accountability.

### Why choose HFR Solutions

- **Quality:** Companies are liable for the quality of services outsourced; HFR Solutions operates at the 'gold-standard.'
- **Experts:** Experienced staff from all the emergency services; NHS, fire, police.
- **Bespoke:** Industry specific tailored training with on-site realistic scenarios; train where you work.
- **Holistic:** All-in-one packages incorporating training, equipment, clinical governance, consultancy, emergency planning & more.
- **CIC:** Community Interest Company status.
- **Relationship:** Ongoing support to facilitate continuous improvement and enhance outcomes.

## ROAMER vs GWO

While GWO Enhanced First Aid covers important fundamentals, the HFR Solutions CIC ROAMER course takes things to the next level with more realistic, hands-on training that reflects the pressure and unpredictability of real emergencies.

ROAMER isn't just about first aid—it blends advanced trauma care, casualty management, and rescue skills into one immersive package. It's delivered by emergency professionals who've worked in the field, bringing real insight and experience to the training room. Scenarios are based on actual wind industry incidents, making the learning relevant and immediately applicable.

Where GWO Enhanced First Aid can feel like classroom theory, ROAMER focuses on decision-making in high-stress situations and truly preparing teams for the worst. At HFR Solutions, we believe in building true readiness through our hands-on experience.
